

EXPERT TYPEWRITERS ARE SCARCE ARTICLES.

The Stenographer who is Thoroughly Proficient can Obtain an Excellent Salary, and Need Never Lack Steady Employment—Qualifications Necessary to Success.

(From the New York Sun.) The supply of expert typewriters and stenographers falls far short of the demand. Yet expert stenographers and typewriters can easily command salaries of from \$20 to \$50 a week, so wonderfully has this kind of work broadened since the pretty typewriter of ten or fifteen years ago stepped into business offices and ousted men clerks in the same line. The work has gradually taken the place of the teacher's position, which used to be the goal of many a girl. Commercial schools are filled with pupils in stenography and typewriting, while in some offices apprentice girls pay as much as \$250 for the privilege of learning the technicalities of the trade. But, as in so many other fields of labor, the great complaint of inefficient work goes up from the downtown offices and the uptown shops. Great corporations, banks, large estate and business interests are unable to get first class workers in this field.

The trouble seems to be that the expert stenographer, as soon as she attains a position commanding a large salary, at once aspires to have her own office and employ girl clerks. Within the last ten years hundreds of these offices have sprung up throughout the city and each seems to prosper. A meeting of financiers took place in a Fifth avenue hotel a week or two ago and the services of an expert stenographer were required. The hotel stenographer was not deemed competent for the task, and a telephone message was sent to the office of one of the largest of the typewriting manufacturing concerns. The name of a young woman whose office is in the neighborhood of Fifth avenue was sent over the telephone to the waiting pillions, but when the young woman was told that she would be required to leave her own office she answered that it would be impossible, as she had to attend to her own work.

She was offered her so large that it caused her to accept. She had carte blanche as to bringing her own machines and assistant if necessary. A cab was sent for her, and in an hour she was installed in one of the state apartments taking rapid notes. She was not the typically beautiful and blonde-haired stenographer of fiction, but a very businesslike and plainly gowned girl, who

MANY HAKE ARE SALTED.

More Have Been Sent From Portland This Year Than For a Long Time.

Portland, Me., Nov. 11.—Hake, hundreds of them, thousands of them, have been salted in Portland during the present fall and shipped to other cities. The exact number is unknown, of course, but it has been said by those who have kept track of the business to be in excess of that of last fall and ahead of any other year for a long time.

Hake have been unusually plentiful this season, and their prevalence has made them unmarketable when fresh, so they have been salted and shipped away. It is estimated that fully 3,000,000 pounds of hake have been landed in this city since they began to school off the Cape two months ago and a large quantity of these have been salted.

Hake which are scarce, are as good market fish as either cod or haddock but when they are plentiful, the price on them is comparatively insignificant and so they have not been bringing much money. The only thing to be done by local dealers was to buy and salt and then wait for a market, which has come along and the fish are being shipped now in large quantities.

But for all hake have been so plentiful, they are now beginning to drop off and fewer of them are being caught. Haddock and cod still remain scarce and are bringing good prices.

THE SLOCUM DISASTER.

The last of the awful Slocum disaster has been heard from when on Thursday a report was made to the mayor as to the distribution of the funds for the relief of the sufferers. The total contributions amounted to \$124,000, and nearly all of it has been expended. The remaining \$20,000 has been set aside for the future needs of those who were made to some extent dependent by the disaster. The list of dead in this report has been placed at 958, of which 879 were identified. One hundred and twenty men lost their entire families. The committee buried 705 bodies belonging to 388 families, the average cost of each funeral being \$115. The minimum was \$16 and the maximum \$331.

Are All Women Pretty?

Quite an unnecessary question, because so many women have such poor complexions. We want to tell all women with pale sallow cheeks about Ferreroze, which quickly imparts fine color and gives the skin a clear, rich appearance. It's pure blood that makes fine complexions, so by producing lots of vitalizing blood, building up the debilitated system, increasing the circulation Ferreroze quickly brings the glow of health to faded cheeks. It's no trouble at all to beautify your looks—simply use Ferreroze. Try it. Price 50c. at druggists.

