

PUBLISHED FOR THE PROPRIETOR BY THE ALBERT STAR PRINTING CO. AT HILLSBOROUGH, N.B.

J. A. BEATTY, MANAGER.

Terms One Dollar a Year in Advance.

UNNECESSARY SPORTS.

Some time since we entered our protest against pugilism, and against the newspapers of our country giving such prominence to these brutal encounters. Among the sports the game of foot-ball seems to be of a very dangerous character. It is but the other day that a young man was killed in a game in the United States, and scarcely a game is played in our own province, but some more or less serious injuries are the result. On Saturday last a young man named Butler had his leg broken in a match game at Moncton, between St. John and Mt. Allison teams. The game is usually played in the autumn and early winter, in consequence of the coolness of the weather, as great exertion is a characteristic of it. The players frequently become very much heated, by reason of the violence of the game, and heavy colds ending in pulmonary and lung diseases are often the result. It does certainly appear, in view of the many games and sports where physical exercise is afforded, (and that is the requisite) that a game so fruitful of death, broken limbs, bruises, and the great danger of contracting the diseases we have referred to, could be dispensed with. In all games and sports, in every walk of life, however safe it may seem, the inevitable accident is liable to occur, but with foot-ball to escape serious injury, is the exception. The matter is worthy the attention of those in connection with the management of sports in our institutions of learning and elsewhere. The game should either be mended or ended.

Latest advices from the East indicate that peace negotiations are in progress between China and Japan. The capture of Port Arthur seems to have dashed all the hopes of the Chinese to successfully defend their Capital and they will have to bow to the inevitable. The Japanese are very exacting in their demands, but the recent moving of the British fleet in those waters has probably had the effect of influencing them in the direction of peace.

Enthusiasm Over the Czar.

ST. PETERSBURG, Nov. 29.—The marriage of the Czar was celebrated in Finland with great enthusiasm on Monday. The city of Helsinki was profusely decorated and gala performances in the theatres in the evening. Business was suspended and the schools and public offices were closed.

The popularity of the Czar increases daily. Nothing has done so much to popularize him as his unaffected manners and the fact that he is dispensing with the military police body guards of the palace. His order withdrawing the troops from the line of route upon his wedding day has produced an extra good effect. The crowd were unable to believe that they would be allowed to stand and witness the procession with the invariable hedge of soldiers, and when they saw that this was a fact the populace was frantic with delight, and expressed its satisfaction in a thousand ways. There is no doubt that a marked change has taken place everywhere in St. Petersburg life, in consequence of the Czar's admirable policy.

Langtry Wants a Divorce.

NEW YORK, Nov. 28.—A suite of rooms was engaged at the Fifth Avenue hotel yesterday for Edward T. Langtry and valet who will arrive in a few days from North Wales. Mr. Langtry is the husband of the Jersey Lily at present on a tour through this country and it is said that he is coming to the United States with a view to divorce proceedings. Mr. Langtry rarely sees his wife, and then it is only a formal meeting. It is said that Mrs. Langtry has offered to supply her husband with certain information that would precipitate divorce proceedings, but so far he has declined. Now, however, it is understood that he will seek a separation in this country on the single charge of collusion would cause the interference of the Queen's proctor.

Li Hung Chang in War Paint.

LONDON, Nov. 30.—A despatch from Shanghai says that great excitement in naval circles there in consequence of the departure of British warships from that port under sealed orders. The presence of three British cruisers opposite the estuary of the Yangtze is considered to show that Great Britain has decided to more than forestall her rivals in the East and to obtain a voice in the settlement to be arrived at between Japan and China. The despatch adds that Li Hung Chang will place himself at the head of an army which he has created for his own purpose. Thousands of troops are reported to be arriving from different parts of the country for service under Li Hung Chang.

CHINA AND JAPAN.

Progress of the War in the East.

LONDON, Nov. 30.—A despatch from Shanghai says that great excitement in naval circles there, in consequence of the departure of British warships from that port under sealed orders.

The presence of three British cruisers opposite the estuary of the Yangtze is considered to show that Great Britain has decided to more than forestall her rivals in the East and to obtain a voice in the settlement to be arrived at between China and Japan. The despatch adds that Li Hung Chang will place himself at the head of an army, which he has created for his own purpose. Thousands of troops are reported to be arriving from different parts of the country for service under Li Hung Chang.

