ABSOLUTELY Cures Lost Power, Nervous Debility, Night Losses, Diseases caused by Abuse, Over Work, Indiscretion, Tobacco, Opium or Stimulants, Lack of Energy, Lost Memory, Headache and Wakefulness. Young, middle-aged or old men suffering from the effects of follicle and excesses, restored to perfect health, manhood and vigor. RELIEF TO THOUSANDS BY THIS MARVELOUS REMEDY.

A Cure is Guaranteed!

To everyone using this Remedy according to directions, or money cheerfully and conscientiously refunded. PRICE \$1.00. 3 PACKAGES \$3.00. Sent by mail to any point in U.S. or Canada, securely sealed free from duty or inspection. Write for our Book "STARTLING FACTS" for men only. Tells you how to get well and stay well. Address or call on QUEEN MEDICINE CO., NEW YORK LIFE BUILDING, Montreal, Can.

## HONEST HELP FOR MEN

Pay NO MORE MONEY TO QUACKS. A sufferer from Errors of Youth, Nervous Debility and Lost Vigor, was restored to health in such a remarkable manner, after all else had failed, that he will send the means of cure FREE to all fellow sufferers. Address, with stamp, MR. EDWARD MARTIN, (TEACHER) BOX 142, DETROIT, MICH.

## DEATH BY SEETHING FLAMES.

Chicago's First big World's Fair Horror.

Over Thirty Firemen, Caught in a Death-trap, Lose Their Lives by Fire and Jumping to Death.

CHICAGO, July 11.—The first great "World's Fair horror" took place yesterday. It was caused by fire. People have long been predicting that Chicago would have a fire in connection with the Fair that would be the cause of much loss of life. They pointed to the hotels outside though, rather than to the buildings inside the grounds.

Between two and three o'clock in the afternoon over thirty men lost their lives in the burning of a cold storage warehouse.

It was 250 feet long by 150 feet wide, and was built entirely of wood. The main body of the building was five stories high. In the centre of this rose the smoke-stack in the shape of a cupola, to the top of which was almost 200 feet. The base of this cupola was about thirty feet square. About eighty feet from the base of this cupola there was a balcony from which another square tower arose, culminating in the month of the smoke stack, where the fire was discovered. The interior of this tower and around the smoke stack were wooden beams and frame work, on which the slate covering was laid. It was supposed that the framework around the mouth of the huge chimney caught from a defect in the flue. At first it appeared to be an insignificant affair, but knowing the inflammable nature of the structure, the fire marshal, Mr. Murphy, who had charge of the Fire Department on the ground, sent in a call for all companies to turn out. With between thirty and forty of his men, Captain Fitzpatrick climbed inside the tower to the balcony, and from there ropes were lowered to haul up the hose.

Only one hose, that of the chemical engine, had been hauled up, when a gust of wind caused the flames to break out in an alarming manner about ten feet from the top of the cupola. Meantime the fire had eaten its way down through the network of timbers inside the structure, and

Unconscious of Their Danger, the firemen were standing as it were on the shell of the burning volcano. No one of the tens of thousands of interested spectators had any intimation of the perilous position in which the firemen were then standing. The fire had been burning scarcely twenty minutes, and the firemen were pulling and hauling at the ropes, when suddenly the flames burst out around the base of the cupola in a perfect fury of flame. So sudden and so furious was the outbreak, and so terrible was the spectacle that for the moment the crowd stood transfixed. All were powerless to aid the unfortunate men imprisoned on the balcony, 160 feet from the ground. All the ropes save one on the north side of the tower were burned in an instant. The hose from chemical engine withstood the heat, however, and, springing forward, John Davis caught hold of it and slid down to the main roof of the warehouse, where he fainted away. His face and hands were terribly burned by the flames which enveloped his body as he came down. He was taken to the hospital where he was cared for and the physicians say he will recover. Two of his fellow-firemen attempted to follow him, but, before they were half way down, the hose gave way and they

