AGRICULTURE

Notes and Suggestions of Practical Utility

FOR THE FARM, FIELD, GARDEN AND DAIRY.

Cleanings of Interest for Our Country Readers.

Treasure up every new idea.

The more wood the less fruit.

Have plenty of garden "saw."

Even gold fluctuates in price.

The education farmer must lead.

A day of reckoning comes to all.

Have you cleaned out the cellar?

Microbes are the product of decay.

Milk the cow with clean dry hands.

Educate the bull to work in harness.

No man ought to be utterly content.

How does formic acid get into honey?

That which you sow is what is reaped.

Treat everything according to its kind.

The best is the cheapest in the long run.

Iron is an important element in the soil.

Don't select dairy cows; grow and test them.

Finish one thing before you begin another.

Every fool must go to school—to experience.

It is difficult to reduce guessing to a science.

The wind is a great source of motive power.

Every farm should have its swine pasture.

A horse is not finished until he is broken.

Every man can sneer, but few can argue.

Woodchucks and curs make good fertilizer.

Expenditure of labor is expenditure of capital.

Every man ought to know his own weak spots.

It is better to reduce cost than to increase price.

Basewood is the best honey producer we have.

The rule in a dairy herd: Survival of the fittest.

The cost of marketing often eats up the profit.

In the absence of lime, a soil is practically sterile.

A prayer for progress is a prayer for revolution.

Old barrels are apt to impart a bad flavor to fruit.

The pig in good condition is always marketable.

A poor man should never attempt to keep a poor cow.

The social part of the grange is not the least part.

Hope for what you please, but don't expect too much.

The ration can be balanced by foods grown on the farm.

Onions are said to be wholesomes They ought to be.

Eighty-seven per cent. of milk should be clean water.

The Simmental cattle are said to be the coming breed.

Corn meal is best for chickens when the meal is cooked.

The problem of fluctuations in prices is worth studying.

Lime helps render available the nitrogen locked up in the soil.

A poor animal with a good pedigree is dangerous to breed from.

It is better to be agreeably surprised than sorely disappointed.

You cannot cheat your field; it returns in kind what you give it.

Whatever you attempt, don't bite off more than you can chew.

It is not a good plan to plant seeds of several varieties together.

Can't Dr. Babcock invent an instrument for testing dairymen?

We hope to see a professional in every dairy, public or private.

Seal the brine and keep it sweet; then it will preserve the meat.

Credit your farm with all you get from it, and see if it does not pay.

A knowledge of the past is not sufficient; you need that of to-day.

The grange is of more value to rising generations than to the present.

The farmer works to a plan as necessarily as the mechanic or business man.

Keep your varieties true to name, and you may find a market for them as such.

It is dangerous to experiment with "drugs" on the theory that you must do "something."

The Troy Times says: "Some people are like angels' wings—no earthly use to anybody."

Capital combines to put down wages; laborers combine to put up wages. Which is to blame?

Western farmers are not as slow to adopt new and improved means and methods as the eastern.

No farm animal comes so near earning his living by voluntary labor as the hog, if given a chance.

No man has the right to let his stock loose, to the injury of his neighbors. This applies to fowls as well.

The meat of every kind of animal has its own peculiar flavor; but this is greatly varied by the food eaten.

The Rural New Yorker says: We can't all live in a sugar camp. There is a principle here to think about.

There is a good day coming when the water power of our hillside springs will heat and warm our houses by electricity.

False hopes are built in opposition to law, evidence and condition. Know each of these before spending life and labor to fail.

An intelligent plan based upon fact and true conditions, resources, demand and supply, is the first requisite in success farming.

If you do not keep a file of your paper make a scrap-book and save what specially strikes you as valuable. Some rainy day index it.

The Poultry Yard.

At this season some farmers are compelled to keep their fowls in confinement, in order to protect the garden crops from depredation, which entails more labor and care than when the hens are permitted to run at large, as both the food and water must be provided. The feeding of the hens is not difficult if they receive nothing but grass, but such a system of feeding would result very unprofitably at this season of the year.

