Paine's Celery Compound Saves a Life after failures with other Medicines.

McMillin says: "Paine's Celery Componud Worked Miraeles for Me.

The Only Safe Medicine for Sick and Diseased People.

WELLS & RICHARDSON Co.

Gentlemen:-For over four years I have been in poor health, and received treatment from two doctors besides using seven kinds of patent medicines. I also sent to New York and got a month's treatment of a special medicine, but no good results came from it. I was run down, suffered terribly, could not rest at night, and every morning had a severe pain in my back, dizziness in my head, and vomited bitter, green matter, and had no appetite. I heard of Paine's Celery Compound and decided to give it a trial, and am happy to report that it worked wonders. The pains are all gone, I rest well at night, my appetite is good. and my health is now splendid. Paine's Celery Compound has worked miracles for me. I recommend it to all sick people as the best medicine.

ROBT. McMULLIN. Camden, N. S.

Death and Destruction.

St. Catharines, Ont., Sept. 26.—A cyclone struck this city shortly before 4 o'clock this afternoon and death and destruction followed. The regulation funnel-shaped cloud, accompanied by a water-spout, struck the city on Welland avenue and travelled from that point to the southern limit of the city. The armory of the local volunteer force was praccrashed through the roof of the collegiate institute, narrowly missing a company of students who were drilling. McHugh's cigar factory lost its roof; Packard's electric works were badly shaken up and one storage warehouse was demolished. Ratcliffe's ice house has completely disappeared. The St. Catharines House was badly wrecked. In the district extending from James street east to Queenston street the havoc was great. The storm struck Merriton, three miles from here, with terrible violence and from that place three deaths are reported

with many injured. The Lincoln Paper Mill was unroofed and badly wrecked, as was the power house of the Acetylene Gas Works. There were forty pupils in the public school which collapsed and many were

badly injured. Frank Moffatt, one of the pupils, was killed. Mrs. John Bickley was killed in front of her house, a flying piece of lumber

striking her on the head. Tonawanda, N. Y., Sept. 27th.—The tornado which wrought such terrible havoc across the border, in St. Catharines and Merriton, struck this city with terrible force at four o'clock yesterday afternoon. The amount of damage done will exceed \$100,000. Many people are homeless and several are now under the care of physicians as a result of injuries sustained during the brief visit of the wind. The injured are: John Monette, arm and leg broken, may die, Mr very low. Mrs. Charles Peters, Mrs. cials at the station. Henry Peters and the Peters baby badly bruised by flying timbers. Emma Eberle badly cut by flying glass. Mrs. Emma Lyons, seriously injured by falling glass. George Post, bruised and cut. Mrs. Fred Kruz struck on head by timber, seriously injured. Carrie Post and Charles Arenz, cut and bruised. Jacob Lyons, arm wrenched. Many others were hurt by flying timbers and

falling glass. Man Of Many Wives.

Buffalo, N. Y., Sept. 24.—Two indictments charging him with bigamy were read to Charles W. Woodruff in the Supreme Court to-day. He pleaded not guilty and was sent back to jail in default of bail. Woodruff, who is said by the police to have been fifty times married, at fifty-three years of age shows the effects of his adventurous life.

The indictments against him were

found in 1890, when in one short month he married three women. The first of these was Annie Schettner, now wedded happily. Woodruff married her at eight o'clock in the evening, and at ten made diamond rings, her watch and \$40 in money disappeared. Woodruff did not leave Buffalo, but established himself as a theatrical manager and advertised for young women who desired to go on the stage. Louisa Scott responded, and they were married within a week. He left her almost immediately, and met the woman who became his third wife in an elevator. She was Mrs. S. A. Samle, a costumer. She fell in stepping out of the elevator. He helped pick her up. introduced himself and they were married within an hour. She, too, lost her jewel-

ployed as superintendent of the baths in the Planter's Hotel. Pictures of a dozen

St. Louis women were found in his trunk when he was arrested here, and the police say he was married to several of them, but cannot now furnish the names. has checkmated England. In New York he was "Professor" C. W. Woodruff; in New Mexico he was a min- bility of a European conference upon the

of indictments which he knew were gainst him, he married Loretta Dart at Fort Erie. He deserted her, but came back again two months ago and was living quietly at a Pearl street boarding house when arrested. He believes he interview with the Minister of the Colance agaiust him in court.

ing expert; in California an engineer.

The I. C. R. Disaster.

Pictou, N. S., Sept. 29.—Wednesday's terrible disaster on the I. C. R. near Westville was even more serious than at first reported, and resulted in the death of six persons and serious injury to several others.

The dead are: Michael O'Brien, of Antigonish, driver

of special, unmarried aged 40. D. W. Henderson, his fireman, of Stellarton, married, aged about 24; son of Dan Henderson, of the railway mechanical department at Stellarton.

James Sproule, driver of the miners' train, aged about 64, married, belongs to Pictou Landing.

