Don't fail to read them.

The Groder Dyspepsia Cure Co., St. John, have issued a very pretty pamphlet calling the attention of the public to the merits of this wonderful remedy, and giving a brief sketch of what it has done in Canada and what it proposes to do. The records of the sales published in the pamphlet show that the Groder Dyspepsia Cure Co., have a remedy that is doing the work claimed by it, and its fame is rapidly becoming known all over the Dominion.

A terrible disaster happened at Bonny River, about six miles this side of St. George this week. A house belonging to T. A. Sullivan of Bonny River was discovered to be on fire by a young man but for whose timely arrival the inmates would have all perished. It, however became the sad fate of two young men to be burned beyond recognition. The unfortunates were Henry Sullivan aged 14, eldest son of Mr. Sullivan, and John Orr of St. Stephen aged 21. The building was burned to the ground.

John Crompton, a man 60 years of age, met a sad death at Fairville St. John, Monday afternoon. Some time before 4 o'clock he started out from Fairville to walk by the C. P. R. track to his home at South Bay. Near Boggs' crossing, just west of Fairville, he was killed by an incoming freight train. Crompton apparently saw the train approaching and made an effort to get off the track. Engineer George Brown saw the man step from the track and thought the train would clear him, although he endeavored to stop her speed. The curtain of the engine brushed against the man and then a stick, which was projecting from a carload of wood, struck him across the chest and he was seen to fall to the ground and try to crawl away. As quickly as possible the train was stopped and the man taken on board. He was unconscious and when examined by Dr. Gray in the Fairville station house he was a corpse. His breast had been crushed in by the blow and several ribs broken. The train was in charge of Conductor Richard Burgess. Deceased leaves a wife and several children.

The Trend of Matters Political Parliamentary or Otherwise.

Some Touch-and-Go notices of all Mentionable Matters of Things.

The St. Andrews curling club from St. John will probably play here the last of next week. The Thistles are expected the following week.

The authorities have cleared the ice off, and placed the necessary boards over the stone steps at the post office, thereby making it safe for parties passing in and out.

The Grand Lodge of the Orange Order will meet here on Tuesday the 21st day of February next. The County Lodge meets on Tuesday the 7th day of February. Some interesting developments will probably take place.

The citizens are apparently well pleased with the present board of aldermen and Mayor, as all have been returned by acclamation. This is the first time the like has happened in the city and speak well for the board.

The Thistles of St. John will play the Bruro, N. S. curlers for the championship of the Maritime provinces. The fact is that the Thistles are the only team in New Brunswick that belong to the Maritime league, and therefore claim the championship of the province. They have been defeated by our other curlers four games out of five. Not a very good showing for the so called champions of the province.

George V. McInerney, the Conservative "kicker" from Kent County, has been selected to move the address in reply to the speech in the Dominion Parliament which opens to-day. John A. Cheeler, who kicked over the party traces so effectively in St. John, should be chosen as seconder. We offer this as a suggestion whereby the two kickers may be brought into line again.—Beacon.

FARMERS' AND DAIRYMEN'S

Association Meeting in the City Hall. The Reports from the Officers.

Some Interesting Discussion on Dairy Work in New Brunswick.

In the opening address, President Owens spoke with satisfaction of the trade returns of 1892. He believed the McKinley bill to be a blessing in disguise, in that it would draw us into closer trade relations with the mother country. He believed dairying to be the most profitable line for our farmers to work on; and by securing competent men to instruct in cheese and butter making the provincial government, has shown a desire to aid them.

There are plenty of openings as good and better for the young men of New Brunswick at home than abroad, and he called upon the farmers to assist in a greater and greater degree year by year the work of their association.

The president's address was followed by the reports of delegates for the different counties.

H. McLean of Sunbury reported crops up to the average.

H. Emery, of Carleton Co. reported crops good except buckwheat.

Donald Innis of Victoria county reported one cheese factory in operation in the Danish settlement, and it had been made a success through the united efforts of the farmers.

Robert Lamb reported for Westmorland and stated the red cob seed corn was not adapted for ensilage as it matured too late.

Reports were also received from delegates from Kings, Kent and Albert.

Mayor Berkwith addressed the meeting and in a neat speech welcomed the farmers to the city, and complimented them on the rapid growth of the association.

After the secretary had submitted his report, the corresponding secretary presented his, at the same time pointing out the work connected with that office had grown so enormously that it was absolutely necessary to have a secretary who would be independent of other work. Mr. Baxter thought it would be well to follow Ontario's example and pay a secretary to devote his whole time to the work.

The corresponding secretary was tendered a vote of thanks for his energetic and faithful work.

The by-law committee submitted their report. There was considerable discussion on the question of fees, which had been fixed at \$1 entrance with a subsequent annual fee of 50 cents. The thread of the discussion was all towards fixing the fee at \$1 annually, and finally an amendment of Mr. Reid's to that effect was carried.

Some reports from other societies having been read the meeting adjourned until evening.

The subject for discussion at the evening session was agricultural education, and was ably handled by W. W. Hubbard, the president, Mr. Owens, Messrs Howard Trueman, Geo. E. Baxter, G. M. Trueman, J. N. Sloat, D. P. We more, Dr. Inch and Mr. Mullen.