Be Ready For Croup

AND PROTECT YOUR CHILDREN BY KEEPING IN THE HOUSE

Dr. Chase's Syrup of Linseed

AND Turpentine

THE THOROUGHLY TESTED AND RELIABLE FAMILY MEDICINE.

To overcome croup you must act quickly.

There is usually no time allowed for sending for doctors or medicines. The holes are croupy cough at midnight may be your first warning, and this will strike terror to your heart if you are not prepared to fight this disease.

It may be of little use to know that Dr. Chase's Syrup of Linseed and Turpentine is a positive cure for croup if it is to be obtained at the critical time.

Most persons who have tested this treatment for croup keep a bottle at hand, so that by prompt action they can prevent the disease from reaching a serious stage.

Dr. Chase's Syrup of Linseed and Turpentine is composed of simple ingredients of unquestioned curative power, is pleasant to the taste, well liked by children, and can be used with perfect safety by old and young, so long as directions are followed.

MRS. GEORGE BROWN, 71 Harbord street, Toronto, writes: "Our children have been very subject to croup, and we have found that Dr. Chase's Syrup of Linseed and Turpentine has always brought quick relief. By using it at the first sign of trouble the disease is checked at once. We always keep this remedy in the house, and, in fact, feel that we could not do without it. We also use it for coughs and colds with excellent results, and recommend it to our friends."

Dr. Chase's Syrup of Linseed and Turpentine, 25 cents a bottle; family size, three times as much, 60 cents, at all dealers or Edmanson, Bates & Co., Toronto. To protect you against imitations, the portrait and signature of Dr. A. W. Chase, the famous receipt book author, are on every box!

ANCIENT MEDICAL ADVICE.

More than 1,000 years ago, Rhazes, an Arabian physician, gave his advice to his patients with reference to the selection of a physician. Study carefully the antecedents of the man to whose care you propose to confide all you have most dear in the world, that is, your life and the lives of your wife and children. If the man is dissipated, is given to frivolous pleasures, cultivates with too much zeal the arts foreign to his profession, still more so if he be addicted to wine and debauchery, refrain from committing into such hands lives so precious.

A NEW IDEA

Tonic Treatment for Indigestion—New Strength for the Stomach from New, Rich Red Blood

The Tonic Treatment—that is the latest and only scientific cure for indigestion. All the leading doctors of Europe and America are using it with sensational success. No more purgatives, no more long diet, no more peeps, no more parents' foods, no more long diets, lists saying "Thou shalt not eat this or that." No more of all this—nothing, in fact, but plenty of new, pure, rich red blood to tone the liver and give the stomach strength for its work. That is the Tonic Treatment, for Indigestion.

The Tonic Treatment is based on the new idea that drugs which digest the food for the stomach really weaken its powers through disuse. The digestive organs can never do their work properly until they are strong enough to do it for themselves. The only thing that can give the stomach and the liver new strength is good blood—and the only thing that can actually make new blood is Dr. Williams' Pink Pills for Pale People. They have long been known as the greatest blood-building tonic in the world, and all the highest medical authorities agree that the one scientific cure for indigestion is the Tonic Treatment. The marvellous success of the treatment has been proved in every corner of the Dominion. One of the latest witnesses is Mr. Joseph Rochette, St. Jerome, Que., who says: "I simply hated the thought of food. Of course I had to force myself to eat, but afterwards I always suffered with dull heavy pains in the stomach. I seemed to be bilious as well and this caused severe headaches, which further aggravated my unfortunate position. I began to grow pale, fell away in weight and the trouble seemed to be undermining my whole constitution. I tried several remedies, but without success; a doctor whom I consulted advised absolute rest, but this was out of the question as I had to work for my living. Fortunately for me, one of my friends advised me to use Dr. Williams' Pink Pills, and I decided to do so. After taking the pills for several weeks there was a decided improvement in my condition. Not only was my digestion better, but my general health improved in every way. New blood seemed to be coursing through my veins, bringing new health and strength every day. I took eight boxes of Dr. Williams' Pink Pills altogether, and those who see me now would never know I had seen an unwell day in my life. I owe my splendid health to those pills and strongly advise every dyspeptic or weak person to lose no time in taking them."

