borough, N. B.

J. A. BEATTY, MANAGER.

Terms One Dollar a Year in Advance.

WEDNESDAY, AUG. 22.

THE WELDON BILL.

At the last session of Parliament, Dr. Weldon, the representative of this county introduced a measure which after much carving became law, entitled "An Act to disfranchise voters who have taken bribes."

The act provides that five or more electors may, not less than 40, nor more than 60 days after an election, present a petition to the election court, stating that bribery has extensively prevailed at the election, to which petition an affidavit must be attached sworn to by all the petitioners to the effect that the allegations are true to the best of their knowledge and belief, upon which the court shall within 30 days assign one of its judges for the purpose of making an inquiry under the act, provided the court is satisfied by the affidavits produced that such extensive bribery has been practised. The judge shall then give notice and hold meetings in the electoral district and endeavor by all lawful means to ascertain the persons who have taken bribes at the last election. If he finds any voter or voters has or have taken bribes he shall so declare in open court and report to the secretary of State, (unless the voter has appealed), who shall publish the report in the Canada Gazette, and the voters so found guilty of taking a bribe, shall be disfranchised for 7 years.

The sum of \$1,000 shall be deposited with the petition to defray the expenses of the inquiry. No petition shall be filed under this act if a petition under the Dominion Controverted Election Act has been filed until that is abandoned or disposed of.

That bribery has become extensive in Canada scarcely describes the prevalence, and any measure that promises to even lessen it should be hailed with joy by all right minded men, which ever side of politics they may be on. The great objections to this measure which strikes the most casual observer is, the large expense those desiring to enforce, the provisions of the act must incur.

Robert J. Lowers his Record down to 2.04 1-4.

ROCHESTER, Aug. 16.—Four thousand people went to the driving park this afternoon to see the champion of maiden trotters measure her worth besides the great son of Halford in the special race for \$3,000 and later to see Robert J. strive to lower his own record of 2.051 and the track record of 2.06 left by Johnson. The race was called between the last heat of the 2.21 class and the unfinished heats of the 2.21 race at about 4 o'clock in the afternoon and just at the time when the sun shone warmest and the wind had gone down. The track had been beaten into the fastest possible shape by the heats in the previous races and after the scraper had been run over it to clear away the ridges and fill up the cups the conditions surrounding the trials of time were perfect. The first heat, in which Robert J. and Fantasy took part, served its purpose as a warming up heat. The two travelled the circuit like a team and went under the wire nose and nose in 2.10 flat.

But it was when Fantasy made her magnificent performance that the grand stand trembled with the applause of the thousands. The maiden took the word on the second score down, and flew to the quarter in 33 seconds flat, Robert J. urging her on by hanging at her wheel all the day. The half was reached in 1.04 and then it was known that she would do it. At the half she began her start work and reached the three-quarter pole in 1.36 and came on the finish with a magnificent burst of speed which carried her under the wire in 2.07.

Robert J. came out for his race against time with Geers up and with a running mate to set the pace. On the word, the gelding fairly flew to the quarter in 30 1/2 and went on like a streak to the 1 in 1.01. From here he fairly outpaced his mate, passing the 1/2 post in 1.33 and going under the wire in 2.04, lowering his record by a full second. There is no question but that he would have done better if his mate had forced him.

Sally Simmons, the four-year-old who swept the field in the 2.21 class yesterday, in the straight heats, was sold before the races to Ed. Decene, a New York dealer, who purchased her for a wealthy metropolitan horse fancier. The price was said to have been \$7,500. The mare won her races at both Cleveland and Buffalo, and is one of the most promising fillies that has paced this season.

Opposite City Market, Moncton.

The right place to buy Dry Goods. A full stock well selected in nearly all lines. Qualities and prices guaranteed second to none. We mean to lead not to follow. We have left our old stand and come to centre of city, to be more convenient to our patrons, and are determined to make it in every way to the interest of the people to buy from us. We ask them to see our goods and learn our prices. We close at six o'clock.

Royal Yacht Club Rejected the Satanita's Owner.

