**GIBSON.**

**DEPARTURE.**  
**6.20 A.M.** MIXED, for Woodstock, Presque Isle, Edmundston, and all points North.

**ARRIVE.**  
**5.10 p.m.** from Woodstock and points North.

All above Trains run Week days only.  
**C. E. McPHERSON, H. P. TIMMERMAN,**  
Dist. Pass. Agt. Gen. Supt.

**Watches and Jewelry**

**F. J. MCCAUSLAND,**  
Opp. A. F. Randolph & Sons  
Fredericton, N. B., June 7.

## New Advertisements

**:-: TEAS! :-:**  
Always the Best Value in  
**Panyong, Sayruue, Oolong, Indian and Ceylon Teas.**  
If you want Blended Tea, Ask for It.  
The Finest Value in the Market in 21lb Boxes.  
Fresh Coffee Ground while You Wait, at  
**THE LONDON TEA STORE,**  
W. H. TIPPET, Proprietor.

**WATCHES!**  
If you want time, the correct time, and want it every time you need it, look no further than our well-filled show cases and shelves for your watches and clocks. A gent or lady who secures one of our watches, feel as if they always have a true friend by them and the housewife knows she can depend to having the correct hour to minute, with one of our handsome clocks on the mantel shelf.

**R. BLACKMER'S,**  
Queen Street, - Nearly Opp. City Hall.  
150 QUEEN STREET, ESTABLISHED, 1850. 150 QUEEN STREET.

**JAMES R. HOWIE,**  
PRACTICAL TAILOR,  
Has a Splendid Stock of Impored and Native Cloths

This Season and Cases are arriving daily. Counters and Shelves and Windows are filled with finer goods than ever. These are full lines of Staple Goods in Corkscrews, Diagonals, Worsted suitings, West of England Cloths, and Meltons, Canadian, Scotch and German Tweeds, and Trousers of every style.

**A SPECIAL NOVELTY**  
In Trousersing is of French Make, and a splendidly finished Silk Mixture, soft and fine, and smooth as satin. It comes in beautiful designs, a fine selection of which can be seen on the Counters. **SPRING AND SUMMER OVERCOATINGS** are of specially good value and style this year, and now is the time to have them made up. **MY READY MADE CLOTHING** is all it should be, and more, as many friends are testifying daily. Come and see the makes and prices, they will astonish you.

**BOYS' CLOTHING**  
Is a model Line with me this Spring. My Stock cannot be BEAT, (a fact which should be recommended to all School-boys.) But seriously, every suit is stylish, durable, and cheap. Sales in this department are very rapid. **GENTS' Underwear** is better than ever. All styles in summer Stockwear are in my Store, a really beautiful, choice and cheap Stock.

**MY OLD STAND, 150 QUEEN STREET.**  
Fredericton, N. B., April 5.

**XMAS, 1891-92.**

There is nothing so nice for a Christmas Present as a Handsome Piece of Furniture.

A well furnished house makes HOME comfortable.

Watches, Clocks, Jewelry,  
Silver and Silver Plated Ware

**IS AT**

**A. F. MORRELL'S.**

A Fine Assortment of

**WEDDING RINGS**

Always on Hand.

**A. F. Morrell,**  
Opp. BRIDGE.

## AGRICULTURE

Notes and Suggestions of Practical Utility

**FOR THE FARM, FIELD, GARDEN AND DAIRY.**

Cleanings of Interest for Our Country Readers.

The feed effects the breed. One horse is only half a team. Let the other fellow throw dirt. Are your animals comfortable? Economy always means enough. From a scrub only a scrub can come. Try to get stock to suit your farm. It won't do to depend on blood alone. Evergreens are best for a windbreak. Use only mature animals for breeding. The better the mare the better the colt. Steady thrift makes even fibre of wool. Young trees are best for transplanting. The narrow man narrows the highway. To feed economically, balance the ration. A good farmer keeps everything in order. The good scholar never ceases to learn. Sow plenty of salt under your fruit trees. Plant trees around but not in the garden. Good seed is the first requisite of a good crop.

