Yours Respectfully,

# C. HUMPHREY TAYLOR,

HARTLAND, N. B. March 29th, 1894.

## THE GLASSVILLE NEWS,

A monthly chronicle of Local News and current events.

Published at GLASSVILLE N.B.

E. A. WELCH, EDITOR AND PROPRIETOR.

In our last issue we published a short article on Tobique Plaster, pointing out in a summary manner, some of its uses as a fertilizer. But, unfortunately it so happens that to a great many of our farmers it is almost unattainable as a commercial article at a price such as would make it a desirable or economic material for manurial purposes. We do not allude altogether to the price charged for the commodity at the place of manufacture or production, or even at the depots on the line of railway, but to the cost of carrying it to the distant farms far away from railway communication; and where it would no doubt, be largely used, only this deplorable prohibitory circumstance the heavy cost of conveyance. We will for the purpose of illustration, point out the fact, that there are twenty miles, or more east of the St. John river plenty of farms where plaster would be extensively used, and deservedly appreciated, but for difficulty experienced in procuring it.

Many of these farms are within fifteen miles of the Plaster Mines, and, a short line of railway would bring them within easy reach of the farmers in that section.

Less than a year ago, we endeavoured to point out the advantages of a line of railway connecting the Tobique Valley with the C. P. R. at Hartland, this would open up a vast extent of excellent farming land; plenty of it settled already, plenty more available for settlement, the whole distance not over thirty miles, we believe, and no Engineering difficulties in the way. A good look at the country will show that there is a very large tract of the very finest hardwood land, which by a line of railway, such as we have pointed out; would be brought into such a position as to attract settlers, and no doubt would soon be taken up; while the land already cultivated, would become enhanced in value in a ratio proportionate to its proximity to a line of traffic.

We would here point out to the Plaster Mining Company the fact, that the investment of the capital necessary to carry their products to the door of the consumer, must of necessity, lead to a greater demand for the article; and, apart from that, a line of railway such as we have mapped out, must command the carrying trade of the country through which it passes. Such an undertaking while bringing the products of the mines within the reach of the farmer, would also secure the freights, by conveying agricultural and other products to distant markets.

Mrs. Jones: "Where are you going to do your trading this summer?"

Mrs. Smith: "Why, at Carr's to be sure, I always get good satisfaction there."

To those who take an interest in the development and progress, of this part of the country; we would say: send us a subscription, and patronise your own local paper. A look through our columns will show that it is appreciated by those at a distance. Will you be less patriotic?

## HOME NEWS,

On dit, Our talented and popular politician E. S. Gillmor, Esq., is about to run for the Local, to occupy the seat so lately vacated by H. A. Connell, Esq. We have on very many occasions, heard that gentleman expound his peculiar political beliefs and think they are of a character calculated to secure a large vote, from the small land-owners and the labouring classes; to whose interest, his expressed principles are directed. Years ago, that is in our young days, such opinions as Mr. Gillmor gives utterance to would no doubt, have placed him in the same category as Feargus O'Connor, and other prominent men who were known by the name of "Chartists" but who were only patriotic politicians, "a little in advance of the times." We wait with some little anxiety the issue of Mr. Gillmor's address to the electors, that we may analyze and criticise it.

Some of our young men seem desirous of becoming acquainted with the interior walls of a penitentiary, if we may judge by some of their recent escapades. They should be made aware of the fact, that burglarising stores is a kind of amusement, not to be indulged in with impunity, and it appears that some few of our young bloods have been gratifying themselves by that pastime. For their future guidance, it may be well to inform them that they are well known, and it is only the mercy that tempers Justice, that prevents a public example being made of them. They may say it was only a lark, but they should recollect that A Paternal Government has kindly provided a cage, at Dorchester, to keep such larks in proper bounds.

The Independent Order of Foresters seem to be making great headway in the province, as well as in the Dominion and the neighbouring republic. Only a short time since they increased the amount invested with the N. B. Government from the reserve fund by \$30,000, making the sum total, invested with the provincial government, reach up to the amount of \$50,000. This speaks well for the stability of the order, and ought to lead to a very substantial increase in the membership. We hope to see an influx of members to the court already established in our own town. There can be no doubt that it is one of the best investments that can be made for providing a means to keep the wolf from the door, in case of sickness and death, both for the members, and their bereaved families.

Go to Carr's for Timothy and Clover Seed.

Business will soon be booming, let us hope, spring is coming on us with rapid stride; the genial sunshine has roused up the hibernating animals, and has had a similar effect upon the Glassville store keepers. Mr. James Love's new building has been finished, and a fine, handsome, structure it is. Now well stocked and opened for business. Mr. J. McIntosh, is off to market, and contemplates returning with a choice stock that will astonish the natives. Mr. Fitzgerald, is about to improve his business premises, having discovered a way of making boots, with leather, which will relieve the strain on the pasteboard market.

THE GREATEST MODERN HOUSEHOLD REMEDY
