

A Severe Disappointment.

An exceedingly clever and accomplished man in our neighbourhood, recently met with one of those severe and humiliating disappointments that are apt to sour an otherwise angelic disposition. One of the prominent members of the Agricultural Society had planned to present the Astute Professor of Butter and Cheese-making, with an address, for the services he had rendered by his lectures. (which services, are paid for by the government) Also to present him; through the proposer's daughters, with a floral offering,—as though he was some war-like hero, or operatic prima donna,—however, the executive members of the society, very properly, rejected such a piece of burlesque. Blighted hopes, withered flowers and offended vanity, is all that is left of the comedy.

"Linger longer, Loo." That's what the young man said to his girl when he wanted to go into the Bazaar. Main Street. to purchase the Glassville News.

Comparisons.

Tennyson could take a worthless sheet of paper write a poem on it and make it worth \$65,000—that's genius. Vanderbilt can write a few words on a sheet of paper and make it worth \$5,000,000—that's capital. The United States can take an ounce and a quarter of gold and stamp upon it an "eagle bird" and make it worth \$20—that's money. A mechanic can take material worth \$5 and make it into watch springs worth \$1,000—that's skill. A merchant can take an article worth 75 cents and sell it for \$1—that's business. A lady can purchase a 75 cent hat, but she prefers one that cost \$27—that's foolishness. A ditch-digger works ten hours a day and handles several tons of earth for \$3—that's labour. The editor of this paper could write a check for \$80,000,000, but it wouldn't be worth a dime—that's rough. Very.—E.e.

Buy a pair of Dongola Kid Boots Gipsy Style, at Carr's and you will be pleased.

Lost? \$700.

A considerable amount of excitement has been caused in Glassville, in connection with the Aberdeen Agricultural Society's Exhibition. On that day it is asserted that a visitor lost seven hundred dollars whilst in Glassville. We have heard a few variations of the story and may be pardoned for doubting most of them, if not all. One version is that the amount was in gold; now, as that sum in the precious metal would weigh nearly three pound we may reasonably doubt if any sane man would carry it about in the pocket of a rubber overcoat. The same amount, in the ordinary run of paper currency would form a goodly sized parcel, which could hardly be spirited away in such a short time and so mysteriously too. It has always been considered a difficult matter to "steal the brecks off a highlandman" and we hope for the credit of our little city that the money was not stolen here, if it was lost at all. Be that as it may, one man, (not an Aberdonian) is in custody, charged with stealing the money, and after magisterial inquiry we may expect something more reliable than they say so and so.

Malto-Peptonized Porter the ideal tonic and restorative for Invalids, Dyspeptics and Consumptives. Highly recommended by the Medical profession.—For sale by F. B. Thomas, Glassville.

School Meeting.

The annual school meeting for this district was held on the 11th inst., it was not very largely attended the bulk of the inhabitants seeming to be in a state of profound apathy on the subject. The education of the rising generation being a secondary consideration to that of cotsooing to one or two individuals. We hope however, for better things than befel a school district, in a neighbouring settlement, where the children attending the school used to sing, in concert:

Oh, Lord of love, look from above,
Down upon us poor scholars;
They've hired a fool, to teach the school,
And paid him seventy dollars.

"Two little girls in blue" and indeed, they looked very pretty, as they walked into the 'Bazaar' to get a copy of The Glassville News.

Celia Logan has written an article, entitled "How Some Women Began Life." We haven't read it, but will wager a bottle of Fizz that they began in the same way as most of them do—by squalling.

Dinner sets at Carr's, 100 pieces, from \$8. to \$10.

Travelling Dairy.

The Dominion Technical Educational Institution, The Travelling Dairy, paid a visit to Glassville on the 9th inst., and gave an exhibition on the newest methods of dairying. One thing new on this occasion was a practical illustration of the method of extracting the cream from milk, by the Centrifugal Separator. This is a most ingeniously constructed apparatus, made in Copenhagen, Denmark, the home of first-class butter makers; and, which by an elaborate arrangement of multiplying wheels, converts horizontal motion into a vertical motion. This secondary motion revolves a hollow sphere at the rate of 8,000 revolutions per minute; into this revolving sphere the milk is conveyed by means of a funnel; and the high speed developed, throws off the cream through one opening and the skim milk through another. These are conveyed by separate receptacles and the cream is

too well known to require any lengthy description, but may be briefly described as a chemico-mechanical operation; whereby a definite quantity of milk is mixed with an equal volume of Sulphuric acid in a graduated glass flask. The flask is then rapidly rotated in a semi-horizontal position, hot water is then added and the butter fat floats at the top; the saccharine and saline constituents, as well as the casein being destroyed by the chemical action of the acid. The churning operation by Mr. Peters did not illustrate any new method, of the way to make superior butter; but, it went far to prove he must have the proverbial patience of Job. We are of opinion that if that patient individual had but turned the crank of a Daisy churn so long, for so little purpose, he would have taken his wife's advice, to curse &c.

Oranges, Lemons, Grapes, Dates, Nuts, Choice Confectionery, Cigars, &c., &c. F. B. Thomas, Glassville.

The most singular ship in the world is the Polyphemus, of the British Navy. It is simply a long steel tube, deeply buried in the water, the deck rising only four feet above the sea. It carries no masts or sails, and is used as a ram and torpedo boat.

YOUR HEALTH!

IF YOU ARE RUN DOWN
TRY

The D.L. EMULSION

It Will Make You Eat.
Will Tone Your Nerves.
Will Make You Strong.

Will Make You Feel Like
Yourself Again.

FOR CHRONIC COUGH IT
IS ALMOST SPECIFIC.

In all Pulmonary Diseases with emaciation, as well as with spitting of blood, the effects of this remedy are very marked.

50c. AND \$1.00 PER BOTTLE.

BE SURE YOU GET THE "D. & L."

The "ABERDEEN" Store.

J. McINTOSH,

DRY GOODS MERCHANT,

GLASSVILLE, N. B.

Beg to inform his numerous customers and the public generally that he has just received the **BEST STOCK** ever seen in the Village,
Everything New, Everything Cheap.

CONSISTING OF
