Orchard and Garden.

Too much water for plants is often as detrimental as too little.

The soil for trees should be good and free from stagnant water.

Plant orchard and other fruits on uplands and not in wet valleys.

Late pruning of grapes is objectionable on account of the vines bleeding.

Do not try to plant until the soil will work easily into good condition.

Water never should be allowed to stand round evergreens and fruit trees.

In dwarfing trees there must be a certain dissimilarity between scion and stock.

Apple trees a year old, if properly grown, are usually the right size for grafting.

Cutting of currants and gooseberries should be planted out as early as possible now.

When black knot attacks the small limbs, the best plan is to cut off and burn them.

Parsnip For Cows.

There is no better root for cows than the parsnip, says the Cultivator. It has the advantage that part of the crop may if need be, be wintered in the ground where it has grown.

First, procure good seed from a reliable dealer. Next, fill a shallow pan or box about half full of fresh cow-manure, then add good light soil to the depth of an inch and a half.

My Pansy Bed. There are so many who have difficulty in raising pansies, that they might like a few suggestions from me, as mine never refuse to grow and I always have an abundance of fine, large blossoms.

How To Grow Annuals. The annual flowers of the seedmen are those which give their best bloom in the very year in which the seeds are sown. The true annuals are those plants which complete their entire life cycle in one season.

SHAMOKIN, Pa., May 12.—Four men were instantly killed to-day by a slide of a portion of a bank at Centralia. Five others are missing and are probably dead.

A Sketch on Indians. I have the pleasure of saying that the Indians are somewhat quieter than they were a few weeks ago.

COOK'S SURE COUGH CURE. We will send to any address from now to the end of year 1899, the Toronto Weekly Globe—the leading Liberal paper in Canada—and the QUEENS COUNTY GAZETTE for the small sum of \$1.25.

THAT JOB OF PRINTING. You may need soon can be neatly and promptly executed at the office QUEENS COUNTY GAZETTE. Good Type Plenty of It, and Skilled Workmen to handle It!

very fine rose spout and is welded by very careful hands, so as not to wash out the seed. Most seeds that are sown out of doors come up too quickly and need to be transplanted or pricked out.

Household Hints.

In making up unbleached muslin allow an inch to the yard for shrinkage.

Moths dislike the printing ink on newspapers, so woollen goods, furs, etc., should be enveloped in them when put away for the summer.

Lemons can be kept a considerable length of time—a couple of months even—in dry sawdust or sand. The sawdust must be inodorous.

Sprinkle salt immediately over any spot where something has boiled over on the stove, and the place may be more easily cleansed. This also counteracts the bad odor.

Hanging carpets on a line and beating them is declared by the economical to shorten their period of usefulness more than a month of ordinary wear.

Onion Peeling for Nests.

One of the best materials for making hens' nests is the outside peel of onions. It will drive away if it does not destroy hen lice. These peelings, or a piece of the onion itself, ought to be always in nests where hens are sitting on eggs.

The warmth of the hen's body will so scent her feathers that the lice will be glad to clear out, and the hen will be equally glad to have them do so.

The Woodpecker Man's Ally.

One of the birds which winters in our northern climate is the woodpecker, which finds its favorite food as easily in cold weather as in warm.

TO CONSUMPTIVES. The undersigned having been restored to health by simple means, after suffering for several years with a severe lung affection, and that dread disease Consumption, is anxious to make known to his fellow sufferers the means of cure.

REV. EDWARD A. WILSON, 33-1yr. Brooklyn, New York.

Coal Mine Accident.
