TO EDITOR QUEENS COUNTY GAZETTE.

manuring" many of our practical farmers smile, but it is a positive and well known fact that large sums of money are wasted every year through improper manuring, and distinctly shows us that the correct answer to this question is of the greatest importance to Canadian farmers. In order to manure correctly and successfully, we have to keep in view the fact that all kinds of plants require phosphoric acid, nitrogen, potash, lime and magnesia.

ent from our soils, which is used for the

construction of the bone of the

animals and people of our Dominion,

our soils containing very small quantities

of this constituent. If we get a good

phosphoric manure, that is suitable to

supplement farmyard manure, and its ac-

tivity continues for three or four years

with proper use, we can get increased and

small outlay on our farms. The pro

ducts of our farms will not only be in-

creased in quantity but in quality as well.

Considering the outlook for our Canadian

products in Great Britain, does it not

stand us in hand to produce the very

best quality of farm products we can? In

the matter of creamery butter, why is it

that the Danish article has commanded a

much higher price in Great Britain than

has ours? My answer is-that in the pro-

duction of the Danish article the require-

ments of the cow were studied thorough-

forming constituents, fatty matter and

phosphoric acid. We have got to feed

our soils with good food the same as our

animals. We have got to study the re-

quirements of our soils from a practic-

al as well as scientiful standpoint, and

to practice and thereby make our soils

have the quantity but the quality as well.

Many of our farmers apply manures

and filth of various kinds, not consider-

ing why they are doing it. The butter

to an almost unlimited extent with Great

Britain if we will but study the require-

as well as the quantity.

All plants do not require these in equal proportions, but require them in different proportions, and we must see that these are in our soils and available in sufficient quantities at the time the plant is ready to assimilate them. We must not lose sight of the face that most soils contain sufficient potash, and that by growing leguminous plants-such as clover, vetches, etc., we can get our soils stocked with nitrogen from nature's unlimited store, which costs us nothing. For the complete developement of plants they re quire, as a rule, manuring with phosphoric acid. Why? Need I say, when all the higher agricultural authorities of the world agree that the most important factor in farming is to have our lands well Thomas-Phosphate can supply this desupplied with phosphoric acid for the proficiency. It is the quickest, surest, most duction of good harvests. The yield o productive aud most lasting phosphatic our crops is in proportion to the amount manure known to practical agriculturists of phosphoric acid applied. All lands throughout the world to-day. It perthat are (in a sense) sour in character and manently improves our land at a trifling not producing as they should will have to cost; it replaces the phosphoric acid (the have phosphoric acid added to tone them most important element in all plant up and bring them to their height of progrowth); it surpasses all other phosphoric duction. manures and carries our crops through to The reason I particularly mention phossatisfactory termination. Thus Thomas phoric acid more than any of the other Phosphate combines cheapness and efficielements that are essential to good harency, and furnishes the means of obtainvests is that all crops require and remove ing larger and better crops at a trifling considerable quantities of this constitu-

Ridgetown, Ont., Dec. 1st., 1898.

Shannon Settlment.

Dec. 5.—The people of this place have secured the services of the Rev. David Patterson as their pastor for the coming satisfactory returns for a comparatively year.

Much credit is due the young ladies of this place for the interest they have taken in procuring the means for repairing and getting furniture for the church. We are sorry to report that Mr. H. McCready is growing worse, that dread disease cancer, is the cause of his sickness. Messrs. Alex Webster and Harry Mc-Kay have gone with a crew of men to commence lumber operation in Kars.

There is a young man at Mr. Geo. B. Jones, Kars, who has been ill for some time and who has not tasted food for ly, so that she might produce the quality | fifty-three days, except some drink.

Mr. Manfred I. Jones came from St John to Hampton on the 3rd inst, and We have got to consider this matter in walked from Hampton to Shannon in all branches of farming. We have got to two hours and a half. What is the matfeed the animals on our farm the very ter with that? best of food, food that is rich in flesh

Mr. L. H. Huggard our much respected teacher for the past three terms, is going to leave for Carleton county, the first of next term. He will be very much missed in the place.

Mr. Whitfield Jones, son of Mr. J. A after we have so done, put our ideas in- Jones, has returned home.

