THE NEW RIVER SERVICE.

The Star Line Steamship Co. is going about the matter of improving the up-river service in dead earnest. They say that while the Aberdeen draws but 20 inches, the state of the river channel between Woodstock and Fredericton permitted her making last year only 20 trips. The Company has plans for a new boat, to cost \$8000, which will draw only 12 inches of water when loaded, and will therefore be able to run the whole season. They agree to put this boat on next summer if the Legislature will increase their subsidy by a small amount, and guarantee the same for five years. The matter is being talked up by the Fredericton board of trade, and will be placed before the same in Woodstock. The people in the upriver villages should take the case in hand and give all the encouragement possible.

The London Times is of the opinion that the International Commission will after all come out all right. It thinks whereas such a spirit of amity exists between the United States and Canada that it will not be difficult finally, to make an amicable treaty.