Blackballing of the owner of the Satanita, A. D. Clarke, last week by the members of the Royal Yacht Club Squadron, has caused much talk in society circles here, and his rejection, after being proposed by the Prince of Wales, is much regretted. Mr. Clarke was up last May for membership but his application was not reported. In order that his yacht might take part in the regatta of the Royal Yacht Squadron his name was proposed by the owner of the Britannia and it was considered on all sides that with such an indorser as the Prince of Wales Mr. Clarke's entry to the world exclusive yacht club in the world would be granted. There is a story behind the blackballing and it dates from the collision of the Valkyrie and Satanita on the Clyde in which the former was sunk. Lord and Lady Lennox were on board the Valkyrie at the time of the collision and Lady Lennox was much prostrated by the accident, barely getting off with her life. Lady Lennox brought with her valuables of great worth, many being priceless on account of their being family relics. When the Valkyrie went down Lord and Lady Lennox lost all the valuables they had with them and they have not been recompensed for them. Clarke, the owner of the Satanita, in a manly way offered to pay them full value for all they lost, but he would do it only on terms, "without prejudice" that is he was quite willing to recoup his Lordship in full for all loss. But he insisted that such settlement should not be in any way as "buying his peace" or being used as evidence against him in case of a suit either by Lord Dunraven or any one else. Lord Lennox refused to accept the proposition and the result is that had blood has been engendered in the first society circles. Lord and Lady Lennox being on the one side, with the owner Satanita on the other. Lord Dunraven in part agreed with Mr. Clarke, but he thought, "without prejudice," the clause hardly proper as in the case of litigation for the loss of the Valkyrie, as it might be prejudicial to the Valkyrie's interests. Lord Dunraven was present at the club meeting when Mr. Clarke's name was acted on, but he declined positively to take any part whatever, leaving the members free so far as he was concerned to act for themselves. It was generally supposed that Mr. Clarke would be admitted to membership and not one was more surprised or disappointed at the action of the club members than the Prince of Wales. He took it somewhat in the light of an insult, and when he found out how it was brought about he considered that difference between personal acquaintances were hardly sufficient for a club to take part in and reject a gentleman's application for membership. It now turns out that Lord and Lady Lennox were instrumental in accomplishing Mr. Clarke's defeat. Following the rejection by them of Mr. Clarke's offer they worked to defeat him for membership in the club. Lady Lennox, it is authoritatively stated, made personal requests of all the leading members and put her side of the matter strongly and positively, stating that her dearest and most choice valuables had been lost, and that she had not been reimbursed for them. Lady Lennox is a very fascinating person, and the blackballing of Mr. Clarke is looked upon as a victory for her over the Prince of Wales and is much discussed in club and society circles. On all sides however, there is great sympathy for the owner of Satanita, who is a public-spirited and patriotic yachtsman.

Two Plots Hatched to Murder Premier Dupuy.

PARIS, Aug. 17.—Le Journal says the police frustrated an anarchist plot to assassinate Premier Dupuy. The premier is in Vernet Les Bains guarded by the detectives. The main plot was hatched in Barcelona by Spanish and fugitive French anarchists. Three men were designated by lot to execute it. They were to cross the border about the middle of August and were to assassinate the premier during his absence from Paris. The bomb which was to be used was made in Spain, although it is not known that Barcelona anarchists did the work. The police in Barcelona deny there is any anarchist laboratory in that city and say the bomb must have been procured elsewhere. The plot was discovered by three anarchist agents in Certe, Lyons for Paris. The plot was in Certe was instructed to inform the French police of the premier's danger. The warning was accompanied by a description of the three men, two of whom are known to the French police. How the anarchists learned of their peril is not known. Another plot against the premier's life was laid last month by French anarchists and was to have been executed by Frenchmen. It is supposed to have originated in Certe, Lyons for Paris. The plot was not co-operating with Barcelona anarchists, although the understanding of both groups was that failure of one conspiracy might be made good immediately afterward. The French plot also was to be executed this month, and with a dynamite bomb. The premier is closely guarded. The Spanish police have been informed of the return of three Barcelona agents to Spain, and are making every effort to capture them.

A New Gas.

At yesterday's meeting of the British Association, Douglas Galton was chosen president. An innovation of Toronto to make that city the place of the annual meeting of the Association for 1897 was favorable received, but the Association can not decide until 1895. During the course of yesterday's session of the Association, Lord Rayleigh, professor of experimental physics at Cambridge University, announced the discovery of an hitherto unknown constituent of the atmosphere—a gas characterized by extreme inertness. The professor added that he had not yet found its chemical reagent, but the value of the discovery was 1909. Lord Rayleigh with Professor Ramsay, obtained a quarter of a pint of this substance. Immense interest was shown in Lord Rayleigh's announcement by the members of the Association.

Cape May, New Jersey, U. S. A., as a Health Resort.

By Mrs. S. L. KIMBALL.

