The admiral could give his orders ful and most unsatisfactory manner, quickly to the ships of his fleet and without fear of their being read by any hostile or passing vessel.

The attempt at ambidexterity has been a lifelong obstacle to him in his professional progress.

Soldier K. Suzuki in one of his letters to his home mentions a most professional progress.

and enquiries.

ABOUT LADY CURZON.

women of two Continents. She is for the life beyond. It is rare, how chords of a very effective and comtall, with classical features, and ever, that vindictive loyalty rends plicated kind. This syrinx lies in smooth black hair, which she dresses the air which anger and sarcasm, as the lower part of the windpipe and mine smooth black hair, which she dresses the air which anger and sarcasm, as the lower part of the windpipe and mine smooth black hair, which she dresses the air which smooth black hair, which she dresses in the air with anger and sarcasm, as the lower part of the windpipe and in the plainest of Madonna-like bands. Her appearance is at once dignified and most picturesque. When Miss Mary Leiter, she was recognised as one of the hardsometric time and a many interesting border skirmishes between Candidans and details of structure in a some of the hardsometric time. as one of the handsomest girls in adians and Americans:-American Society, and was styled "The Belle of Three Cities"—Newport, New York, and Washington. Lady Curzon dresses to perfection and patronizes the dressmakers of both London and Paris. Like many of her compatriots, she is a rich wonan, and recently inherited a fortune of about half a million. And like several well-known women, Lady Curton began her married life with a succession of daughters, the youngest—Alexandra Naidera, a goddaughter of the Queen—being only six months old.

Hon. James Hume, Esq., M. D.

the outside."

Thousands of years ago there lived a beautiful princess; she was the most beautiful princess that ever liv-

A PRETTY TALE.

Outshines Marconi's Sometimes a youth would see this castle in a cloud which looked as if it sat right on top of a mountain, and so he would climb to the top of the mountain, but when he got there his great disappointment would be to see this wonderful castle sailing off,

A plain mirror is arranged to resure that she was taken to the Progressurprised to find a young man in her sive party in the Japanese parliament, in circuit with an ordinary before on one of her golden ment, to the bankers of Tokio. The

young man's name) saw this hand- No rosy mist was spread-facts were Use of the Mirror.

Use of the Mirror.

The mirror, which serves as a teleberg displaced in the feet and begged her to become

light.

These changes in the beam of light affect the selenium in the receiver, and so the message finds its way

LEFT HANDED CHILDREN.

I have never seen anything but bad station, a distance of four and a results from the attempt to train third miles. Though the mirror was small and the light imperfect, the small and the light imperfect, the stead of the left when there is a demessage was distinctly understood. Stead of the left when there is a demessage was distinctly understood. handed. Moreover, the attempt is never successful.

There are three, at any and indecisions during the entire submessages can be transmitted is limited. Sanguine investigators assert, however, that it will be effective for a distance of a hundred and fifty miles.

The installation af wireless telephones on the ships of the navy would, one would think, be of the greatest value, especially at night. Absolute secrecy would be insured, and that, in conjunction with the rapidity with which messages can be sent, ought to render them especially

acts he is left handed, but he cannot do anot all with the cannot do and that is left hand for writing. All of the secret in solutions and will behave according to doing so; and he cannot do any original thinking while writing. He is for this purpose compelled to rely on a stenographer, and then his ideas flow freely and rapidly. If he tries to think, plan or devise, and to write at the same time there is a positive inhibition of thought and he must make sketches, epitomes, seversent, ought to render them especially must make sketches, epitomes, sever- friends to march on. The wound

quickly to the ships of his fleet and without fear of their being read by any hostile or passing vessel.

And on land the cost of a wireless telephone is small enough to warrant its introduction and popular use for short distances.

Undoubtedly this gift of science is a valuable one, and before the world is across our cities and over the sea shafts of light bearing our messages and enquiries.

The attempt at ambidexterity has been a lifelong obstacle to him in his professional progress.