Mr. Geo. Lunn, is the guest of Mr. J produce to their utmost and not only A. Jones.

> The many friends of Mr. A. M. Mc-Crea will be glad to hear that he is able to be out again.

Mr. and Mrs. Frank McDonald were trade of our Dominion can be developed | the guests of Mr. and Mrs. A. E. Smith, on Sunday, 4th inst.

We are glad to say that Miss Mamie McCready is able to be around again.

dermist having very skilfully succeeded Mrs. John McKay had the misfortune to fall last week. She was hurt very badin mounting a doe which was shot by her ly and is now under the skilful treatment brother William. of Dr. Camp.

Miss Sophia Chase of Gagetown has come to spend the winter with C. U. Lunn.

Mr James Niles moved to French Lake ly all left for the lumber woods. last week.

Remarkable Rescue.

Mrs. Michael Curtain, Plainfield, Ill. makes the statement that she caught cold, which settled on her lungs; she was treated for a month by her family physician, but grew worse. He told her she dent, who leaves a sorrowing widow, four was a hopeless victim of consumption and that no medicine could cure her. Her extend our sympathy. He died at the residence of his son, Mr. Lemuel Estey, druggist suggested Dr. King's New Discovery for Consumption; she bought a bottle and to her delight found herself benefitted from first dose. She continued its use and after taking six bottles, found herself sound and well; now does her own housework, and is as well as she

ever was. Sold by all Druggists, large bottles 50 cents and \$1.00.

Salmon Bay.

Winter has come, but the weather is very mild for this time of year, and every body is on the move as much as possible though about all that one can do is to move for the roads are in bad condition with mud.

A couple of coonies thought they would have a Christmas dinner and went accordingly and helped themselves to 12 or 15 chickens out of Mr. Geo. Crawford's hen coop, but they came once too often and were captured themselves.

One of our young girls made a dress for a girl in thirty five minutes. Who can beat that?

Elden Brown of Salmon River spent Friday with friends at the Bay.

John Hasson of Chipman was at the Bay on Monday, hiring men for the wocds.

Queens county can come up with other places. Mr. A Crawford has a cabbage that is as large as a pail. Hon. Mr. Blair says that the province and Canada are prosperous, and no wonder when potatoes are beginning to grow in young men's pockets. A young lady in harvest time, gave a young man a potato as a charm for a bone attack. His mother while brushing his clothes the other day found the potato in his pocket. It had grown four more potatoes and there was prospects for more. This is no fish story as his mother has the pota-Mrs. A. Crawford picked a bunch of

Outfit free. Address, F. T. Barber, Sec'y., Star Insurance Bldg., Chicago.

ments of the dairy. The Canadian apple trade can be largely increased with Great Britain if we but study the requirements of the orchard. We must not lose sight of the fact that apple trees have requirements that have to be attended to in order to make them produce the best fruit. They need to be fed with proper food, and one of the principal elements necessary for this is phosphoric acid, in which most of our soils is deficient. This is essential to produce the quality, color, flavor, fineness of grain and size. This applies to all kinds of fruit. The caring for fruit trees and the fertilizing of them cannot be carried on in a careless way. acid to insure a good harvest.

with Great Britain in poultry. At present the bulk of the poultry comes from France and Ireland to supply the English market. Why not divert this trade to this Canada of ours? It is the same in adopt a proper system of feeding and preparing the poultry for market They require food rich in flesh forming constituents and fatty matter.

We most of us consider our farm-yard frightened two soon this fall, as there has manure the principal manure. It contains phosphoric acid potash and nitrogen. ning as yet, it looks more like April than They act mechanically, I may say, distributing the elements or properties equally | free from ice as it is. and gradually, and at the same time produce humus in our soil. We find farm yard manures containing the constituents necessary to plant growth present in minute quantities, but not in such proportions as required by the plants. I do not wish to underestimate the value of farmyard manures in any way, or without seeking to do so displace it from the Cook's. Sold by all country dealers, 25 been secured for the ensuing term but sevposition of the principal manure, but I do | cents. Don't have any other.

Dec. 2.-The tug Mildred went up by here yesterday afternoon towing three woodboats.

George L. Slipp, of St. John, came up on her and got out here last night when she was on her way back, he intends spending the winter here.