The favored spot is situated at the extreme southern point of New Jersey, and is a natural watering place. Here the thumb of the state, so to speak, projects far into the Atlantic Ocean, and is closely embraced by its waters and those of the Delaware Bay, it would seem as if the forces of nature working in ages past, shaping bays and inlets and headlands, had with intelligent purpose, foreseen the coming need for this famous seaside resort, and left a strip of upland, that upon its very point, where the restless waves of the ocean unite with the waters of the bay it might be built, but nature, who she carved this enviable locality did not rest there, for she placed about it a system of barrier shoals which afford complete protection from the wearing force of the waves when driven by easterly gales. Parallel to the shore, and extending the length of the city, and only a little seaward from it, is "Uncle Eph," this shoal forms a natural breakwater, and when other parts of the coast are being wrecked, by the sea, Cape May sits securely upon her proud eminence of superior position, and defies the wearing ocean elements.

Looking landward we find that Cape May, is connected with the mainland by a wide ridge of sand which is from fifteen to twenty feet high, this gives an underflow of pure fresh water. Efforts to find good fresh water on the islands which skirt the coast and that are disconnected with the main by salt marshes, have in every instance proved futile. Another thing, and one which concerns pleasure and health seekers who come to the seashore, is the perfect safety of the broad smooth beach, forming the floor of the grand bathing grounds on the whole coast.

The grandeur and beauty of the ocean never tires with the observer, when standing upon its shores its influence upon the human mind and heart are strangely softening, as one looks over the vast, and to the eye boundless, expanse of restless sea, majestic in its magnitude, the mind vainly tries to comprehend the power that created this most wonderful and awe-inspiring work of nature.

The grand boulevard deserves special mention, this extends along the beach for a distance of about five miles, being constructed immediately along the edge of the ocean, there is an unobstructed view of the sea along its entire length, along the ocean side of the boulevard extending the entire length of the city, is the broad walk, upon which thousands of visitors take their promenade; while the boulevard is crowded with handsome turnouts of every description.

The accommodation for surf bathing at Cape May are very superior, and there are special accommodations for invalids and those who are unable to enjoy surf bathing. Hot sea water baths have been erected. Another attraction for the pleasure seeker is the unexcelled facilities for fishing, at Smith's Point and Schilling's Landing. Fishing boats and yachts are always in readiness, the former is but a few minutes ride from the hotels to the street cars, while the latter is reached by the trolley cars.

As to hotels Cape May possesses some of the finest, on the New Jersey coast, the Mammoth Stockton, Congress Hall, the New Columbia, Hotel Lafayette, the Marin Villa, Windsor, Chalfonte, and the Earlington, besides numerous small hotels and cottages.

In the old colonial days there stood in the lower precinct of Cape May county, near where Bradners River sluggishly creeps through Cold Springs Meadows an ancient tavern of olden type, shingled siding, hipped roof and dormer windows, this historical tavern was near to the road and had in the days of its usefulness as a house of entertainment a commanding situation at the junction of the C highway with that of Fishing Creek, it has long since disappeared, giving place to a more modern house.

Where the war for independence broke out, the old tavern was a rendezvous for Loyalists, where they met and concocted schemes for the discomfort of such of their neighbors, who were in favor of independence.

There is a legend that the story part of the community was attacked one dark night, by their patriotic fellow colonists, paying for their adherence to the mother country by the death of three of their number, with their so called traitors. The King's agent met, he escaped with his life, and thought it best after this expression of public feeling to abandon the crown revenue and to decamp.

There is also a legend in the Walker family here, that the tavern-keeper of this ancient house, had a beautiful daughter Prudence, who was engaged to one of the Loyalists, a man of distinction and wealth, among the first settlers of the Cape, and who was one of the slain that fatal night to Loyal interests. The poor thing never became reconciled over the loss of her lover, but wandered about the country possessed of the vain idea that he would return—after her death the old house was ever after supposed to be haunted, strange sights and sounds was thought to have been seen and heard by the superstitious people of that day.

Salmon Fishing Ended.

Today is the last day of Salmon fishing with net or fly, and it is the unanimous opinion among all classes of fishermen that this has been the best season ever known on the Restigouche. Some very large catches were made among the netters, and the commercial price of salmon in Bay Chaleur has not been so low for the last ten years. The anglers are jubilant over the big scores which have been made. One man in four days killed 53 salmon, another in 15 days 107 salmon, and every party who went up river caught from 50 to 100 fish.