The successive defeats sustained by the Chinese army and fleet are generally attributed by the native population of this and other cities in China to the influence of the German advisers of Li Hung Chang, whose only aim is self-aggrandizement.

Divers sent from Shanghai are examining the Chinese warship Chen Yuen, which recently went ashore near Wei Hai Wei. Repairs upon the ship have already begun.

Yokohama advices say that the mission of Gustave Detering, the Commissioner of Foreign Customs at Tien Tsin, who was sent to Japan by Li Hung Chang in order to negotiate for peace, has been a complete failure, as already intimated in these despatches. Count Ito Hirobumi, the president of the council of ministers, decided that he could not receive the peace commissioners, and the latter was recalled to China by Li Hung Chang. Previous to his departure, however, Mr. Detering had a brief interview with the chief secretary of the Japanese Cabinet, who arrived from Hiroshima for that purpose. The Japanese native press generally is indignant at the fact that China sent a foreign agent to negotiate for peace with Japan.

NEW YORK, Nov. 30.—The Herald's Shanghai special says: England is evidently preparing a coup de main with a view to protecting her interests in China. There can be no doubt she is being excluded from the discussion of possible terms of settlement between the two belligerents, and she has arranged a naval demonstration at Chusan on December 11. The Alacrity, Pigmy and Redpole have left here with sealed orders. They go to join Vice-Admiral Freeman's flagship Centurion and the other war vessels under his command. This, it is supposed, is being done as a measure of precaution, lest the Japanese should carry the war into southern China, now that winter is arriving and the northern approaches to the Empire will become ice-bound and difficult.

The central provinces, especially the province of Anhui, are pouring troops southward to Canton, where Li Hung Chang's brother, Li Han Chang, is Viceroy. The denunciation of Li Hung Chang by the censors continues. They declare he is entertaining rebellious designs and indeed, this looks possible enough. He is being guarded by his own soldiers at Tien Tsin, while outside the city trusted imperial troops are watching him. These forces, which are composed of Huanes and Manchus, regarded the Viceroy as a rebel. If any general in this country had such a reputation as would enable him to place himself at the head of a popular movement, the Chinese would undoubtedly overthrow the dynasty. Li Hung Chang, and the entire present system of Government. All their hatred of the Japanese has now been converted into hatred of their own rulers.

Latest reports of the fall of Port Arthur state the number of Chinese killed in the engagement was about 2000. The reported mutilation and torture of Japanese soldiers, was absolutely denied by the Japanese officers in command.

The Japanese artillery under Field Marshal Yamagata has passed through the Mo Tien passes and is believed to have taken possession of the city of Liao Yang, forty miles from Moukden. An attack and attempt to recapture Kin Chow has been frustrated by the Japanese there.

A Meteor Falls.

COUNCIL BLUFFS, Ia., Nov. 29.—A large meteor fell, striking the earth in the south-western portion of the city on Tuesday night. It appeared to be about the size of a balloon, and while in the heavens it was luminous and looked like a balloon on fire, lighting up the whole city. Just before it struck the earth it exploded, and its fragments were scattered over several acres of ground in the thinly settled portion of the town. There was no one injured. Two minutes after the meteor fell there was a terrible shock, scarcely less severe than an earthquake, which shook nearly every building in the city and awakened nearly all of the slumbering inhabitants.

The Russian Loan and the Jews

It is stated that the new Russian loan will be issued before Christmas at 3 1/2 per cent. It amounts to £20,000,000 or \$100,000,000. The fact that it is understood the loan will be issued by the Rothschilds of London, Paris and Berlin, is accepted as an indication of a change in the attitude of the Jewish bankers towards Russia and it is thought that this change was probably influenced by the Anglo Russian entente.

Nine women and two men were frozen to death yesterday, in a sudden storm at Besednais, in the Tula district of Russia.

Ferry Maine.