Dropped into the seething mass of fire and were lost. The multitude below gave utterance to a groan of sickening horror. Another of the imprisoned men started down the rope on the north side of the tower, and had almost reached the roof when it gave way and he fell, striking on his head. He was instantly killed. There remained, according to the count of various spectators, from twenty-five to thirty men on the tower. They were hopelessly beyond the reach of help. The longest ladder fell short of reaching them by a full thirty feet. At this terrible moment Captain Fitzpatrick's tall form and white helmet appeared in front of the men who were huddled together on the balcony. He appeared to be addressing his followers. What he said will probably never be known for he alone of all the men around him at that moment escaped alive and his injuries are such that it is doubtful if he will ever recover consciousness. As he ceased to speak one of the men crept around the burning balcony to the east and returned a moment later with a rope that had been left there in the excitement. It was hastily fastened to the railing and thrown to the roof. Capt. Fitzpatrick pointed to it. What he said no one knows. The foremost man seized it and started to slide down, but ere he was half way the flames rolled up and he was swallowed into the awful volcano. Another tried it and met the same fate. One after another five of the men at this moment sprang from the balcony to the roof

and were killed by the fall. If any of them survived they were burned. The rope was burned off about half way down, and it hung apparently useless against a portion of the wall not yet destroyed. Seeing his men jumping to their doom the marshal seized the rope

and started down. A ladder had been raised but was almost twenty feet from the end of the rope. He dropped and caught on the end of the ladder. Marshal Murphy, an old personal friend of Capt. Fitzpatrick, and who has worked on the Chicago Fire Department for a score of years, was on the roof. Seeing there was a chance to save his old comrade's life he sprang forward and was soon at the top of the ladder. A shout of encouragement went up from the multitude below. The heroic marshal started back with his friend but was enveloped in flames. With the energy of despair he clutched his comrade, and slid down the ladder to the roof where he fell prostrate. Both Murphy and Fitzpatrick were unconscious. They were lowered to the ground and taken to the hospital. Scarcely twenty-five minutes had elapsed since the fire was discovered; but so rapid had been its progress that the entire tower was turned away and it fell with an awful crash, carrying with it several firemen who were playing on the flames with the hose from the roof. There was a wild scramble to get off the roof. A large quantity of linseed oil was stored on the top floor, and when the tower fell it crashed through the roof to this inflammable fuel and then the flames rolled up high in the air. As the firemen fled from the roof one of them picked up the mangled form of one of the unfortunates who had jumped from the balcony, and carrying it to the edge of the roof dropped it to the ground, thus saving it from cremation.

Many of the firemen who lost their lives might have been saved had the department supplied nets. Seeing that it was a hopeless task to attempt to save the building, and as all who escaped alive had left the roof, the firemen now directed their efforts to keep the fire spreading. The World's Fair stables, just south of the big warehouse were all burning, and the fire had spread to the roofs of several hotels across Stoney Island avenue just outside the grounds. With a good deal of effort the hotels were saved, but the stables were burnt to the ground. In less than two hours from the time the fire started the cold storage warehouse was levelled to the ground, a smoking ruin. It is doubtful if any of the bodies will ever be recovered, so furious and terrific was the fire. The building being of wood, and added to this the barrels of oil, made the fire one of the hottest the fire department has ever had to fight. It was reported by some of the Columbian guards that a number of women who were in the building lost their lives. The firemen who escaped however, discredit this story. But late last night a body which was found in the ruins was so badly burned that it could not be told whether it was that of a man or woman.

OTTAWA, July 11.—A telegram received by the Department of Agriculture states that there was some Canadian cheese and fruit in the cold storage building. The loss will not be heavy.

## A STRUGGLE IN MID-AIR.

Mortal Combat Between a Whipsnake and an Eagle.

J. H. Lee came into Prescott, Ariz., a few days ago from the American ranch, west of Prescott, and related to the Courier a strange story. In the mountains crags near the ranch several families of American eagles have for years reared their fearless brood, and have, in the main, been unmolested. Their chief prey being snakes and other reptiles, unwelcome to man. In the same section a species of snake, known thereabouts as the whipsnake, is also common. These snakes are of the long, slim variety, seldom larger than a good sized walking stick, but ranging in length all the way from four to ten feet. They are not considered poisonous, but like the boa-constrictor species, wind round their prey and crush it, and their squeezing powers are said to be somewhat wonderful. So swift are these snakes that they disappear unharmed when struck at with a stick, like the shadow of a flying bird. A few days ago Mr. Lee's sons were hunting through the forest near the ranch, when they saw a great eagle which was sailing in midair, suddenly dart to the earth, head a flutter in the bush, a piercing scream of the bird rose above the pine tops, an unusually long whipsnake dangled from his beak. The eagle held the snake just behind the head, and rose rapidly; the snake seemed to be making ineffectual efforts to draw its dangling body up to coil around the eagle. The eagle was soon in mid-air and the snake could not be seen, but it was evident that a mortal combat was taking place for the bird would rise and fall and emit occasional screams, as if in pain, and in a few minutes was seen rapidly descending earthward; turning over and over in its flight and flapping one wing vigorously, the other seeming to be held out stationary. But nothing could be seen of the snake. The bird struck the ground with somewhat of a thud near the boys, who hurried to the place, where they found the eagle with a dead grip on the snake, just back of the reptile's head, while the snake had coiled round and round its assailant's body, crushing the bird all out of shape and breaking one wing entirely. The boys killed and unwound the snake, while the dogs went for the eagle and soon killed it, not however, before the bird had almost torn the nose from one of the dogs with his beak.

