Fredericton Globe

AJ MACHUM, Publisher and Proprietor. FREDERICTON, N. B. SEP. 9, 1893

MR. CALKIN UNLOADED

The city council did a wise thing on Tuesday evening last, when at their regular monthly meeting in the council chamber, they decided to have no more dealings with Mr. Geo. F. Calkin regarding the lighting by electricity of the city streets. It has been the general opinion among level headed men in the city that Mr. Calkin was merely temporising with the city all through the negotiations. It looked unreasonable that he or any body of associates would go to the expense of putting in new and expensive electrical plant and machinery, solely for the purpose of supplying arc lights to the city at a price nearly ten dollars per light lower than the tender of the Fredericton Gas and electric light company. There is not nor will there be, for many years at least, any further demand for electric lights in the city; and a company which would be so insane as to import the necessary apparatus for that purpose alone, must surely lose money by the operation. On the other hand, the council would have saved a great deal of wasted time if they had in the first place accepted the tender of the local company. The latter is already established here; possesses the requisite plant and machinery, and has, besides, a considerable business established with the merchants of the city, who would certainly continue their connection with it. Nearly all, if not all, the stock holders in it are inhabitants of Fredericton, and all these considerations would lead one to suppose that the company could afford to furnish the necessary lights as cheap as, if not cheaper than, any other. Now that the council have decided to "shake" Mr. Calkin, we believe that they will go right to work, and have the matter settled one way or another, without any delay. Indeed, they have already authorized the light committee to make all necessary enquiries from the Fredericton Company, with a view to ascertaining the real difference in cost between lighting by electricity and gas. Their committee's report is to be submitted at the next meeting of the council, when we hope to have the matter definitely settled. But it looks as though there will be no change in the present system of gas lighting in the near future.

THE CITY COUNCIL.

We have often wondered why it is that so little interest is displayed by the people of this city in the doings and proceedings of the city council. We will venture to say that in this respect Fredericton stands unique among the incorporated cities of the Dominion, but the reason why such an apparent apathy exists we are at a loss to discover. Is it because the people have come to the conclusion that the civic affairs of their city are of so little importance as not to warrant any attention on their part? Or do they imagine that they are not interested parties in all that is done and said in the council chamber? Or have they such implicit confidence in the present Board of aldermen that they are willing to entrust to them the absolute control of all city business without a murmur of approval or dissent?

It looks very much as if all three reasons have combined to bring about this state of affairs. But whatever be the cause, we have no hesitation in condemning the effect. The people of the city must surely understand that it is the city council which is directly responsible for any increase of civic taxation. The aldermen have control of the expenditure for streets and sewers, for water works and fire protection, for city lighting and heating, and the care and management of the city property, both lands and buildings. In all these matters every inhabitant of the city has a direct and material interest which should prompt him to keep an eye on the proceedings of the council. As far as the last of these

three reasons is concerned, it cannot be that it is the true one. Surely the people know better than to put absolute trust in any body of men, no matter how able and honourable they may be, when the business which they are called upon to transact is of a public nature. We do not mean to make insinuations against any member of the present council. We believe that that body endeavours to do what is right according to its views; but at the same time it is not infallible. And in a general way we would advise the electors of the city to do as is done in other incorporated towns in the Dominion; and not only insist that the proceeding of the council shall be reported fully in the newspapers of the city, but keep a watchful eye in the direction of their interests. We believe that if such an attitude were adopted, it would lead the citizens to take very much more interest than they do now in the practical welfare of the city; and thus promote advancement and progress in the future.

NEW HOSE.

The energetic course taken by the fire committee of the council in making thorough tests of the sufficiency of the fire hose so soon after its failure at the late fire, and in recommending the purchase of new hose as soon as they were satisfied that the old ones were untrustworthy, merits the hearty commendation of all citizens interested in the proficiency of our fire department. There is no branch of the public service of the city on which the safety and preservation of our properties depends so much as upon this department, and it would be too bad to have it fail in its duty because of rotten or weak hose.

Concerning the new Governor General of Canada the London, Eng., Morning Chronicle says editorially "that looking around amongst the English public men 'available for the position of Governor General of Canada, it is at least difficult to suggest a more fitting appointment than that of Lord Aberdeen. By social and business relations the new Governor General may be termed a Canadian already."

At the Provincial exhibition which takes place here on Sept. 19th, 20th and 21st especial prominence will be given the dairy business, now one of the most important industries of our province. A modern silo will be shown under government auspices. Secretary Murray is confident the show will greatly eclipse all former efforts in every respect. The races at the Park Association track, adjoining the exhibition grounds on the 20th and 21st will bring many of the fastest horses in the province together and all lovers of the turf may expect a treat. There is every reason to expect a grand rush of visitors to the city. The committee have made arrangements with all railways and steamboat lines to bring the visitors here and carry them home again at one fare for the round trip. For prize lists and all other information enquire of A. S. Murray, Sec'y.

KITCHEN & SHEA'S,

Plumbing Establishment is the Leading one in the City.

The establishment of Kitchen & Shea, situated on Queen street opposite the Post Office, is a credit to the city as well as to the enterprising young firm. Their show room, is fitted up in the most modern style and contains a complete and tastefully displayed stock of elegant goods such as: stoves, bath-tubs, furnaces, gas fittings and tin ware of every description. Their steel clad bath-tubs are the handiwork of the lightest, strongest, most durable, and cheapest bath in the market. It cannot leak, there is nothing about it to shrink or decay, while it is open and accessible and affords no place for accumulation of impurities. Their favorite diamond cooking stove, for either wood or coal, is the handsomest, heaviest and most durable made. The ornamentation very beautiful while the castings, fittings etc., are guaranteed of the best workmanship. The Eagle furnace handled by them is the most powerful heater in the market, it being warranted to give double the amount of heat of any other furnace from the same quantity of fuel. Their stock far surpasses, both in quality and quantity, that of any other firm in the same line in the city, while their prices are the lowest. Give them a call.—See adv. on another page.

Our Public Schools

Are the main-stay of our republic. In them are being cultivated the minds in which are to be our future lawmakers and leaders in every walk in life. How essential it is that these minds should be united to strong, healthy bodies. So many children suffer from impurities and poisons in the blood that it is a wonder that they ever grow up to be men and women. Many parents cannot find words strong enough to express their gratitude to Hood's Sarsaparilla for its good effect upon their children. Scrofula, salt rheum and other diseases of the blood are effectually and permanently cured by this excellent medicine, and the whole being is given strength to resist the attacks of disease.

VIGOR OF MEN

Easily, Quickly, Permanently Restored.

ERIE MEDICAL CO., Buffalo, N.Y.

Wanted.

At Joseph Walker's merchant tailor, a smart girl to learn vest making.
