THAT DEAR OLD HAT.

Dealer's in men's hats always experience a difficulty in the introduction of new styles, which is only overcome entirely about the time another new shape is coming in.

The rapid growth of Northern Illinois commenced at the conclusion of the war of 1812. The log hut of the Indians suddenly disappeared, the smoke of the wigwams no longer ascended towards the heavens.

another till the entire stock is gone through. One is too high, another too low; the brim of this too wide, of that too narrow.

He then turned to me and said, "If you had taken that one coon skin, I and my people would have had nothing to do with you, and would have driven you away like a dog; but now I have found that you are the Indian's friend, and we shall be yours."

AN INDIAN STORY.

The rapid growth of Northern Illinois commenced at the conclusion of the war of 1812. The log hut of the Indians suddenly disappeared, the smoke of the wigwams no longer ascended towards the heavens.

After exposing my goods, in all their Indian varieties, for some days without any success in selling, I became almost discouraged, and nearly concluded to give it up.

The next day he came, accompanied by his whole band. His blanket above his waist was stuffed with coon skins.

Suiting the action to the word he began to pull the skins from his blanket, and counting out twelve, held the thirteenth in his hand, and finally laid it upon the rest, exclaiming, "That's it exactly." I gave it back to him, telling him he owed me but twelve, and the Great Spirit

would not let me cheat him. We continued to pass it back and forth, each one asserting that it belonged to the other.

He then turned to me and said, "If you had taken that one coon skin, I and my people would have had nothing to do with you, and would have driven you away like a dog; but now I have found that you are the Indian's friend, and we shall be yours."

RICH SILVER DISCOVERY IN DAKOTA.

Some time ago an old prospector named Redpath found some float rock on the hills about ten miles from Deadwood city, which he thought was pure carbonate.

The ground on which the discovery was made was in a wild portion of the country that had never been prospected. There were no roads to the point, and the first crowd of treasure hunters made their way there on horseback or foot.