J. McKenzie, his fireman, married aged 35; belongs to Pictou Landing. Martin McDonald, Lyons Brook.

Martin A. Cameron, aged about 20. son of Hugh Cameron, of Scotch Hill. The injured are:

Blackmore, a miner, jaw broken in two

John W. McDonald, aged about 20, son of John McDonald, rigger, Pictou; limbs broken and bad concussion of the

skull; he will probably die. Clifford McMillan, a young man, son of Dan McMillan, I. C. R., and nephew of Rev. John McMillan, Halifax, who was en route to New York, had his leg broken and his head badly cut.

The scene at the wreck was one never to be forgotten. The two once powerful engines now in a mass of unrecognizable iron, the passenger cars in splinters, the mangled remains of the unfortunate victims lying by the wreck with knots of relations watching over them, was a sight which would make a strong man quail. The engine of the passenger special ploughed through the other engine, crashahead into the tender. Both are locked together in an indescribable mass of twisted and destroyed metal, while the rails are warped and the track torn as if by a hurricane. The destruction of property was terrible and the condition of

the dead horrible. The question is, How did the accident occur? This is hard to get at. Operator Mooney was night man at Stellarton and the working train was given correct orders by him. The operator at Westville gave his special train orders and it is reported the orders were to cross at Acadia nearly a mile this side of Westville, but whether this is true or not could not be verified. "Someone has blundered" is Augusta Hirmann, hurt internally and is all that could be got from any of the offi-

Conductor Gordon received slight injuries about the head, but was able to walk back to Stellarton to give the news of the accident. He was in the act of taking up tickets when the smash occurr-

The supposition is that the crew of the special train saw steam at the Acadia station and took it to be the steam of Gordon's special. This is a customary place for trains to cross, but it is usual for a train hand to give a signal when the working train is up the Acadia siding. This was not the case yesterday, and perhaps accounts for the accident. An I. C. R. employe told your correspondent that it was the worst accident in the history of the I. C. R., and had it occurred on any other special excursion day of the exhibition it would have been the most disastrous ever heard of in Canada.

Ten years ago last spring Engineer Sproule had a most miraculous escape of his life. His engine at an early hour was waiting at the Stellarton station. He jumped off and went into the office for an excuse to leave the house to make orders, and as soon as he got inside the some arrangements for the wedding jour- door his locomotive exploded, killing ney. At the same time the bride's two three men and considerably damaging the station house.

If she has constipation or liver trouble, her impure blood will cause pimples, blotches, skin eruptions and a wreta while in St. Louis, where he was em. 50 cents at any Drug Store.

Refused to Leave Fashoda.

Paris, Sept. 28.—The newspapers here are indulging in expressions of joy at the manner in which Major Marchand

The Eche de Paris hints at the probamatter of France's occupation of Fashoda Returning to Buffalo in 1897, in spite and says there is a feeling of overwhelming confidence that France will now be able to dictate terms. It is admitted however, that, Fashoda might be relinquished for substantial compensation.

The Gaulois this morning publishes an will be acquitted, because none of the onies, M. Trouillet, in which he is quoted three women named in the indictments as saying it is not true Major Marchand wishes the notoriety attending an appear- has been abandoned. Up to the present, the Minister added, the French Government has only heard the British version of the major's occupation of Fashoda, and no steps will be taken in the matter until the French officer's reports are re-

The Minister further remarks that no essential point had been secured in the avoidance of a collision between the French and British troops, and that it was here, and not on the Nile that the question of Fashoda and other matters hinging on it, would be settled.

London, Sept. 28.—The Cairo correspondent of the Daily Mail says: Major Marchand has admitted, in conversation, that the arrival of General Kitchener saved him from annihilation by the Derv-

London, Sept. 28.—The Daily Telegraph's Cairo correspondent says;

"It is reported that Major MacDonald has reached Lado, where he has located the Mahdi's tomb, and that the body was destroyed. An enthusiast, it is said, secured the Mahdi's head and is sending it to the Royal College of Surgeons, in Lon-

The correspondent adds that Major Marchand's position is absurd, and that the natives ignore him.

Marchand may have been at Fashoda for some time. His family received a letter from him in June last, dated Dec. 1, last year, on the banks of the Such River, in the old Bahr-el-Ghazel province of Egypt, saying that he was about to embark on the Sueh River for Abyssinia. He might easily reach Meshra-er-Rek, in the northern part of the province, early this ir, and the distance between that are and Fachoda was covered by Dr. Junker, in 1880, in twelve days.

If there is any serious controversy between England and France it is not likely to be confined to the question of the occupancy of Fashoda. The fact is that fully two years ago M. Liotard, now the Lieutenant-Governor of the upper Mobangi, or Ubanghi, as the French write the name, had already established a strong post at Tambura, in the heart of the rich Bahr-el Ghazal province; and in the same year (1896) he was joined by Marchand with fifteen or twenty whites, nine of whom were French army officers, and 500 Senegalese tirailleurs. Over this region which Lupton Bey governed for Egypt till he yielded to the Madhi, these Frenchmen have been travelling in all directions, doing a good deal of excellent exploratory work, and making sojourns in a considerable number of important river towns, with a view undoubtedly to French administrative district of the upper Mobangi, and France regards Egypt's old possession as a proper continuation of the "Hinterland" of the French Cogno. Now for the first time Egypt is in a position, as far as the natives are concerned,

### His Life Was Saved.