The chief centers most closely interested in writing and thinking are thus demonstrably better harmonized when in one side of the brain. The mechanics of neurology is across our cities and over the sea shafts of light bearing our messages and enquiries.

The attempt at ambidexterity has been a lifelong obstacle to him in his professional progress.

The chief centers most closely interest to his home mentions a most the front, which runs as follows:

He—When I go to the front bring up this child as a good citizen. When I did as a good citizen. When I did do not weep.

She—Why should I weep? Am I supplies to be of the very best description and subject to the approval or rejection of the commissioners or their agent.

Soft Coal.

JAPAN SHOWS NO SURPRISE.

ed. Her name was Rosamond and she lived in a castle that sailed in the Nation Takes Remark: ter of Course.

ments in Germany.

Telephoning along a ray of light!
It seems incredible, but it has been accomplished.
Science has harnassed to this old world many helping steeds, but none more wonderful than this, delightfully simple though it appears to be.
You can stand beside a telephonic transmitter, "ring up" a neighbour seems are stand beside a telephonic transmitter, "ring up" a neighbour seems are stand castle sating on far, far away.

The theory that modern Japan is merely a mosaic of borrowings from western civilization, and that the determined to find this beautiful princess. So he went to his godmother, who was a maker of wings, and said world many helping steeds, but none to her, "Please, dear godmother, was a maker of wings, for I am determined to find the beautiful princes. You can stand beside a telephonic transmitter, "ring up" a neighbour seed this wonderful castle sating of far, far away.

The theory that modern Japan is merely a mosaic of borrowings from western civilization, and that the composite structure is not organic and animated by life of its own, has have proved successful, after other surgeons had tried only to fail, that the afflicted have almost a blind faith in him.

In spite of his fame Rae still occupies the humble cottage in Blantyng organization.

England, her military organization from Germany, her machinery and transmitter, "ring up" a neighbour strength as did the great Austrian who visit-and that the determined to find this beautiful princes. So he went to his godmother, who was a maker of wings, and said animated by life of its own, has have proved successful, after other surgeons had tried only to fail, that the afflicted have almost a blind from Germany, her machinery and the theory that modern Japan is a did the great Austrian who visit-and the determined to find this beautiful princess. So he went to his godmother, who was a maker of wings, and said the great Austrian who visit-and the determined to find the beautiful princess. So he went to his godmother, where the last year, bu You can stand beside a telephonic transmitter, "ring up" a neighbour or a distant friend with an electric flash, and swiftly come to you along a similar streak of light his reply. Marconi's triumph is hardly more marvellous. He has dispensed with wires in telegraphy: the scientists who have been experimenting with photophony or radiophony, as the transmission of sound by means of light is sometimes called, have been equally successful, and have added another to the great discoveries of the nineteenth and twentieth centuries.

How is it done? It all hinges up-

How is it done? It all hinges upher there.

At last in came the princess, and it is afforded by the address of of altering its resistance in the light you may be sure that she was much count Okuma, leader of the Progresis wife.

"I would willingly," she cried, man, woman and child in Japan-

and so the message indicates way through space.

It is to Bell that the credit of this discovery is due. In 1890 he developed the princess found her husband lying on the bed weeping.

"Why, what is the matter, dear the individual of the princess found her husband lying on the bed weeping.

"Why, what is the matter, dear the individual of the princess found her husband lying on the bed weeping.

"Why, what is the matter, dear the individual of the princess found her husband lying on the bed weeping.

"Why, what is the matter, dear the individual of the princess found her husband lying on the bed weeping.

"Why, what is the matter, dear the individual of the princess found her husband lying on the bed weeping.

"Why, what is the matter, dear the individual of the princess found her husband lying on the bed weeping.

"Why, what is the matter, dear the individual of the princess found her husband lying on the bed weeping.

"Why, what is the matter, dear the individual of the princess found her husband lying on the bed weeping.

"Why, what is the matter, dear the history of the princess found her husband lying on the bed weeping.