DEC. 1st.—I promised in my last letter to tell you something of a few of the small surrounding towns in Washington county. I shall select Machias, the history of which is second in importance and interest to that of no other town in Maine, and the military history of this New England community should be familiar to every American, and should be a great cause for his pride in his ancestors, considering the isolated and exposed condition of Machias in revolutionary days, and the meagre resources of the people, it seems incredible that they should openly defy the crown, they were not only the aggressors, but successfully defended their town all through the war, but such are the facts, and they are supported by unimpeachable evidence. But we will not dwell any farther upon the patriotism of the men of Machias, but touch briefly upon the first settlement of the town. Bear in mind that the original Machias included the present towns of Machias, Machiasport, East Machias, Whiteville, and Marshfield. The residents of Machias obtained their first settled minister in the person of the Rev. James Lyon, in 1771, and in 1774, the first meeting house was built. It was a one story house, twenty-five feet wide and forty-four feet long without pews, and it was not only used for divine worship but as a town hall and school house as well, and after Washington county was established the terms of County Courts were held in this building. Machias is on the stage line from Bangor to Calais, and Machiasport is the terminus of the steamboat line which, at Rockland, makes connection with the steamers of the Boston and Bangor Steamship Company. East Machias is on the stage line from Cherryfield to Eastport. All three towns are largely engaged in manufacturing. The water power of Machias consists of a series of falls in the Machias river. The total power of the falls is estimated at about one thousand horse, and the conditions are such that freshets can do no harm to mills or machinery. Machias is one of the best lumbering, manufacturing and shipping centres in the state. For natural beauty she cannot be surpassed; it has been the happy camping ground for the leisurely few for years past, and within the last few years fifteen cottages have sprung up, which shelter many visitors during the summer months. Good board can be had at the rate of one dollar per day, making it most desirable for those desiring of spending a few months of summer happily and comfortably. I must not neglect to tell you some of our own doings.

On the 18th of November George Hibbard, one of our well known young men, shot two deer, one a fine buck, in three days, later Mr. Charles Andrews shot a fine deer and wounded another, last year about this time Mr. Andrews shot two at one shot. On Thursday of last week Mrs. Kenniston entertained about thirty ladies, at the parsonage, at supper. We are soon to lose one of our most popular young ladies, Miss Ada Leighton. Miss Leighton is a most charming young lady, besides being an accomplished musician. She is also a graduate from the Conservatory of Music in Boston. We will miss her from among us, where she is much respected and beloved by all who know her.

Thursday, Nov. 29, was observed as Thanksgiving Day. Services were held in the Congregational church in the morning, the balance of the day we feasted, entertained and visited, and in the evening Mrs. Henry Goulding entertained about forty of the young people. Games of all sorts and dancing were indulged in, refreshments were served in Mrs. Goulding's own style about eleven, and at twelve all departed for their homes declaring they had a most enjoyable time. On the same day Mrs. James Crosby entertained Capt. and Mrs. Thos. Crosby, of Eastport, Mr. and Mrs. E. D. Spreul, and the Misses Hattie and Nellie Rogers at dinner. We are sorry to say Mr. Sproul is not in as good health as his friends desire, still the shakes are as frequent as they were, and we have hopes of their taking themselves off soon.

Good skating on the pond near the pumping station and the young folks are desporting themselves in a most lively manner. My dear Editor, when I begin to write I never know when to stop, and if I tell you lots about my adopted home you must not think I have forgotten my own dear home in Hillsboro. I have traveled all over the world, mostly, but with it all I still loyal to my own people, still I must admire and commend upon the kindness and genuine goodness of the people of Perry—they are now my people. If I take up more space than is allotted you must tell me.

HILLSBORO GIRL.

British Columbia Gold.

KASLO, B. C., Nov. 28.—The placer excitement still continues. All the leading men in the town have recorded claims to be worked as a whole. Twelve claims were recorded on Saturday. The poorest day's work on the claims known is \$2 per yard and the highest was \$950 per yard. The gold is all coarse in many instances and as large as a silver five cent piece and about twice as thick. The record office has had a busy time of it during the past ten days.

The Czar's White Horses.

The Czar of Russia has one set of fifty horses, all of pure white, with blue eyes. They are beautiful creatures, but deaf, as white animals with blue eyes always are. These white horses are used in showy processions on state occasions, like Queen Victoria's famous cream-colored horses, are never sold from the imperial stables. When past use they are shot and buried with due ceremony.