Hens in confinement will lay as many eggs as when on a range, if they are properly managed. Many suppose that to give proper care the hens should receive all the food they can eat. They reason very naturally that when the hen is confined, all of her wants must be supplied, as she is unable to assist herself, the result being that the hens are overfed, grain being the principal diet. When a hen is at liberty she has not only a varied diet but is able and willing to exercise; but when confined, she has no selection of food, but must accept that which is allowed her. If this allowance is made with a view to affording a variety of animal and green food, and the hen is compelled to exercise, she can be kept in good laying condition in confinement without difficulty.

Bulky food, such as chopped grass and clover meal and milk, fed in moderate quantities, with enough grain and millet seed to keep them busy by scattering it in litter, giving as much of a variety as possible, should induce the hens to lay regularly and produce eggs in abundance, but the main object should be to so feed them as not to have them overfat.

Exercise prevents vices. Idleness induces feather pulling, egg eating, and causes the hens to become dissatisfied. There should always be a scratching place, and whenever the hens become lazy and do not work, give them no food until they begin scratching. A little millet thrown in the litter—which may consist of cut straw, hay or dry dirt—will usually induce them to work when other means fail.

Of Color of Chicks.

If you ordered eggs of pure-bred fowls, and the chicks seem to differ and appear of various colors, do not be disappointed, as the chicks will be the proper color when matured. Of the black breeds of fowls, such as the Langshans, Black Minorcas and Black Spanish, the chicks nearly always have a large proportion of white on them when hatched. It is an old saying that the more white on the chicks of such breeds the blacker the plumage at maturity. We have often noticed broods of Wyandotte of Indian Game chicks, no two in the broods being alike, and differing so greatly as to lead an inexperienced person to suppose that the chicks were mongrels; yet when they came to maturity it was a difficult matter to select the best one in the flock, so far as the plumage was concerned. Brahmas, Cochins, Plymouth Rocks and other breeds may also be classed among the uncertainties until the chicks are well advanced, and for that reason breeders often receive complaints from customers in regard to their hatches; but the breeders simply advise them to wait awhile, when the matter rights itself.

Those who keep their blood in a pure and healthy condition need have little fear of disease attacking them. It is the enfeebled, run-down system upon which disease fastens its fangs. Dr. Williams' Pink Pills have no equal as a blood builder, nerve tonic, and preventative of disease. Thousands testify to the wonderful power of this remedy. Take no substitute. Of all dealers or by mail at 50c a box, six boxes for \$2.50. Dr. Williams' Med. Co., Brockville, Ont.

NEW YORK STATE MIRACLE

A Young Lady's Grateful Acknowledgment of a Timely Rescue.

Miss Lillian Sparks Restored to Health and Strength after Medical Aid had Failed—Her Condition that of Thousands of Other Ladies who may take Hope from her Story.

From the Hornellsville, N. Y., Times.

Painted Post is the name of a pretty little village of one thousand inhabitants, situated on the line of the Erie Railroad, in Steuben county, two miles from Corning, T. Y. The name seems an odd one until one learns the circumstances from which it was derived.

When the first settlers came here from Pennsylvania, all this beautiful valley was heavily wooded, and was a favorite hunting ground for the Indians who then claimed exclusive right to the territory. An object which attracted the attention of the first settlers and excited their curiosity, was a painted post which stood prominently in a small clearing skirted by great spreading trees. It was stained red, and some supposed with blood, and evidently commemorated some notable event in Indian life. And so from this incident the place naturally took its name. The city of Baton Rouge (which means "painted post,") La., also took its name from a similar circumstance.

But the main purpose for which your correspondent came here was to learn the particulars of a notable indeed miracle, cure of a young lady and her rescue from death by the efficacious use of Dr. Williams' Pink Pills for pale People. Your correspondent only knew that the name of the young lady was Lillian Sparks, daughter of Mr. James W. Sparks. On enquiring at the post office for her father's residence we learned that he lived on the road to Hornby, five miles from Painted Post village. And, said a young man who overheard the conversation with the postmaster, it is his daughter who was so sick that the doctors gave her up and she was cured by Pink Pills. And the young man volunteered to guide me to Mr. Sparks' home.