Always feed young calves milk at blood heat. Mulch around trees is liable to harbor mice. Racks for hay and straw; troughs for grain. We need draft horses as well as roadsters. Don't build your barn in front of your house. The best farmer is never behind with his work. Sparkling water may be loaded with death. The best feeder is apt to have the best breed. Individuality is often as marked as the breed. Farmers need a better knowledge of foods. The most propent of cattle is the Devon. Everything grown on the soil reduces its fertility. Scrape off only the loose, rough bark of the tree. All improved breeds have their excellencies. Get the soil in proper condition before planting. Machinery is helpful to solve the road problem. Blood tells, but nourishing food is a great aid. All domestic animals are naturally improvident. The progressive man keeps a good lookout ahead. Success in inbreeding depends on proper coupling. A breeding ewe should be kept thriving and strong. Don't expect good results from wrong conditions. Even a blooded animal can be starved and frozen. Be careful how you lay down pointed or sharp tools. Bran and corn mixed are better than either alone. Breeds combine the characteristics of individuals. To live only for self is the next thing to annihilation. Roughness alone is not sufficient feed for any animal. One step at a time brings us to the end of the journey. Aim always to grow a tree with a shapely head. A slow but healthy growth is desirable in a fruit tree. Have your plans well laid for your spring's work. If you have trees to trim, do it before the sap starts. A nasty barnyard is not a guarantee of a neat farmer. Old, dry corn stalks, finely cut, make a good absorbent. The best composted manure produces the quickest results. Complete success in dairying depends on right conditions. It takes the world long to learn the simplest lessons. A sharp kink in a pig's tail is said to indicate good health. The larger the animal the greater the sustenance ration. The colder the quarters, the more food is consumed as fuel. It doesn't toughen an animal to let it shiver in the cold. Variety comes from the different combinations of simples. It is a greedy fellow that fences in a portion of the highway. Much of college knowledge is more ornamental than useful. A coating of hot tar or petroleum helps preserve fence posts. Follow principally that line of farming which you can do best. Intensive agriculture is the coming saviour of agriculture. Don't pile all the manure close around the stem of the plant. The same food that makes beef would make butter and cheese. There is more to be learned on a farm than in any other place.

Many an impacted stomach has been caused by need of water. Animals fed on dry fodder should have access to plenty of water. If you want acclimated plants, start a little nursery of your own. All a man can call his own are his mental and moral acquisitions. After cold weather sets in, pork is better in the barrel than in the pen. A dry, dead-air space is preferable to a filling of sawdust, and costs less. A wound in the bark of the tree is like a wound in the skin of an animal. The education you get for yourself belongs to you; the rest is borrowed. The Farmer who is on time with his work is generally the successful farmer. It doesn't pay to put more value in feed in a pig than the pig will sell for. Even the four teats of a cow vary in the quantity and quality of their yield. A hot cup of milk both stimulates and nourishes without causing reaction. Every cow needs a chance to move around freely and stretch her muscles. What a revolution would follow if all should adopt a strictly vegetable diet. Coal tar applied to trees has been known to kill them. It is too impervious to air. When a cow shrinks her milk; it is a sure sign something is wrong with her. There is risk in everything. "Nothing venture, nothing have;" but all ventures should be reasonable. Food is burned in the animal system to keep the body warm, and the consumption accords with the demand. If you are making only a living and your farm is running down in fertility, do you need to be told you are failing?