Mr. Rochette's statement is a strong tribute to the Tonic Treatment. Dr. Williams' Pink Pills cured him because they actually made new rich blood for him. These pills go right down to the root of the trouble in the blood and cure that. The new blood they make carries healing health and strength to every part of the body. That is the new Tonic Treatment, and the highest medical authorities now recommend this treatment for all the common ailments such as anæmia, headaches, rheumatism, sciatica, neuralgia, nervousness, dyspepsia and general weakness. These are all caused by bad blood and therefore are all cured by Dr. Williams' Pink Pills. You can get these pills from any medicine dealer or by mail at 50c. a box, or six boxes for \$2.50 by writing to the Dr. Williams' Medicine Co., Brockville, Ont.

CHATHAM. Matthew Lynch Still Missing—A Wedding—Personal Notes. Chatham, Nov. 11.—The marriage of Miss Catherine, daughter of Alexander McIntyre to David Cameron, took place in St. John's Manse on Wednesday evening. The bride was attired in a stylish suit of brown broadcloth and brown hat. She was unattended. After the ceremony, which was performed by Rev. J. Morris MacLean, the bride and groom drove to the home of the bride's parents, where supper was served. Mr. and Mrs. Cameron will reside on Wellington St. They have the best wishes of many friends for happiness and prosperity. The woods have been searched, ponds dragged, and river, near the wharves grappled, but no trace of Matthew Lynch, who has been missing since election day, has been found. F. E. Winslow, who has been the guest of his son, Warren C. Winslow for the last week, is seriously ill. The "Buds of Promise" Mission Band gave a very enjoyable entertainment in St. Luke's basement this evening. There was a good programme consisting of drills, music, vocal and instrumental, and recitations. A very large number attended. A. C. Leishman has returned from Tracadie, where he has been employed all summer by the American Lumber Co. Thomas Lawler went this week to Halifax, where he expects to remain for some weeks. Michael Porter returned last night from a trip to Boston. Miss Mollie Gilvan, of Bathurst, is visiting Miss Belle Hutchison. Miss Frances Snowball is visiting friends in Fredericton.

HARCOURT NEWS. Harcourt, Nov. 11.—The "Mother's Magazine," Volume 1, number 1, edited by Miss Marion Wathen of Harcourt, appeared this week. It was planned to begin last month, but could not be prepared in time. It is a good-sized 24-page paper covered magazine with Kindergarten, Sabbath school and general educational departments. Messrs. Ezra and Gilbert Keswick, with four horses will leave for St. Francis River, Maine, for the winter's lumbering operations, on the 14th instant. Miss Pearl Rush returned from Maine this week.

A NEW TAN

Police Discover Another Rendezvous For Bad Boys.

(The Daily Telegraph.) The boy problem, which agitated the city at the time of the Doherty gang and consequent "tanyard gang" revelations, may well be taken up again, judging from developments of the past few days. Located in a vacant lot of George street there was, up till a day or two ago, a "club house," which was the rendezvous of a crowd of boys whose ages ran from ten to fourteen as years go, but who, if judged by their knowledge of the seamy side of the world, must be classed as well into manhood. The club house is no more just now—certain revelations in the police court led to its being torn down—but the gang are still in the neighborhood and it may well be supposed they will have another place before long. All summer they spent their time in a rudely constructed shack built on the site of the old Fowler factory. Last week the place was struck rough but their ideas becoming broadened, probably as members increased, they put up a more pretentious affair, and decorated it with two flags flying above the roof. Here they gathered and played cards, smoked cigarettes and, doubtless, read lurid tales of detective life and the bad men of the frontier days—in fact, shaped a fairly straight course towards a life whose chief features would be working evil to fellow men and dodging the police. The cigarette was a great thing in this crowd of aged juveniles, in fact they say the east-away "butt" secured by the process known as "snipping," is as sweet and fragrant to them as the costly Havana to the man who can buy that brand of cigar. Last week one of the crowd was up in the police court on charge of hitting a Jewish lad with a stone. The developments in court drew public attention to the existence of the club house and, on orders of some one in authority, the shack was pulled down this week. Not only was this a day meeting place for these boys who should be at school, but night beats the streets when they would be at home. Instead, they congregated in this place and it may be imagined that they were not studying Sunday school lessons. Some say a light was seen there as late as 2 o'clock in the morning, and there is also a story that boys were not the only ones who knew what the interior of the den looked like; that actually bits of girls, who no excuse should bring out of their homes alone after night, had been there.