The courteous young man was Mr. Willie Cover, a resident of the place, organist in the Methodist church, and formerly organist for the Young Men's Christian Association of Rochester. So getting a horse we started in the storm, with the mercury ranging at zero, for a five-mile drive over the snow-drift roads of Hornby Hill. When we reached our destination we found a very comfortably housed family consisting of Mr. and Mrs. Sparks, one son and five daughters. The oldest of the daughters, Miss Lillian, twenty-two years old, is the one whose reported wonderful cure by the actual knowledge. This is the story told by Miss Sparks to your correspondent in presence of her grateful and approving father and mother, and is given in her own language.

Yes, sir, it is with pleasure that I give my testimony to the great value of Dr. Williams' Pink Pills. I was ill for four years, doctoring nearly all the time but without any benefit. I had six different doctors; Dr. Heddon, Dr. Purdy and Dr. Hoar of Corning, Dr. Butler of Hornby, Dr. Remington, of Painted Post, and Dr. Bell of Monterey. They said my blood had all turned to water.

I was as pale as a corpse, weak and short of breath. I could hardly walk I was so dizzy, and there was a ringing noise in my head. My hands and feet were cold all the time. My limbs were swollen, my feet so much that I could not wear my shoes. My appetite was very poor. I had lost all hope of ever getting well, but still I kept doctoring or taking patent medicines, but grew worse all the time.

Last September I read in the Elmira Gazette of a wonderful cure through the use of Dr. Williams' Pink Pills for Pale People, and I thought I would try them. I did so giving up all other medicines and following the directions closely. By the time I had taken the first box I was feeling better than I had been in a long time, and I continued their use until now as you can see, and as my father and mother know, and as I know I am perfectly well. I don't look the same person, and I can now enjoy myself with other young people. Indeed I can't say too much for Dr. Williams' Pink Pills, for I am sure they saved my life. I have recommended them to others who are using them with much benefit, and I earnestly recommend them to any who may be sick, for I am sure there is no medicine like them. I am entirely willing you should make any proper use of this statement of my sickness and cure by Dr. Williams' Pink Pills. In further conversation Miss Sparks said she fell away during her sickness so much that she only weighed 80 pounds, and now she weighs 107.

"I suppose," said her father, "that it was overwork that made her sick. You see we have 400 acres of land, and keep 35 cows, and there is a great deal to be done and Lillian was always a great worker and very ambitious until she overdid it and was taken down."

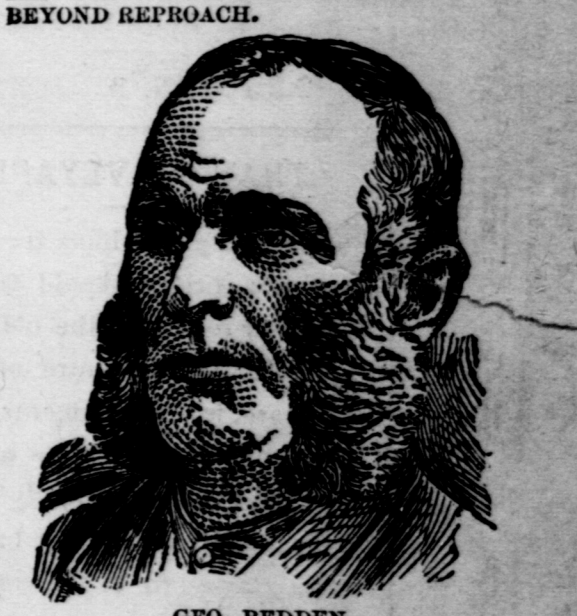

The facts narrated in the above statement were corroborated by a number of neighbors, who all express their astonishment at the great improvement Dr. Williams' Pink Pills have worked in Miss Sparks.

Dr. Williams' Pink Pills are a perfect blood-builder and nerve restorer curing such diseases as rheumatism, neuralgia, partial paralysis, locomotor ataxia, St. Vitus dance, nervous prostration and the tired feeling therefrom, the after effects of a grippé, diseases depending on humors in the blood, such as scrofula, chronic erysipelas, etc. Pink Pills give a healthy glow to pale and sallow complexions and are a specific for the troubles peculiar to the female system and in the case of men they effect a radical cure in all cases arising from mental worry, overwork or excesses of any nature.