**THE DAIRY.**  
Rennet.

A very important factor in cheese making is rennet. This must be pure, strong and sweet, or perfect cheese cannot be made with it. If not pure and free from animal tissue, this tissue will soon decompose, throw the cheese off flavor and cause premature decay. If not sweet, then it has already begun decomposition, and you simply stir a decomposing liquid into your milk. Commercial rennet that is put up by reputable houses is the best. They have all the proper facilities, prepare it in a scientific manner, and furnish it of guaranteed strength. No home preparation is as clean and uniform in strength as what is sold by dairy furnishers. Besides, it is nasty, disagreeable work to rub, strain and prepare rennet for cheese making. It is also difficult to get vells of desirable quality and in good condition. Liquid rennet which begins to "smell to heaven" has already lost some of its cheese making virtue, besides having begun to decompose; and weak rennet makes a weak curd, which easily parts with the butter and causes waste. Most of the talk about failure to retain the butter because the milk is too rich comes from the fact of the use of poor and weak rennet. Milk is never so rich as to give signs of waste in the vat. Waste comes farther on, in the press room, and some of that may have been due to the use of bad and weak rennet, which produced a weak and spongy curd, from which the warm butter was too easily squeezed. All cheese makers of experience know that there is a great difference in the virtue of rennets. Old vells make the strongest liquids. Besides individual rennets vary a good deal in their strength. If one has been using old rennets or vells, those that have been properly kept over a year, and has to change to new rennets saved the previous spring, he will find a marked difference in the feel and texture of the curd. The new rennets make soft, slippery curd, as compared with curd from old rennets. If you prepare your own liquid you should try to have a supply of stomachs a year old to prepare it from, on the score of economy and the expectation of having a better quality of cheese.

**Holding Curds.**  
After the whey is disposed of, there is little danger of injuring the curd by holding it too long. It only serves to hasten the curing. The rennet does its work faster in the warm vat than it does in the cooler ranges. And there is no danger of its "huffing" in the vat. If there were, there is the place to hold it until it ceases to huff. A curd made of apparently sound milk can be held until a piece of it cut through with a sharp knife shows it full of pin holes and will always make solid, close-grained cheese. All the gases were evolved by this holding.

**Salting.**  
Be sure that your curd is well broken up or ground before you salt it, and salt it while it is yet quite hot. The application of salt greatly tends to keep the curd from packing. A curd salted before the acid has sufficiently developed, or the cheesing process had gone far enough to help keep the curd loose. The only adverse effect that the salt further retards the temperature and somewhat retards the operation of the rennet and the development of the acid. Both these operations are continued, especially the action of the rennet, after the cheese is put to press, and in the curing room until the cheese is ready for market—indeed, it is believed that the rennet action continues until decomposition finishes the job. It is a good practice to hold your curd for some time after salting, to allow the salt to dissolve and properly permeate the mass, and the curd to assume a soft, cheesy texture.

As a cure for cold in the head and catarrh Nasal Balm is endorsed by prominent men everywhere. D. Derbyshire, president of the Ontario Creamery Association, says:—"Nasal Balm beats the world for catarrh and cold in the head. In my own case it effected relief from the first application." Sold by all dealers or sent by mail on receipt of price—50 cts. and \$1 a bottle. Fullford & Co., Brockville, Ont.

## PARAGRAPHS

On All Subjects of Current Note at Home and Abroad.

**ANECDOTES, HAPPENINGS AND GENERAL COMMENTS**

Clipped and Condensed for the Readers of The Globe.

Cover a nail with soap, and it will then be easy to drive it into hardwood.

There are twenty-one properly qualified women doctors in the English provinces, and twenty-three in India.

Australia holds some two hundred millions of British money, most of it repayable within the next thirty years. But her solvency is beyond attack.

The moral quality of things is entirely a personal matter. He who laughs at the miseries of other people is a brute; if he laughs at his own he's a hero.

There was a prize fight between 'lady' pugilists in Brooklyn. The brutal exhibition took place in a theatre in the presence of a great crowd, including some policemen who kept order.

A wife left her husband at Ranganati. The latter complained to the Dewan, who gave him fifty rupees as compensation for his loss, and the wife was to be sold by auction to recover the amount.