We learn the Metapedia River is well up to the old standard this season. The Messrs. Mowat's waters have proved exceptionally good. Another good catch of 4 salmon one weighing 30 lbs. was caught on their waters in one day last week.—Enterprise.

General News.

Miss Ida Platt is the first colored woman to be admitted to the bar in Illinois, or, indeed, any other state. She is a graduate of the Chicago law school.

Miss Paulina, of Holland, is probably the thinnest woman on the planet. She is eighteen years old, weighs less than nine pounds, and lacks four inches of being as high as a two-foot rule.

The commercial treaty between Spain and Argentine Republic, negotiations for which have been in progress for some time, has been concluded. By its provisions, Spain for a period of two years, will not raise the duty imposed on meats from Argentine and the latter country will lower the duties on Spanish wines.

The damage to the corn crop in part of Kansas and Nebraska is so great that the St. Joseph & Grand Island railroad has issued orders for the abandonment of over a dozen stations on its lines. The people living in the sections where the sections are closed depended almost entirely on the corn crop, and they are now leaving in great numbers.

With appropriate ceremonies and the firing of many "volleys" the Salvation army on Aug. 14, laid the corner stone of the Mrs. Gen. Booth memorial building which is to be erected on 14th street, near Sixth avenue, New York. Commander Ballington Booth, son of General Booth, and chief of the army in the United States, laid the main corner with a silver trowel presented by the officers of the Salvation army.

Miss Madeline Pollard, whose recent breach of promise suit against Congressman W. C. P. Breckinridge gave her widespread notoriety, is to go on the stage. She has just signed a contract for a forty weeks season with Mr. Nelson Roberts, for many years connected with Mr. Daniel Freham's business forces. Miss Pollard will make her professional debut early in October, probably in Chicago.

Last Thursday morning, about eight miles from Sapulpa, Texas, Henry Munson and Alton Gordon were shot and instantly killed by the Uchee scouts. Munson and Gordon both belonged to the notorious Bill Cook gang of outlaws, who lately robbed the Chandler Bank, and were on their way to the rendezvous of the gang. This leaves only two of the Cook gang at large, Bill Cook and Cherokee Bill.

U. S. Tariff.

In the Senate bill which the House has just passed, the following duties are fixed on the following staple articles which have been the bone of contention between the two branches of congress: All raw sugars, forty per cent. ad valorem.

Sugars about No 15, (refined) one-eighth per cent. additional. Sugars produced in bounty paying countries, one-tenth per cent. additional to these rates.

Hawaiian sugar is still free under the reciprocity treaty. Iron ore, 40 cents per ton. Pig, \$4 per ton. Iron or steel rails, 7.20 of one cent per pound.

Lead ore and dross, 1/2 of one cent per pound. Silver lead bearing ore, the same duty on lead connected therein. Tobacco for wrappers, \$1.50 per pound and 25 cents ad valorem. Coal, bituminous and large slack, 15 cents per ton. Precious stones cut and unset, 25 per cent ad valorem, set 30 per cent uncut 10 per cent.

Glaucers' and miners' diamonds, free. Logs and sawed lumber and timber (save tropical woods) and wool are free. Tin plate 11-15 cents per pound after October first. Marble, rough, 50 cents, undressed, 85 cents per cubic foot. White and red lead 1 1/2, per pound. Under the internal revenue sections of the bill playing cards are taxed 2c. per pack.

An income tax of 2 per cent, on incomes above \$1,000 is provided for; also a tax on corporations of 2 per cent. Whiskey is taxed at \$1.10 per gallon; and the bonded period is fixed at eight years.

Gold in Australia.

The stories of wonderful gold discoveries in western Australia were confirmed by an official despatch yesterday. The details of the principal find near Coolgardie has already reached London. A party of six were returning from an unsuccessful prospecting tour on May 8. When in camp one night they separated to test and examine the neighbourhood. A man named Mills came to one of the large "blows" which are characteristic of the country. He was astonished on rubbing his hands across a protruding piece of stone to see gold standing out prominently. He knocked a large piece off a boulder, and at his feet lay a magnificent specimen literally studded with coarse gold, while before him, dazzling his eyes, was a magnificent reef of almost pure gold, a fortune in itself. Mills, taking several pieces of the reef, placed them in his bosom, and, carefully covering the reef with earth, found his mates. On the next morning 25 acres were pegged off, and the adjoining blocks at each end were also taken up. One man went to town and bought a dolly, the largest he could procure. In one day they doled 1,500 ounces, and in a short time had nearly 100,000 worth of ore. On June 31 they packed it in a cart, and landed the treasure at Union Bank. The manager weighed the gold and it turned the scales at 4,280 ounces. A few days afterwards the discovery became public. One lump was taken from the reef containing more gold than ore. It weighed 240 pounds and was worth \$20,000. Of course there is immense excitement in the region, and many other discoveries are reported, but there is unlikely to be anything left for late comers.

