A feeling of sadness clouded the village on Friday morning last when it was learned that the heavy rain on the night before had carried away with it, three of our worthy butcher's best pigs, and was supposed to have done so. Miss Bessie McCain is out of the village for a few days.

E. Hamington went to Glassville a week or more ago and has not yet returned.

For the evening of the 20th your correspondent would like a girl to go to the chicken supper with him, must have a good appetite and good sized feet, for it is awfully muddy and if her feet were not large I might have to carry her, and I wouldn't want to do that you know. Leave orders with your photo at the advertising agency.

Rubbing It In.

Never use a liniment for rheumatism, says a high medical authority. Don't rub it in—drive it out.

Take something that removes the acid poison from the blood—take something that will improve your digestion, and build up the body to the perfection of robust health. That "something" is Scott's Emulsion.

A remedy that obtains the best results in the shortest time. \$1. of all druggists.

When we are not too anxious about happiness, but devote ourselves to the strict and unsparring performance of duty, then happiness comes of itself—nay, even springs from a life of troubles and anxieties, and privations.

CANADIAN SUCCESS
RECOGNIZED ABROAD

An American Company Organized
with Offices at Buffalo

A MILLIONAIRE BANKER.

At the Head of the New Company—The fame earned by Dodd's Kidney pills in Canada wins the confidence and Capital necessary for a Solid Syndicate.

At a time when most business men are resting on their oars, pending the result of the election, it is interesting to report the details of a new organization that promises to enlarge Buffalo's reputation as a business center, and bring many thousands of dollars here for local distribution. This has reference to the Dodd's Medicine Company, with a suite of offices in the Ellicott Square Building, substantial business men in control, and ample capital at its back. Nothing of the kind in recent years begins to equal the importance of such a business in its relation to the community. The new company has been organized for the manufacture of Dodd's Kidney Pills, a remedy that has won fame and fortune over in Canada, and that comes to the United States in response to a well defined demand. There is nothing fictitious about the preparations and nothing doubtful about its results. It is claimed to be a supreme and complete triumph, backed by thousands of legitimate testimonials and endorsed by men and women of more than average intelligence. Because it comes from Canada, it is none the less a triumph. It has won its spurs over there.

There is no more progressive business in Buffalo than the big World's Dispensary, and there is every reason to anticipate similar activity in connection with the manufacture of Dodd's Kidney Pills. Every condition fully warrants it. The new company represents men of large experience and business ability, with the Hon. F. G. Babcock of Hornellsville as president; Mr. J. A. McKee of Toronto, as vice-president, and Mr. Blinn Yates as secretary and treasurer. Mr. Babcock is president of the Bank of Hornellsville, owner of the famous Babcock Stock Farms once the home of the mighty Smuggler, and the present home of the beautiful stallion Voodoo, for which Mr. Babcock paid \$24,000, when it was about 24 months old, and about 60 more of the finest blooded stock in the country. Mr. Babcock is a man of vast business interests, and one who has been wonderfully successful in everything he has undertaken. The Elmira Telegram calls him "a wealthy and public-spirited citizen and just the kind of a man to make a place famous and prosperous." The development of this new business will give him a direct interest in the growth and prosperity of Buffalo, and will turn to our advantage in more ways than one. Mr. McKee is president of the Dodd's Medicine Company of Canada, whose energy and enterprise have made Dodd's Kidney Pills famous throughout the length and breadth of the Dominion. Mr. Blinn Yates is manager of the Buffalo office of the Charles H. Fuller's Newspaper and Magazine Advertising Agency of Chicago and New York, and has recently removed here from New York City.

The new business starts out under the most favorable auspices, with no possible question as to its success and with every intention of making things hum. It is easy to see that Buffalo is fortunate in being made headquarters for the States. It means steady work for scores of people, and no end of free advertising for the city.

The average dairyman can easily waste more than one-fourth of the feed given to the cows, by feeding it in such condition and in such proportion of essential elements that the cow cannot fully utilize it. It also results in a waste of the vital energies and productive power of the cow, spending unnecessary energy in chewing and digestion.
