condition demanded, It will find, under the signature of Mr. Johnson, a table of statistics which shows that the value of the exports from the Dominion in 1880 exceeded in value those of any other year since 1874, and the value was only exceeded in two years, viz., 1873 and 1874, since also shows a result never shown before in the Dominion statistics, viz.: an excess of exports over imports, the amount of such excess being, over total imports, \$1,421,711, and over value of goods entered for consumption, \$16,129,109. The amount of import and export Customs du.. ties collected. \$14,138,849.22, was exceeded in 1874 by \$283,-033,45, and in 1875 by \$1,222,-532.90,but in no other year since 1878. Table No. 3, aggregate trade of the Dominion, exhibits an increase in the trade with Great Britain, over that of 1879, of \$13,018,438, and a decrease in that with the United States of \$8,207,863. The trade with the British and foreign West Indies and South America during the last year amounted to\$7,562,678 and in 1879 to \$5,498,929,showing an increase in favour of last year of \$2,063,749. The trade with China and Japan shows an increase in the last year over 1879 of \$425.944, and a still larger amount over the two preceding years. These facts are official, indisputable, and significant. They prove that our export trade is in a healthy state, and that our own foreign trade is not decreasing. The figures will no doubt not be satisfactory to an organ that makes a practice of publishing false statistics without any 'remorse for the crime, or any