The world contains about 7,000,000 Hebrews, about 3,400,000 of whom dwell in Russia and 1,700,000 in Austria.

A sugar dish owned by Mrs. I. K. Smith of Roswell, Ga., has been in use by her family for over 100 years.

The state of Massachusetts at one time previous to the revolution claimed the Pacific ocean as its western boundary.

There is a man in Michigan who has read the Bible through 130 times. He thinks that Professor Briggs is mistaken.

In 1850 there was one criminal in 8500 of our population, but in 1890 there was one in 786.5, a tremendous increase in 40 years.

Two thousand and seventy-eight persons die every week in London. During the influenza epidemic this number rose to 3271.

A chain of compressed cakes of gun cotton tied around the trunk of the largest tree and exploded will cut the tree down instantly.

The Austrian authorities have issued a rescript calling attention to the law that physicians prescriptions must be written in a legible hand.

The New England states have more savings bank depositors than all the rest of the country leaving out the state of New York.

The shark manifests a distinct liking for certain races, and will eat an Asiatic in preference to a negro and a European rather than either.

The 'foot corset,' which is becoming popular in Paris, enables the wearer to readily crowd a No. 4 foot into a No. 3 shoe. Fools wear them.

A popular Kentucky souvenir spoon represents a racetrack, a statue of Mary Anderson and a barrel of whisky entwined with tobacco leaves.

The letters in the various alphabets of the world vary from 12 to 202 in number. The Sandwich Islanders' alphabet has the first-named, the Tartarian the last.

After many years of indecision the hydrographers have arrived at the conclusion that the hottest region on the earth's surface is in the immediate vicinity of the Dead sea.

The largest private yacht afloat is young Mr. Laycock's Yachalla, lately built upon the Clyde. She is about 1700 tons, is built of steel and will be shiprigged with an auxiliary crew.

A Mexico (Mo.) girl the other day gave the postmaster a dollar, saying that she 'wanted twice as many landings as discoveries, and the rest in fiefs.' He gave her the stamps she asked for.

The origin of feather in his cap is thus explained: In Hungary, in 1599, it was decreed that only he who had killed a Turk should wear a feather, and he was permitted to add a fresh feather to his cap for each Turk whom he had slain.

The royal crown of Roumania is made of bronze, the metal having once done service in the shape of cannons. Samples from 62 war tested guns, each of whom was captured from some enemy, are included in the make-up of this royal insignia.

Excavations are now being made in the famous two headed hill mentioned by Virgil, about eight miles from Tunis. Many interesting remains have already been unearthed, the largest being the famous temple of Baal Saturn, in which the Carthagonians worshipped.

While the western movement of population in the United States for the century aggregates 505 miles, the extreme northern and southern variation is a little under 22 miles, and the finishing point of the line is only some six miles south of the starting point.

Gentlemen, said the college professor to the senior class on the day before commencement, be practical. What will it avail you to know all about the second aorist if you are asked to carve, and don't know how to hit the second joint of a tough duck?

The intensity of confined sound is illustrated at Causbrook castle, Isle of Wight, where there is a well 200 feet deep and 12 feet in diameter, lined with smooth masonry. When a pin is dropped into it the sound of it striking the surface of the water 182 feet below can be distinctly heard.

Insects do not breathe through the nose and mouth. Down the body run two main pipes. These pipes send out branches to right and left like a network, extending to the extremities of the body, even to the ends of the antennae and to the claws. Each main tube receives the external air through 8 or 10 spiracles or breathing holes, placed at intervals along the sides of the body. The spiracles are made water tight and dust tight by a strong fringe of hair.