"One minute luncheons" for business men are being provided in New York. Customers stand before a revolving counter and help themselves to the viands as they pass, the circuit occupying one minute.

Canada lacks only 237,000 square miles to be as large as the whole continent of Europe; it is nearly thirty times as large as Great Britain and Ireland, and is 500,000 square miles larger than the United States.

Recently, on a certain night, says the 'National Bulletin,' a group of girls and boys were seen coming out of a public house in Shoreditch at closing time, one of them, a child in a pinafore, being too drunk to walk.

A telephone has been tried on a new telegraph line erected between Melbourne and Adelaide, which are 500 miles apart. Conversation was carried on easily, and the chimes of the Adelaide Post Office clock were distinctly heard in Melbourne.

Since 1886 Lord Salisbury has appointed two Archbishops of York and sixteen bishops, and the Bishopric of Carlisle is now vacant. Perhaps no other Prime Minister of the century has had so much ecclesiastical patronage at his disposal in so short a time.

The collier is likely to become a familiar figure in Kent before long. Six seams of coal, amounting in all to 14ft. 6in., have been discovered in the boring operations at Dover. Sir E. Watkin said, at Ashford, that the success of the experiment is now well assured.

Germany, like England, has a high emigration rate, but in spite of that she adds more than twice as much to her population in one year as France adds in five years. The population of the German Empire is now greater by ten millions than the population of France.

Captain Osborn, whose name has been so much before the public lately in connection with the recent Pearl Slander case, is the son of the eminent musical composer, Mr. G. A. Osborn, one of whose most popular compositions was, curiously enough entitled "The Shower of Pearls."

In a return obtained by Mr. Burt, it is estimated that in England there are 1,300,000 persons of all classes over the age of sixty-five, and that 245,687 of these are receiving parish relief. Thus at least one person out of seven, counting every class, becomes a pauper at or after that age.

At the London mission House recently, a Scotch lady called to see the Foreign Secretary (Rev. R. Wardlaw Thompson), and placed in his hands a packet containing a gift from her husband and herself. On being opened it was found to contain £425 1s. 2d. She declined to give her name, and desired only that it be acknowledged in the report as 'lady not up.'

There is in existence a substance other than a jewel of the purest water, which is worth no less than sixty times its weight in pure gold. In the cabinet of chemical elements which the late Prince Lucien Bonaparte has bequeathed to the English nation there is a substance called germanium, which is reported to be of this fabulous value.

A cultivated lady, presiding over a pleasant home in one of Boston's suburbs lately took her three daughters to call upon Mr. Whittier at his home in Amesbury. The poet received them cordially, kissing the youngest, a bright little girl of ten. "There!" said the delighted mother to the child, "now you, as well as your sisters, will have something to be proud of. 'What is that?' asked Whittier, with interest. The lady explained that when her older daughters were children she had taken them to call upon Longfellow, who had bestowed upon them a similar mark of attention. "What Longfellow has done I surely may be permitted to do," said the grand old poet gallantly, and, stooping his tall form, he kissed both young ladies, who blushed and looked conscious, but smiled delightedly.

Let there be no mistake about this that the "Myrtle Navy" tobacco is manufactured from the very finest Virginia leaf. No higher quality of leaf can be purchased for any tobacco made. It is selected with the very greatest care, and treated with the most approved processes for preserving the flavor of the tobacco.

## JINGLES OF HUMOR

A Little Nonsense Gathered for Leisure Reading.

The fish that has left the hook knows the danger of snapjudgement.

Teacher. What is the feminine of man? Little girl. Dude.

He. I can assure you that I am a bachelor from choice.

She. So I suppose; but whose choice? Brown. How's your baby's health, Newpop? Sound, eh? Newpop. Yes, I sometimes think he's all sound.

Is your play realistic? Well, I should say it is. I have a young wife make a sponge cake on the stage, and give it to her husband, who eats it and dies upon the spot.