Given under my hand and the seal of the said Probate Court at Moncton, in the County of Albert, the Twenty-eighth day of June A. D. 1894.

Wm. A. STEVENS, Judge of Probate, County of Albert.

JOSEPH DICKSON, Registrar, Probate, County of Albert.

Disappointing Fruit Prospects.

A Wolfville correspondent, in a private letter, writes as follows respecting the fruit crop prospects: "I regret to tell you that the promise of a full fruit crop is now broken. The trees were well filled with bloom as seldom seen here. The plum trees had good pollinating weather, and the fruit set well and continued full of promise well into July. The prolonged drought with heat has already reduced them to two-thirds of an average crop. The apples did not set, and, in my opinion, the weather was too cool for busy insects and consequently fertilization. Apples will probably give half a crop, pears nearly a full one."

"Creditable reports from Ontario and the Atlantic states are to the effect that their percentage of an average yield will scarcely exceed ours. If we have no severe gales the quality of our fruit should improve with diminished quantity."

The above statement is rather disappointing in view of appearances while the trees were in blossom and the prospects in the early part of the season. High prices for fruit in autumn are among the probabilities.—Halifax Chronicle.

NOTICE.

A special meeting of the Court Hillsboro L. C. C. will be held at 10 o'clock, on Saturday, August 24th, at 7:30 p. m., for the transaction of business.

JAMES BLIGHT, C. R.

NOTICE.

The undersigned hereby notifies and cautions all persons, corporations and commissioners of sewers against interfering in any way with the road and track of the Salisbury and Harvey Railway, as anyone so doing will be presented to the utmost extent of the law. Dated, Railway Office, Hillsborough, the 20th day of July, A. D. 1894.

A. SHERWOOD, Manager of the said railway.

Estate Notice.

Creditors of the late G. S. Turner and others interested in the estate of the late G. S. Turner, are hereby notified that there shall be a meeting of said creditors and interested persons at Hotel Brunswick, Moncton, N. B., on Friday, Aug. 23rd next at 11 o'clock a. m. Certain creditors are insisting upon the immediate sale of said railway and I desire to confer with those interested before taking any action. A full notice of the said meeting will be given in the future.

W. A. TRENNAN, Trustee.

Albert, N. B., July 27th, 1894.

Cook & Whitby's Circus

AT

MONCTON.

A special train will leave Hillsboro at 7 o'clock, Tuesday, August 7th, for Salisbury and return on arrival of C. P. P. train leaving Moncton at 10:30. This train will give time to see the Circus Parade and attend the afternoon show. Tickets to Salisbury and return at One Fare.

A. SHERWOOD, Manager.

Ry Office, Hillsboro, July 30, 1894.

Teacher Wanted.

A second class female teacher for School District No. 9, Baltimore, Albert County. For further particulars address,

W. A. STEVENS, Sect'y.

G. D. STEEVES

Corner Main and Academy street. Received for A. J. and by Rail.

Cider Vinegar.

White Wine Vinegar Mixed Pickles. Canned Corn "Delhi," Canned Peas "Delhi," Canned Salmon.

Granulated Sugar.

Extra Yellow C. Sugar, Pulverized Sugar, Val Laver Raisins, Soda Biscuit, Brooms, Pails, Colman's Starch.

Grey Cottons.

White Cotton, Print Cotton, Summer Suits, Flannellette, Ladies' Blk. Hose, Ladies' Blk. Mitts, Clark's 300 yd Cotton, Paris Green, Gem Preserve bottles.

SHERIFF'S SALE.

Will be sold at public auction on Saturday the twenty-second day of September, next at one o'clock in the afternoon at or near the office of Alexander W. Leonard, Esquire, Parish of Couverdale in the County of Albert, the lot of land belonging to John Miller and said Parish and County bounded and described as follows:

"Beginning at a post standing on the west side of the P. & N. R. line and running thence north one hundred and thirty-three feet to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees and thirty minutes to a line of the said John Miller, thence west three degrees and thirty minutes to a line of the said John Miller, thence north three degrees and thirty minutes to a line of the said John Miller, thence east three degrees and thirty minutes to a line of the said John Miller, thence south three degrees
