The heartfelt sympathy of the community is extended to Geo. Gilmore of Esdraleon, in the recent loss of his wife, as well as to her parents, Mr. and Mrs. Andrew Long, of Carlisle. The late Mrs. Gilmore was one who won golden opinions from all, suddenly stricken down in the bloom, and full of the hopes and aspirations and prospects of this life, but we may say another kind and affectionate wife and mother, has passed to the eternity from whence she came, lamented and missed by a large circle of relatives and friends.

Rev. J. Calder preached in the Primitive Baptist Church here on Sabbath last and in the Union Church in the evening of the same day.

The lumbering operations on the Miramichi and Nashwaak have been already begun several weeks.

Messrs. Avery Bros. of Knowlesville, have contracted to furnish oats, hay, &c., for the several parties cutting logs for Alexander Gibson on the Nashwaak. They pay a fair price for oats, &c.

The farmers are looking long and anxiously for snow enough to enable them to transport their hay and grain to the far off tributaries of the Miramichi, called by the portagers, the Klondike of the Miramichi, not for its wealth of gold, for it resembles the McAdam Junction county with plenty of stoves large and small, but for the hardships endured by men and teams in hauling over a portage road 80 miles, scarcely surpassed by the primitive passes on the way to the Klondike of the Yukon.

The Shaw Brothers with one of those Tornado threshers, manufactured by Connell Bros., have been doing some fine work in this section.

Two more marriages were solemnized here last Saturday, thus swelling the list to about fourteen of those events which have taken place in this town since August last.

It has been the custom in Fort Fairfield for years past to have a Thanksgiving play by local talent. This year however it was impossible for the company to get a play ready in time, but the day did not pass by without some recognition. An able committee of the '99 chorus got up a "Social Hop" which proved the most successful and brilliant dance held in this town for the past two years.

About forty couples were on the floor, and went through an order of 16 dances to excellent music rendered by Churchill's Orchestra, who were on several occasions, encored.

The cottage meetings held by the Sunday school teachers and others on Tuesday evenings, are being well attended.

Joseph A. Wolverton returned home on Saturday from a very pleasant trip to Boston.

Miss Fannie Ives who is teaching in Southampton spent Thanksgiving, and the three days following, at home.

**Making Soldiers.**

If you want to know how a man enlists for the British army, come round with me to St. George's barracks and I will show you. Close to the medical officer's desk is a thick, padded carpet, about a yard square. A machine for measuring the height stands in a left-hand window, and a weighing machine is about a couple of yards from this. When the soldier in charge of the door sees that the nicely-scrubbed form is empty, he orders John Smith to strip. John Smith coys sidles into the room and gingerly sits down on the form, followed by several other recruits in the same primeval costume, who perch beside him like shivering fowls. As soon as the recruit is comfortably seated, the medical officer takes up the printed "notice" paper and calls out "John Smith." The sergeant in charge of the height machine shouts with military brevity:—"On to the mat, John Smith," and John Smith, trying to look as big as possible, and blushing at this ruthless inquiry into his physical peculiarities, walks to the mat and tumbles the calf of his left leg with the toe of his right foot in a hanging way. The medical officer holds up a small card on which are some black spots. With a perfectly plain card he covers over some of the spots. "How many?" he asks briefly.

"Three five," "How many?" again asks the doctor, shifting the card. "Five, sir."

The sergeant moves his hand to John Smith's left eye, and the same process is repeated. "Kneel down—both knees at the same time. Spring up on your toes. Put out your hands. Open them out. Clench your fist. Turn round. Touch your toes with your fingers. Get up."

The recruit performs all these evolutions with the exception of springing up on his toes. "That's the result of bad boots," the doctor whispers to me. He sounds John Smith's heart and lungs, opens his mouth to see what kind of teeth he has and suddenly asks him whether he has ever had fits. "Not till that cove give 'em to 'im just now," whispers one naked recruit to another. "Ain't 'e gittin' a gruellin'?" Crule, I calls it. Crule!"—G. B. Burgin in Pearson's.

**Cucumber Wood Pumps**

**ANTI-FREEZING.**

It is well known that a wooden pump is a non-conductor of both heat and frost, and that the temperature of water drawn through a wooden pump is delivered of the exact temperature of the water supply. Exposed metal pumps get very hot in summer and freeze in winter.

The Furbur Cucumber Wood Pumps are made of fine grained wood for deep and shallow wells. They are made in lengths, 8, 10, 12, 14, and 16 feet, enabling them to be set well below the frost line, and are fitted with iron cover and iron spout; they have a convenient and simple frost slide, which in winter is raised after pumping to let the water below the frost line, and closed before pumping again. They have porcelain lined cylinders and fast valves. They are the only wooden pumps that have ever given first class satisfaction. There are other wood pumps on the market that dealers say are as good as the Furbur, but do not be deceived, purchase only the genuine Furbur pump.

We have a full assortment in stock at present, and our prices are right.

**The Preacher's Growing Family.**

[From the Hartford Courant.]

The Rev. and Mrs. J. Richardson of Eastford have six children, all under 2 years of age. Before the oldest child was 1 year old Mrs. Richardson gave birth to triplets, and before they were 10 months old there came twins to bless the family. This event happened last week. This makes six children born to the same parents within two years, and all are well, bright and healthy.