Purse-proud father. So you hope to marry my daughter, do you? Well, young man, what are your prospects in life? Ambitious young man. I hope to marry your daughter.

Carrie. George has asked me to be his wife. I hope he loves me. You don't suppose he wants me only for my money? Kata. I don't know, but some men will do anything for money.

What is the matter, dearest? Somefin awfu's happened, mamma. Well, what is it sweetheart? My d-doll-baby got away from me and bwoke a plate out in the panty.

Beaver. That was a sad thing about Bil-derwick. He ordered a \$75 overcoat, and the day after it was delivered he was taken down with typhoid, and won't be able to wear it for a year.

Melton. Will he be able to wear it next year? Beaver. Oh, yes! But think of having to wear a new overcoat the same year you pay for it.

**After Dangers of the "Grip."**  
Boston papers facetiously remark that "La Grippe is seldom fatal unless you use all the remedies recommended for it."

They are correct. The writer fully believes that the end of the poor 'grip, victim if he tried all the patent medicines that have adorned (?) the pages of our leading newspapers as 'sure cures for La Grippe,' would be like Mark Twain, who for his famous cold tried every remedy advised by friends, until his stomach became so weak he began to vomit and continued until, as he avers, 'he was like to throw up his immortal soul.' We notice one of the leading advertisers of the day has been conspicuous at this opportune time by the absence of any claim to cure the 'grip.' Then certainly deserve a 'chromo' and we feel like giving them a 'ad' for their compassion upon our readers. The more so for the reason that probably more people have used their remedy, that good old family medicine, Johnson's Anodyne Liniment for this foreign influenza, than all others combined.

And why not? Certainly no other will relieve catarrhal colds, coughs, bronchial troubles, or neuralgic pains, as promptly as all symptoms or results of La Grippe. Herein lies the real danger from this epidemic of influenza; it leaves the mucous membrane linings of the nose, throat and bronchial tubes tender and very susceptible to the catarrh bronchial troubles and pneumonia, which come with February and March in our northern climate. We shall still pin our faith to a remedy for this after danger which acts promptly to allay inflammation; for therein lies the chief danger from the throat and lung troubles. And surely a remedy that the friends that Johnson's Anodyne Liniment has, after eighty years' trial by a critical public, and has been used for the 'grip' more extensively than all the advertised remedies, deserves, as we said, a medal, and has before it we hope a prosperous year as an octogenarian. I. S. Johnson & Co., Boston, Mass., the manufacturers will send a valuable pamphlet free.

The people of Paris have consumed last year 21,221 horses, 229 donkeys, and forty mules, the meat weighing, according to the returns, 4,615 tons. At the 180 shops and stalls where this kind of food is sold the price has varied from two pence a pound to ten pence, the latter being the price of superior horse steaks.

A lady living at Birmingham, in every case of conviction in the local police court for cruelty to animals, cuts out the newspaper report, and encloses with it with a postal order for half-a-crown and posts it to the constable who prosecuted. Several officers have been the happy recipients of this reward, but no one has the least idea from whom the money comes.

Age does not at present seem to effect Rosa Bonheur's power or her capacity to earn large sums. She is now well into the seventies, but she has just completed one of the largest pictures she has ever painted. It has occupied her three years and she has already been offered and refused £12,000 for it. The scene depicted is that of ten horses, life-size in full trot, treading out corn.

The Queen is by no means fond of jewellery. She simply wears two enamel bracelets, each containing a portrait. The one worn on the right arm contains the portrait of the Prince Consort, and on the left that of Her Majesty's youngest great-grandchild. The Queen says: "On the right wrist, I carry my first and greatest love, and on the left, the last bud that had pleased God to allow me to look upon."

Let there be no mistake about this that the "Myrtle Navy" tobacco is manufactured from the very finest Virginia leaf. No higher quality of leaf can be purchased for any tobacco made. It is selected with the very greatest care, and treated with the most approved processes for preserving the flavor of the tobacco.
