NEWS FROM THE COUNTY.

CENTREVILLE.

Verily must the farmers heart be glad for the heavy rains of the past week have thoroughly soaked the ground and rendered the fall ploughing an easy matter to what it, otherwise, would have been.

Our sportsmen still continue to hunt for the nimble deer and the festive partridge. So far the most successful and luckiest one has been Mr. Leverett White. While out shooting a few days ago on the rear of the widow Mackay's lot, he noticed a deer, that had evidently been wounded, among the cows in the pasture. Having neither rifle nor ball cartridge he decided to pursue it on foot. Being very swift of foot and possessing great physical endurance he succeeded in capturing his game and bringing him safely home. Mr. White is very proud of his prize and takes much delight in showing it to his friends.

The Mock Parliament which was conducted so successfully last winter will be opened again, and the many political strangers during the summer will afford an opportunity for some spirited and interesting discussion.

Mr. Alf Lee's youngest son is very ill with cholera infantum. Dr. Baker is rendering all medical assistance possible and hopes to pull the little fellow through all right.

Mr. John Simonson's hen roost was visited the other night by some unknown parties. They must have been disturbed in their midnight prowling, however, or else got alarmed at the squawking of the hens for none were missing in the morning, although feathers were scattered all over the ground. It is believed that these are the same parties that stole two young pigs from Howard White's pig-pen last week. A careful watch is being kept on certain suspected parties, and if they are caught they will be severely dealt with.

RICHMOND.

BATH.

Rather than have the Imp trailing after us through this depth of mud, I thought best to get a move on and send in a few stray items.

The farmers here are glad to see such a long needed rain, but they are saying in an under tone that it would be more profitable to have the potatoes dug, as they are selling like hot cakes.

As we take a view of the landscape brightened

Good News for Tipplers.

A bottle that cannot be filled after it has been emptied has just been invented and promises to be of great importance to the entire bottling industry. The great bottling houses have for years looked in vain for such an invention, to render it impossible for swindlers to refill their bottles with fraudulent preparations, which has become a lucrative business. Empty bottles, branded with the names of popular drugs, liquors, bitters and chemicals have been filled with cheap and worthless substances and the original manufacturers have suffered in consequence.

Three years ago a large prize was offered in England for an invention that would successfully overcome this kind of fraud, and hundreds of attempts have, in consequence, been made, but, until now, without success.

The principal feature of this new bottle, which is the invention of Joshua V. Van Name, of Staten Island, is a peculiarly constructed passage, and works automatically, and by hydraulic force. The moment any liquid is attempted to be forced into the bottle the valve instantly closes.

A point of importance is the extreme simplicity of the device. The valve is located at the very shoulder, of the bottle, and is especially constructed to prevent the insertion of any instrument. The device may be fitted into barrels, casks or demijohns, as well as bottles. It has already been patented in this country, and applications have been filed in Europe.

Concerning Powder.

Ruskin, I think it was who said "with the invention of powder all chivalrous warfare came to an end." He meant gun powder, and not tooth powder. With the invention of the famous Trilby Tooth Powder by Dr. G. B. Manzer it became possible for one to keep one's teeth like ivory and one's breath like the odour of violets, with very little trouble. When you are at the exhibition that opens here to-day don't neglect to see Dr. Manzer's exhibit. He will show a huge bottle of Ildonthurt the famous harmless anesthetic, a quantity of Trilby Tooth Powder, some samples of his own artistic work in artificial teeth, crowns and bridges, and he will also have on exhibition a teething ring of his own design and invention. Dr. Manzer's intimate knowledge of the jaws and gums of infants as well as adults has enabled him to devise a teething ring that is superior in every way. Any one person who has an interest in dental surgery might be interested in looking over Dr. Manzer's exhibit, and later, might call on him at his dental office at 29 main St. where they can receive relief from any trouble of the teeth or gums.

Archbishop Martinelli Arrives at New York.

NEW YORK, Oct. 3.—Martinelli, Archbishop of Ephesus, the recently appointed apostolic delegates to the United States to succeed Cardinal Satolli, was among the passengers on the Cunard liner Campania, which arrived this morning. The archbishop is a short and slender man. He has a swarthy complexion, piercing black eyes and black hair, slightly gray. He is very graceful in his action and has an attractive manner while in conversation. He speaks English fluently. He was told that there was the impression in this country that he was the bearer of a number of messages of promotion by the Pope. To this he replied that he knew nothing of any promotions and if there were any to be made they would be forwarded later to the delegation at Washington. In answer to the question as to whether or not he would follow the policy laid out by Mgr. Satolli he said that would depend entirely upon circumstances.

The Czar in Scotland.

LONDON, October 3.—Since the Czar's ascension to the throne there have been many reports of the change in his disposition, he having become grave and taciturn, as though he felt the burden of his responsibilities resting heavily upon him. Reports from Balmoral, where he and the Czarina are now visiting the Queen, confirm these statements. His manner is extremely retiring and quiet, and he appears to prefer the company of the ladies of the royal household to that of the Prince of Wales and the other notabilities now present at Balmoral in his honor. Since his arrival His Majesty has had but one private interview with the Queen. This lasted for half an hour. In some quarters attempts have been made to attach political significance to the interview, but it is generally believed that nothing but personal and family matters were discussed. It is not at all likely that any information on this subject will be vouchsafed to the public. The Czar does not appear to take the slightest interest in the deer stalking that has been arranged for him.

The use of Hall's Hair Renewer promotes the growth of the hair, and restores its natural color and beauty, frees the scalp of dandruff, tetter, and all impurities.

The Two Gladiators.

McKinley and Bryan are entirely opposed to each other as to their methods of carrying on the campaign. The former believes in the power of silence; the latter thinks speechifying is a great thing. The ordinary observer would be led to think that each candidate carries his view to an extreme. The Bryan papers are giving the record of the number of speeches their man has delivered. Up to a week ago, he had spoken 208 times. He had addressed audiences in 172 cities and towns. He had spoken, it is estimated, 230,800 words. The number of speeches delivered by all other candidates in the Democratic interest, is put at 166.

From McKinley, we hear nothing of long speeches. What he does have to say is, however, generally pretty well to the point. His strength, however, is in his silence or that is the card, he seems to regard as his triumph.