Mr. Hubbard said the New Brunswick soil is its principal source of wealth; that more people are engaged in farming than any other occupation; that the prosperity of the town depends upon the prosperity of the country. He thought the young people should be taught agriculture in the common schools.

The president followed making a few interesting remarks, after which Mr. Howard Trueman read a very instructive paper. He like Mr. Hubbard favored education for the farm beginning in the common schools. He advised throwing out some of the more formal courses in the schools, and supply the practical instead.

Mr. Britain read a paper by G. S. Trueman which contained some very instructive remarks.

Mr. Sloat in his remarks, illustrated how a large number of the young people were driven from the farms through the ignorance of their elders. Dr. Inch followed and delivered a most interesting address. He referred to some of the former speakers who spoke unfavorably of the attitude taken by teachers with regard to the farming interests, and he showed clearly that it was not the teachers but the farmers themselves who are the cause of their children not being satisfied on the farm. Home life should be more attractive and as much of the drudgery as possible taken from farm life. He emphasized the fact that if agriculture was to have special attention in the schools, other claims of special education could not reasonably be refused.

Mr. Mullen followed and in closing extended a cordial invitation to all present to visit the Normal School.

Shortly after 9 a. m. Thursday morning Mr. Hartt, of the Dominion dairy station, opened the proceedings by a practical illustration of the Babcock milk test. Eight samples of milk from Z. R. Estey's herd were tested and the result showed a percentage of fat ranging from 5.55 to 3.7 per cent. One sample of skim milk was tested. The milk had been set in ice water twelve hours, then skimmed, and the skim milk was found to contain 1.2 per cent of fat, or nearly 1/4 of the butter fat was proved to have been left in the milk by the deep setting process.

An Alpha de Laval hand separator was then operated. Mr. Hubbard gave a very clear explanation of the principles of the machine, and recommended that make of a separator.

During the exhibition of the separator Mr. Peters had been operating his dairy churn on the completion of the churning he gave the audience an illustration accompanied by practical remarks of how good butter should be made at home.

The afternoon session scarcely began when Prof. Robertson dairy commissioner; Prof. Fletcher, entomologist and botanist of the General experimental farm, and Col. Blair, superintendent of the Experimental farm at Nappan, amid great enthusiasm, took their seats on the platform. The two hundred additional chairs provided were soon filled, and an audience of three hundred listened to the distinguished speakers.

Mr. Alward first read John Robertson's paper on the position of dairy work in New Brunswick, and was followed by Mr. Hartt in an instructive address on the essentials to success in co-operative dairying.

Prof. Robertson, who next addressed the meeting in his inimitable way, was listened to with absorbing interest, while Prof. Fletcher, who rose to make a few remarks on insects as they affected dairymen and stock owners, aroused such an amount of interest that owing to repeated questions it was some time before he could take his seat.

Yesterday the association discussed the several branches of sheep raising, in which Messrs Robert Brown, Northampton; H. B.

Trueman, Point de Bute and F. C. Powys delivered able addresses. Particular attention was directed to the dog nuisance in the discussion which followed.

David C. Parent, Queens Co. handled the question of "Corn growing and making of ensilage in York county" in a manner that showed he was thoroughly acquainted with his subject.

A general discussion followed. Several papers were read on fruit growing, after which Prof. Fletcher Dominion entomologist, Ottawa delivered a very able address on "Enemies to fruits and how to fight them."

The following officers were elected for the ensuing term; Thomas A. Peters, Hampton, President; James N. Sloat, Centreville, Vice President; C. L. S. Raymond Woodstock, secretary; W. W. Hubbard, cor. sec'y

County vice presidents: for Kings county—D. P. Wetmore, Clifton; Westmorland—James Frier, Shediac; St. John—Robt. McLeod, St. John; Queens—S. L. Peters, Queenston; Albert—C. M. Peck, Hopewell Hill

Kent—Augusta Legere, St. Louis; Charlotte—J. Davidson Grimmer, St. Andrews; Gloucester—P. J. Power, Bathurst Village; Sunbury—Henry Witnot, Oromocto; York—Isaac Peabody, St. Marys; Carleton—H. Emery, Jacksonville; Victoria—Donald Innis, Tobique River; Restigouche—John Barbarie, Dalhousie; Northumberland—Thos. Parker, Blackville; Madawaska—Levite Theriault, M. P. P., Edmundston.

The benefits derived by our farmers from this association are becoming fully appreciated throughout the province and to-day it is in a flourishing condition, and rapidly gaining the sympathy and support of all.

OVER 1,000 LIVES LOST.

Details of the Burning of a Chinese Temple and the Awful Loss of Life.

SAN FRANCISCO, Jan. 21.—The Celestial Empire, an English newspaper of Shanghai, which arrived here yesterday, contains some interesting details of the disastrous temple fire near Canton, China, which resulted in the death of over 1,000 people. These additional facts show that the brigands who started the fire did not do it in the heat of anger over an unsuccessful raid, but waited until the following night. On the night before the fire the brigands attempted to rob a theatre, in which was being held an exhibition to the Tin Hau goddess. The gold and silver ornaments excited their cupidity, but soldiers on guard beat them off, wounded several and captured one. The next night while the temporary theatre was crowded fire was seen on the roof. The house was made of matting and bamboo, and in a moment was a roaring mass of flames. Many were badly burned by falling bamboo, and those not severely