These Pills are manufactured by the Dr. Williams' Medicine Company of Brockville, Ont. and Schenectady, N. Y. and are sold only in boxes bearing the firm's trade mark (printed in red ink) and wrapper, at 50 cents a box, or six boxes for \$2.50. Bear in mind that Dr. Williams' Pink Pills are never sold in bulk, or by the dozen or hundred, and any

Liver Complaint, Dyspepsia, Nervousness & Sleeplessness, Flee at the advent of SKODA'S REMEDIES, WHEN PHYSICIANS FAIL.

GEO. REDDEN IS A RESIDENT OF WINDSOR, N. S. MR. R. IS A MEMBER OF THE METHODIST CHURCH, AND HIS CHRISTIAN CHARACTER AND INTEGRITY ARE BEYOND REPROACH.

GEO. REDDEN, Windsor, N. S.

SKODA DISCOVERY CO., WOLFFVILLE, N. S. GENTS:—I have been a sufferer for several years with LIVER COMPLAINT and DYSPEPSIA, NERVOUSNESS, SLEEPLESSNESS, and PILES. I have tried Physicians, and many so-called cures, but obtained no relief until I tried your MEDICINES. I have now taken 6 bottles SKODA'S DISCOVERY, 6 boxes LITTLE TABLETS, and feel like a new man, much better than I have been for years. I am satisfied that a continued use of

SKODA'S REMEDIES, will COMPLETELY CURE me. I have much pleasure in recommending these REMEDIES to suffering humanity, as SUPERIOR MEDICINES.

Very truly yours, GEO. REDDEN.

SKODA DISCOVERY CO., WOLFFVILLE, N. S.

dealer who offers substitutes in this form is trying to defraud you and should be avoided. The public are also cautioned against all other so-called blood-builders and nerve tonics no matter what name may be given them. They are all imitations whose makers hope to reap a pecuniary advantage from the wonderful reputation achieved by Dr. Williams' Pink Pills. Ask your dealer for Dr. Williams' Pink Pills for Pale People and refuse all imitations and substitutes.

Dr. Williams' Pink Pills may be had of all druggists or direct by mail from Dr. Williams' Medicine Company from either address. The price at which these pills are sold makes a course of treatment comparatively inexpensive as compared with other remedies or medical treatment.

What a Letter Can Do.

B makes a road broad, turns the ear to bear, and Tom into a tomb. C makes limb climb hanged changed, a lever-clever, and transports a lover into clove. D turns a bear to beard, a crow to a crowd, and makes anger danger. E turns lower regions to flower regions. H turns eight to height. K makes him know. L transports a pear into a pearl. N turns a line into linen, a crow into crown, and makes one none. P metamorphoses lumber into plumber. Q of itself has no significance. S turns even to seven and makes hove shove, a word a sword, a pear a spear, makes slaughter of laughter and curiously changes having a hoe to having a shoe. T makes a bough bought turns here to there, alters one to tone, and transforms the phrase 'allow his own' to 'tallow his town.' W turns hose to whose makes are ware, on won; omen women no now, vie view; it makes arm warm, and turns hat into—what? Y turns fur to fury, a man into yours, to a toy, a bab to a baby, ours to yours, and a lad to a lady.

JINGLES OF HUMOR.

A Little Nonsense Gathered for Letus Reading.

Artist's wife—Why do you always paint your angels blonde?

Her husband—Because you, dear, are a brunette.

Shadblot—How do you know it to be a piece of dogwood?

Kiljordan—I knew it by its bark.

I see villany in your face, said a judge to a prisoner.

May it please your honor, said the latter that is a personal reflection.

It looks as though my marriage with Miss Mullins would have to be postponed. What's the trouble old man?

She got married to young Jobnker yesterday.

Boys, he excitedly cried as he rushed frantically among them, I tell you I had a close shave just now!

Where at? they gasped.

At my barber's, was the response.
