

REMOVAL OF THE SEAT OF GOVERNMENT.

We observed some time ago, in some of the Saint John papers, editorials recommending that the Seat of Government be removed to St. John, so that the members from St. John, and the adjacent Counties, could board at home.

Now, as an amendment to our worthy contemporaries' suggestion, we would propose, upon principles of strict economy, that the Seat of Government be removed to Eel Ground; then the members for Northumberland could board at home, and members from St. John and other Counties would be supplied gratis with eels, gaspereaux, and bass. We trust, at least, that our friends from the North will not desert us in our extremities. We shall dwell more fully upon this subject in our next issue.

Local Money Market.

Smooth Shillings advanced 2½ per cent. premium. Pistareens, firm. Light Coin, such as Doubled Yorkers, on the advance, in consequence of the Bank of Eel Ground (not Red Bank), having caved in for the present.

Robin Jack-son.

NOTES BY THE WAY.

It was a beautiful bright morning; the sun had just emerged from behind the house formerly occupied by R. Oxford, Esq., and shedding forth its bright refulgent rays over that vast extensive territory called Red Bank, when our principal editor, Simo B. W. Francis, suggested the propriety of a tour through the surrounding country. We immediately repaired to that magnificent structure, the North West Bridge; after having crossed which, we wended our way to that portion of the Derby Parish, un-

commonly called Wilson's Point, the scenery of which *Vyes* with any in the country. The apparent beauty of the scenery on the opposite side of the river, induced us to take *Horse*, and after having procured a double canoe, we crossed over to *Foaly's Cove*. We were informed here that a little to the westward, in an easterly direction, several fine specimens of *Whale-hens* were to be found; and much persuasion was here used to proceed in that direction as far as the *Corodens*, which we regret we could not accede to; but preferred, from various motives, to *Flitt* across to *Blue Bear's Island*. *Har-dly* had we arrived at this place, when the splendid and luminous appearance of *Birch-hill* induced us to return to the Nelson side; and taking *Kain* in hand, we proceeded to the adjoining parish of Chatham; and scarcely had we reached this point, when we discovered we were completely done *Brown*, by the perception that *Crocker-E-Ware* was prevalent to an alarming extent in this vicinity. After having rested our weary limbs, we continued our journey down the bank of the river, and having arrived at the Ferry Landing, we took steam, and crossed over to Newcastle, when, to our great surprise, we discovered an immense *Park*, with a fine *Saw Mill* in the centre. The next object that attracted our attention, was a most magnificent garden of *Hawes*, the quality of which fruit a critical connoisseur would pronounce excellent. And now to conclude our notes by the way for the present number, we would remark, that in leaving the garden, we observed a sample of beautifully preserved *Fish*, which, in the course of Time, will no doubt grace the table of some happy man. So mote it be.

J.A. KASS.

LOST!

BETWEEN this and the next place, an intelligent Green Spaniel PUP, answering to the name of Joseph; stands 2 hands high, and weighs a few. Any person calling at the surgery may keep him, by paying property and proving expenses.

LOUIS STICK, M. D.
