

HOLLOWAY'S Red Blood Syrup Great English Remedy

For Pale, Weak, Nervous Persons, or the one with a Consumptive Tendency.

This is no new tried remedy, but has stood the test of time and experience, and so great is the faith in this preparation that dealers are instructed to refund the money, in all cases, when after using the prescribed dose for ONE WEEK and are not satisfied with its results.

All Diseases of the Blood readily yield to its curative properties, and it never fails to do its work in cases indicated above.

In cases where the constitution has been Run Down by Overwork, it is a Specific.

It is pleasant to the taste and is readily taken by children. This preparation is equally good for the Young, Middle Aged and Old.

Hundreds of testimonials have been received as to its Wonderful Curative Properties wherever used, and in no case has it ever failed to cure or benefit the user.

E. D. R. Phillips, Bath;

John McIntosh, Bristol,

CONNELL'S DRUG STORE, Woodstock.

Tesla on Water Power.

In view of the discussion that is now going on in regard to the development of Niagara Falls power on the Canadian side of the river, some remarks of Nikola Tesla, made at the recent banquet held in Buffalo to celebrate the transmission of electricity from the Falls to that city, will be of interest. Mr. Tesla believes that water falls constitute the most valuable of all our sources of energy. He hopes that Toronto and Hamilton will soon follow Buffalo's lead in the utilization of Niagara Falls power. The greatest electrician in America does not look upon the long distance transmission of electricity as an experiment. In the light of Mr. Tesla's remarks the sale of the Niagara Falls franchise for \$25,000 a year seems to be a great mistake. We quote from the speech he delivered at the Buffalo banquet:

"Having examined for a long time the possibilities of the development I refer to, namely, that of the operation of engines on any point of the earth by the energy of the medium, I find that even under the theoretically best conditions such a method of obtaining power cannot equal in economy, simplicity and many other features the present method involving a conversion of the mechanical energy of running water into electrical energy and the transmission of the latter in form of currents of high tension to great distances. Provided, therefore, that we can avail ourselves of currents of sufficiently high tension a waterfall affords us the most advantageous means of getting power from the sun sufficient for all our wants, and this recognition has impressed me strongly with the future importance of the water power, not so much because of its commercial value though it may be very great, but chiefly because of its bearing upon our safety and welfare. I am glad to say that also in this latter direction my efforts have not been unsuccessful, for I have devised means which will allow us the use in power transmission of electro-motive forces much higher than those practicable with ordinary apparatus. In fact, progress in this field has given me fresh hope that I shall see the fulfilment of one of my fondest dreams, namely, the transmission of power from station to station without the employment of any connecting wire * * * In the great enterprise at Niagara we see not only a bold engineering and commercial feat, but far more, a giant stride in the right direction as indicated both by exact science and philanthropy. Its success is a signal for the utilization of water powers all over the world, and its influence upon industrial development is incalculable. We must all rejoice in the great achievement and congratulate the intrepid pioneers who have joined their efforts and means to bring it about. It is a pleasure to learn of the friendly attitude of the citizens of Buffalo and of the encouragement given to the enterprise by the Canadian authorities. We shall hope that other cities like Rochester on this side and Hamilton and Toronto in Canada will soon follow Buffalo's lead. This fortunate city herself is to be congratulated. With resources now unequalled, with commercial facilities and advantages such as few cities in the world possess and with the enthusiasm and progressive spirit of its citizens it is sure to become one of the greatest industrial centres of the globe."—Toronto World.

KARL'S CLOVER ROOT will purify your Blood, clear your Complexion, regulate your Bowels and make your head clear as a bell. 25c., 50c., and \$1.00.

Keeping Toes and Fingers Warm.

Some men whose work is out of doors and in one fixed place, as for instance at a starting or switching or transfer point on a street railroad, provide themselves in winter with mats to stand upon to keep their feet off the street pavements. Sometimes in stonepaved railroad stations, in the open part of the station, at the gates leading to the train platforms, a gateman is seen standing on a mat.

In the city one may sometimes see vendors who have a fixed place of business standing on a piece of board laid upon the sidewalk. It may be a well-worn piece, upon which the vender has been standing for several years in winter time, putting it away in the stand at night and getting it out regularly in the morning.

Keeping the feet off the cold pavement tends greatly to the comfort of one who must stand long in one place out of doors in winter. Occasionally one sees vendors or men engaged in some outdoor work who go further than that—who have outdoor furnaces wher at to warm their fingers and toes.

Much of life's misery is due to indigestion; for who can be happy with a pain in his stomach? As a corrective and strengthener of the alimentary organs, Ayer's Pills are invaluable, their use being always attended with marked benefit.

The Childhood of Genius.

As far as I have studied the childhood of genius, it commonly shows itself less in performance than in character, and, alas, not agreeably! The future genius is often violent, ferocious, fond of solitude, disagreeable in society.

