## ACETYLENE

### The Coming Light!

We are lighting our store with a "Safety" Acetylene Machine and it is "All Right."

We have the agency for Carleton and Victoria counties for this celebrated machine, and we will be pleased to figure with parties desiring a good machine. Give us a plan of the building or rooms you want lighted and we will estimate the cost of machine and plumbing.

The light has to be seen to be appreciated, it is easy on the eyes, no dust, no smoke, no lamps to clean and no chimneys to break. The machine is no experiment, there are 22 of them in successful operation in the Maritime Provinces alone.

The machine is very easy to clean and recharge; in fact everything about the machine is simple and complete, and they are warranted. Try one.