That the club house is destroyed does not mean that the crowd is broken up, but the fact that this gang exists is good evidence in support of the remarks heard from the police court bench of late. There's too much street walking in St. John's, too many young girls on the streets every night, up and down, ready to listen to the insinuating, often obscene, talk of a crowd of growing boys who accost them as they pass or follow them along the streets. It is not pleasant to realize that these are facts, but they are, and if the young boys and girls were at home they would be better off and there would be fewer criminals of the future. Cigarette smoking has also been given some attention in the court of late, but still you'll see youngsters puffing away on the streets with all the assurance of a man. The city was shocked by the tanyard gang revelations; robbery, and finally murder had been done from within that circle of bearded youths; the outcry was raised that this must not be, the boy of the present must be cared for so that he would become the good citizen of the future. But it died down again and matters have been drifting as of old. Perhaps the George street rendezvous and the fact of its existence should at least do something towards stopping the night street walking and keeping boys and girls in their homes.

MEDICINES LOADED WITH ALCOHOL

Think of it! The Danger You Run—Drink Habit is Easily Acquired, but Hard to Cure.

Careful analysis shows that many so-called "tonics" contain little else but whiskey—the rankest, poorest kind of whiskey. You may unconsciously be using an alcoholic liquid remedy. Some member of your family may be doing so. Your duty is plain; stop it at once. The test of a tonic is the permanency of its cure. To become strong, you must build up the blood—alcohol weakens it. You must increase your nerve force—alcohol steadily depletes it. Give up the liquid tonic before you become its slave. The true medicine for the run-down, depressed and nervous is Ferreroze. It is nothing but concentrated cure in tablet form. It stimulates the appetite, aids digestion, fills the blood with iron, builds up in nature's way. Never known to fail. Whether weak from worry, overwork, thin blood or ill-nourished nerves, Ferreroze will quickly make you well. It is safe and harmless, undoubtedly the best tonic and rebuilding medicine made. We recommend you to use Ferreroze if in poor health. Ferreroze, known as the great food tonic, costs 50c. per box, or six boxes for \$2.50, at all dealers, or by mail from N. C. Polson & Co., Kingston, Ont., and Hartford, Conn., U. S. A.

ABOUT NEWFOUNDLAND.

The American who happens into Newfoundland will find innumerable causes for interest and surprise. The interior of the island is a wilderness primitive and practically unexplored. A quaint, slow uncertain railway traverses the heart of the island, but for 70 miles of travel over mountains, through dense forests and by the margins of salt water bays and estuaries not a town is to be seen. Herds of caribou, as tame as barnyard cattle, stand staring at the passing train. From the bosom of the lake and river trout and salmon are forever leaping. Brant, geese, wild ducks, grouse, and many wild birds that migrate hither in the summer can be found all over the island. Here they mate and breed and their goslings and chicks make the woods and waters vocal all summer long. Newfoundland, like Ireland, is innocent of snakes or reptiles.

THE PRICE OF SPORT.

(Maine Farmer.) Did you ever stop to think how dearly we pay for our protected game? Some-how the estimate on a human life is not what it ought to be, for the accidental shooting which commences with the open season attracts only passing comment. The State fosters the love of sport by its policy and the game department strengthens this in every way by its frequent press comments, and the danger of the sport is kept in the background. Perhaps no responsibility attaches anywhere but the result is none the less stark when the value of a human life is considered.

NO ARGUMENT NEEDED.

Every Sufferer from Catarrh Knows that Salves, Lotions, Washes, Sprays and Douches do not Cure.

COL EDGARTON ON THE RUSSIAN VICTORY.