The great Du Guesclin, the scourge of the English invaders of France, was a most odious boy. His parents had to make him dine at a table apart. He was rude, furious, a bully; he beat every boy he could lay hands on; he ran away from home; he led companions of peasant children against other companions; he was the terror of the neighborhood, and the ugliest page, as he became "the ugliest knight of France." This was the boyhood of a great military genius; the boyhood it was of a little savage.

Scott's childhood was noisy. He yelled old poems at the top of his voice. He loved the lonely hills. He read forever, when he was not wandering alone, and he remembered anything that he read. He was a dreamer, a teller of romances to himself. He delighted in fighting, as did Keats. He studied everything except his books. His enthusiasm for poetry made a lady recognise him for a genius at the age of six, but his father thought he would end as a strolling fiddler.

Napoleon, again, was sullen, lonely, a dreamer, and always "spoiling for a fight," like Du Guesclin.

Unluckily, sullen, dreamy, pugnacious boys are not at all uncommon. They do not become Scotts (not that he was sullen), nor Du Guesclin, nor Napoleons, nor Byrons—for Byron, too, was a passionate, lonely, morbid kind of boy, with terrible fits of temper. His early poems were trash.

Shelley's early poems were trash; Scott's were as almost any cleverish school-boy can write, and there is no promise at all in the Tennysons' 'Poems by Two Brothers.'—Andrew Lang, in North American Review.

A REMEDY

FOR THAT MOST

DISTRESSING MALADY

REV. J. M. McLEOD,

Zion Church, Vancouver, B. C.—"It is nearly three months since I finished the package of K. D. C., and though I have for more than twenty years suffered from indigestion that one package seems to have wrought a perfect cure. Since taking your remedy I have not had the slightest symptom of a return of my old enemy. It affords me much pleasure to recommend K. D. C. to the numerous family of dyspeptics as the best known remedy for that most distressing malady." Sold by Druggists at 35 cts. and \$1.00 per bottle.

Wanted: A Giant.

"The giant I want to look at," Said Bobbie, "must be so tall It'll take me a week and two other days To look at him all!" —Harper's Round Table.

A WELL KNOWN LADY.

How She Suffered.—How she was Cured.—Woodstock People Ought to Know.

MESSRS. T. MILBURN & Co., Toronto, Ont.

Gentlemen, For many years I have been afflicted with palpitation of the heart accompanied by pain in the breast, and a dizzy sensation on rising quickly. My appetite was poor, and I could not relish my food so that I became completely run down. Many a long and sleepless night have I passed, and the nervous weakness and general debility from which I suffered intensified my misery. My attention was called to Milburn's Heart and Nerve pills and I started to use them. I have only taken one box, but feel a wonderful change in my condition. My appetite is fully restored, and the refreshing sleep, to which I was a stranger for so long a time, has again returned to me. I can recommend them as a true nerve tonic, and feel assured that anyone using them for any of the troubles I have mentioned will derive most gratifying results.

Marvels of The Ocean.

The makers of ancient maps were accustomed to introduce pictures freely. In deserts there would be drawings of lions, and along rivers they made "river-horses,"—which is the meanings of the Greek words that were put together to make up "hippopotamus." As for the oceans, they were filled up with any queer monsters that come to hand. Of course these pictures helped to hide great spaces that would otherwise have been staring blanks.

Besides, men understood very little about the strange happenings in the world around them, and invented fairy tales tables to explain these mysteries. It is not remarkable, then, that so late as Columbus' time his sailors did not at all like to think of sailing westward into an unknown ocean full of fabulous creatures and magic happenings. Even with all that wise and studious men have learned since, there is enough to be met with in a long ocean voyage to excite wonder and alarm.

Sailors may see auroras, the strange "Northern Lights," the cause of which is now only guessed at; they may be surrounded by water-spouts, which are not entirely explained as yet; they may meet "tidal" (that is, earth quake) waves, that rise from thirty to sixty feet, or even more, above the surface; they may be amazed by "St Elmo's fire," the sparkling flames that play about masts and rigging; they may behold lightning in globe-form, sheet flashes, or forked bolts; they are sure to sail through the phosphorescence that has but lately been traced to animal life. Then, too, storms and calms, fogs and moonlight, bring strange sights. Altogether, the ocean is a wonder and that has new marvels every day; the very color of the sea is hardly twice the same.—Tudor Jenks, in St Nicholas.

Instead of buying molds for jellies, puddings and blanc mange look over the dishes and see if something prettier than the stereotyped cannot be found. Mold desserts in individual shapes rather than in one large form.

Overshoes, Gum Rubbers, Larrigans, Moccasins.

Our winter stock did not move out quite as rapidly as we expected, and we must sell it in order to make room for Spring Stock. We can give you cold weather goods at prices that you can scarcely see without a microscope. We can't give these goods away, of course, but will do the next thing to it.

J. FRED. DICKINSON,

Corner of Main and Connell Streets.