The Tacoma Disaster.

TACOMA, WASH., Nov. 30.—Information received proves conclusively that the great landslide was caused by neither tidal wave nor earthquake. Puget sound has very steep shores. Just outside the Northern Pacific dock the bank slopes into deep water at an angle of forty five degrees.

Fifty feet from the dock the water is 150 to 200 feet deep. At very great expense, the railroad had put in docks of made land, supported on the water side by a rock wall built by a piling. This was not strong enough to resist the immense pressure and when the high bank further up had been made slippery and loose by recent rains the edge of the docks began to divide, precipitating into deep water the most valuable portion of this water front.

The submerged bank is 100 feet long and 200 feet wide. The persons who were killed, Emma Stubbs, 15 year old step-daughter of H. H. Alger, a boathouse keeper and John Hanson the night watchman. The damage to the railroad docks will amount to over \$47,000.

The work of repairing will commence at once by the rebuilding of the sea wall for 1,800 feet. It will be deferred until the chief engineer at St. Paul decides on plans. The south end of the Sound freight warehouse is in the water and part of it remained suspended on the dock's edge. All the freight has been removed. It is feared more of the made land will go.

A Naughty Princess.

It is impossible for newspapers to any longer ignore the scandal which has been talked about in every court in Europe for months past. The persons most affected are Prince Waldemar of Denmark and his wife, born Princess Marie of Orleans. The couple were married in 1885 and have three children. In the last year or two there have been frequent quarrels. The pair are now apart, the Prince remaining with his children in Copenhagen and the Princess staying with some members of her family in France. If the friends and relatives do not succeed in reconciling the young people there will be an action for divorce. The Princess makes accusations against her husband and it is alleged against her that her eccentricities have made her name a byword in Denmark. It is asserted that she is an habitual taker of morphine and an excessive smoker of cigarettes, even in the public streets; that she has shown an absurd and imprudent partiality for the fremens of Copenhagen and is constantly attending confagration and distributing cigars and cigarettes among the officers and ordering liquor for the men; and that she was so lacking in good taste as to have herself photographed in freeman's uniform, with the result that copies of that photograph are to be found in all the fire stations. Furthermore, the Princess is accused of having, upon more than one occasion, insulted the late Czar Alexander, and also her mother-in-law, Queen Louise, to the great pain and annoyance of the entire family. Such is the husband's case against his wife. The latter has made no statement of her grievances, which are understood to be numerous beyond the general charge of misconduct.

Lion Played With Him.

WILKESBARRE, Penn., Nov. 28.—There was an exciting time at the City dime museum this evening. Prof. H. Devoe, dressed in a star spangled suit, was introduced to the audience of 1,000 people as the greatest lion tamer of the age.

In another instant the professor was in the lion's cage and the door closed behind him. The "King of the Forest" looked sleepy and harmless when he arose from his sitting position, but after the professor lashed him with the whip a couple of times he appeared lively enough.

In an unguarded moment, while the professor was acknowledging the plaudits of the spectators, the lion jumped on the man's back and in a second had him on the floor of the cage. The beast gave a mighty roar and then picked the man up in his teeth and shook him like a rat terrier would his prey. Then he threw him from one side of the cage to the other.

The audience became panic stricken. Bleeding from head to foot, the man fought desperately for his life. Three men, armed with iron bars, drove the beast into one corner and Devoe was dragged from the cage, the flesh on his legs and arms being in shreds. He became unconscious and three doctors were summoned.

They say no bones were broken, and the wounded man stands a good chance of recovering.

Largest Paper Mill in the World.

The Niagara Falls paper company which has the largest paper mill in the world and now employs about 400 men, is making arrangements to double its capacity and help Mr. John C. Morgan, the manager says that next spring the capital of the company, which now is \$1,700,000 will be doubled.

Several hundred families along Conception Bay, Nfld., are destitute, owing to the failure of the fisheries.

NOTICE.

All persons having lawful claims or demands against the estate of the late John C. Lauder, will present them duly attested to the undersigned within three months from date, and all persons indebted to said estate will make immediate payment.

MARTHA LAUDER, Administratrix.

Hillsborough, Nov. 29th 1894.