"This successful engagement of the Russian fleet with the English fishing boats," remarked Colonel Abner Edgarton, the Ariztonian mining man, "reminds me of an old Bostonian of mine, Mike McGowan, the Man Eater. Mike came to Bodie with a tombstone reputation and lived on it for a year. Everybody was afraid of him, and he could have anything he asked for, including meals at the restaurants, drinks at the saloons and even an occasional handful of chips from the faro bar and a few dollars from the roulette table. "But one night he picked up the bet of a miner who didn't know who he was, and down he went on the floor. In an instant he was on his feet with his gun out, but the miner grabbed it away from him and put a bullet through his shoulder. "That laid Mike up for a month, and he looked mighty pale when he emerged from his room. It didn't make him feel any better, for all that, his prestige had been impaired, and that fact on his old free route weren't as glibly cheerful as they used to be. It was plain to him that in order to recover his position as a terror he had to make a demonstration. So when he was passing by the counter of Johnny Young's restaurant, the Cafe de Paris, with out paying as usual, he stopped and said, with a cold scowl: "What's the matter with your face, Mr. Hash?" "Nothin'," replied Young, pretty white outside, but redhot within. "Nothing, except that it isn't as hard as your cheek, Mr. Bluff." "Over the counter he came, too, and out flew Mike through the door, and first taking the glass with him. Before he could get to the door, however, he saw Young had got into action and put a ball through his other shoulder. "That meant another month in bed for McGowan, and on his recovery no body was afraid to take a shot at him. And he had no luck at all in his return fire. Twice more he was winged, and he became the most discouraged bad man that ever prowled and lowered about a mining camp. He wasn't a coward, you understand, but misfortune had broken his nerve. There was nothing left for him to do but go to work, which he did around the hoisting works of the standard as a sweeper and general roundabout. "That late Man Eater, gentlemen," pursued the colonel, "was game at

BIG PROFIT IN FEATHERS.

California Ostrich Farms Are Paying Large Dividends Now.

(From the Pomona Cal. Review.) After twenty-odd years of constant financial loss in ostrich farming and the swallowing up of several Englishmen's fortunes of \$200,000 and \$250,000 each the industry has become one of the most profitable in this region. The South Pasadena ostrich farm, which used to be a loser by about \$15,000 a year, has become a money-maker. Its owner, Edgarton, formerly of England, cleared over \$45,000 during the year ended Sept. 1.

Most people have an idea that an ostrich is plucked of its plumage by holding the giant bird down with straps and ropes, while an attendant pulls the feathers indiscriminately from the bird's back and wings. But harvesting ostrich feathers is a scientific operation. It demands expert pluckers and care lest birds costing from \$500 to \$1,000 be ruined for wealth production. When a plume is ready for its plucking it is known as ripe. The ostrich expert goes over the flock, carefully selecting from it birds whose feathers show that the ripening of the plumes has set in. Then the birds are separated into flocks of twelve and confined in a pen with little enclosures, where they may not run about and damage their valuable plumage. When all is ready for the season of feather plucking each ostrich is cajoled by a basket of food held before it out of the enclosure with its mate into a narrow passageway built of heavy boards. Front and rear gates are closed and the great bird is a prisoner between walls of planks that reach to its back and where there is no room for it to move in any direction. A cloth bag is thrown over the ostrich's head and the creature is fast in the coils of the feather harvester.

About half an hour is spent in plucking each ostrich. There are three men in each plucking crew. They stand upon a platform outside the pen where the ostrich is held fast, and with a dozen odd-shaped scissors and appliances for stanching blood that may flow from the bird's torn flesh work diligently. Care is taken to leave enough feathers to protect the smaller feathers, which will grow into plumes by the next plucking. In the early days of ostrich farming in southern California little attention was given to these details, and in consequence many birds died. Most of the tail feathers are pulled, not cut off, because they reproduce better than on other parts of the ostrich, and because they are so short that the extra inch or two gained by not snipping the feather is a matter of several dollars more profit. Each plume when cut or pulled is laid in a clean box.

