POTATO DIGGING. It is about time to begin digging potatoes. Farmers this year can hope for better prices, but the outlook is somewhat clouded by the slackness of the crop.

It is a strange thing that with all the successful inventions of farming machinery, a really workable potato digger does not yet seem to have come to the front.

The Truro News contains an item that will be read with interest by all agriculturists:

"In this issue will be found an advertisement, without a doubt, the first of its kind that has ever appeared in any paper in this province, viz., that of Mr. William Reinmuth, of Valley Station, who will engage to dig potatoes for farmers, at the rate of about three acres per day.

THE WONDER OF THE AGE.

DEAR SIR, I must honestly say that I have tried your valuable medicine B. B. B. for the disease called prairie itch, and have found this remedy to be the wonder of the age.

HAROLD DIX, Rat Portage, Ont.

Unconscious Humor.

"What are you laughing at?" said a man with chin whiskers to a youth who stood beside him at the corner of Superior and Seneca streets yesterday morning.

PROOF FROM THE PEOPLE.

Mr. Geo. Buskin, missionary for the International Mission in Algoma and North-West. He writes: "I wish to say that Dr. Fowler's Extract of Wild Strawberry has been to me a wonderful, soothing, speedy and effectual remedy."

LIGHT OF THE FUTURE.

Will Be a Tube of Phosphorescent Material Aided by Cathode Rays.

The Sanitary Plumber tells us that present methods of illumination are to be superseded, not by improved incandescent or arc lamps, not by glow tubes, like those of Tesla or Moore, nor even by Edison's lamp in which the Roentgen rays fall on a phosphorescent substance and cause it to glow—although this last comes nearer than any of the others to the coming system.

The experiments which, according to the European press, are now being made by the Austrian physicist, Puluj, whose researches and discoveries in the domain of what is known as "cold light" have given him prominence and standing in the scientific world.

Professor Lodge, who is the head of the department of experiment of experimental physics in universal College, Liverpool, says that "if mechanical energy can be converted entirely into light alone, one man turning the crank of a suitable machine could generate enough light for a whole city."

To produce light without heat is to perfect a system in which all of the producing energy will be turned into light. As our electric lighting system now exists, only from 1 to 3 per cent. of the energy is expended in light.

Puluj's lamp is not operated by dynamos or storage batteries. It operates with a different kind of electric current. It is lighted by means of an induction coil, or a glass plate electric machine. The static electricity thus produced is the same in every respect as lightning.

BRIGHT'S DISEASE.

"They have done me any amount of good," were the words of Mr. Nelson Green, Galt, Ont., in speaking of his rescue from kidney and urinary difficulty by the use of Doan's Kidney Pills.

DR. CHASE'S OINTMENT

MR. THOS. DOLPHIN, TARA, ONT., says: "I had Itching Piles for about ten or twelve years, and tried everything I could hear or read of, and found that nothing did me any good."

THEY DO GOOD WORK.

The following letter tells what people think about Laxa Liver Pills: DEAR SIR, I gladly testify to the virtues of Laxa Liver Pills.