While the feather harvest is proceeding the ostrich keeps up an incessant low roaring, and but for the tightness of the pen it would kick the plank boards into slivers. At last when the pluckers have done, the gates are opened and the bird rushes out into the enclosure to join its mates. Then another ostrich is cajoled into the narrow pen, and the gathering of other feathers goes on. The plumage of the older birds is denominated second-class in the markets. The older ostriches are kept largely for breeding purposes. A few ostriches in southern California are more than thirty years old, and there are records of Nubian ostriches

that have lived seventy and more years. Ostrich farming is unusually prosperous these days. All the southern California ostrich farms that were losing money steadily a few years ago, have doubled and tripled their number of ostriches and increased their land holdings. Some \$700,000 is now invested in ostrich farming in this region, and the annual output of feathers has grown to be over \$100,000. The success of California ostrich farming has come largely from an invention of an ostrich incubator by a young woman in 1894. In ostrich domestic economy the male sits upon the nest of eggs laid in the sand, occasionally relieved by the female. In the hot Nubian ostrich farms, where the birds flock together, the sister has so much to distract it from the nest that the eggs are frequently allowed to get cold at night. Therefore a whole annual setting has often been lost. The incubators have remedied this, and now the percentage of loss by infertile eggs is less than ten per cent.

The best ostriches for plumes come from Nubia. The California farms now have a new homebred ostrich that it is believed will be the finest plume producer ever known. A WORD TO THE WISE. A hopeful young actor in an English company, having a chance to appear in the leading role through the illness of the principal actor, telegraphed to every one he knew about his opportunity. He wanted them to witness his triumph. The Russian actor, alone of the authors and playwrights, paid an attention to his despatch. "I shall play A's part tonight," Mr. Barrie answered. "Thanks for the warning."

DILATION OF THE STOMACH

The gravity of enlargement of the stomach cannot be overestimated. One of the principal causes that produce this distressed condition is indolent eating and drinking. Weakness of the muscles that propel the food to the intestine is also a factor in allowing food to accumulate in the stomach, and thus stretching it to enormous size. Constipation and inactivity of the liver is also a prominent cause. In cases where the stomach is held fast, tongue, thirst, loss of appetite, emaciation, oppression at the pit of the stomach, belching of flat gas and vomiting of sour liquid, varying in amount. Weakness, paleness and want of energy are usually present.

Now, to overcome this distressing and dangerous enlargement of the stomach and all its symptoms, take Smith's Pile and Butternut Pills today. They will give tone to the weak propelling muscles of the stomach and intestines. They produce a natural movement of the contents of the bowels and avoid the formation of gas, which if retained produces symptoms of self-poisoning. Food long retained in the stomach and matter in the bowels show all the signs of putrefaction, when examined after the stomach pump is used, viz: sour odor, bacteria, yeast, saccharine and organic acids, which are deleterious to the entire system.

Smith's Pile and Butternut Pills cure constipation as if by magic. They regulate the functions of the liver, cleanse the poisons from the blood, remove the bilious elements from the circulation and induce a healthy state of the eyes are douched without an appreciable cost. If you have specks and floating objects before your eyes, use Smith's Pile and Butternut Pills and get the poisonous elements out of your blood. Remember, they always cure sick headache, constipation and biliousness in one night. 25 cents, all dealers.

SMITH'S BUCHU

A POSITIVE CURE FOR RHEUMATISM AND ALL FORMS OF KIDNEY AND BLADDER ILLS. AT ALL DRUGGISTS—25 CENTS—A CURE AT THE PEOPLE'S PRICE.

EXPLOSION OF A BOMB.

Exploded in the Street of St. John's.

A bomb exploded in the street of St. John's, N. B., on Saturday afternoon, Nov. 11, 1904. The explosion was caused by a bomb thrown by a man who was arrested on the spot. The man was identified as James J. O'Connell, a well-known character in the city. He was charged with the possession of a dangerous weapon and was held in custody.

The explosion occurred in the vicinity of the St. John's Hotel. The bomb was thrown from a building across the street and exploded in the middle of the road. The explosion was heard throughout the city and caused considerable damage to property in the immediate vicinity. No one was injured in the explosion.

The man who was arrested on the spot was James J. O'Connell, a well-known character in the city. He was charged with the possession of a dangerous weapon and was held in custody. The police are conducting a thorough investigation into the matter and are expected to make further arrests in the near future.
