Subscription price \$1.00 per year. Advertising rates made known on application. P. O. Box E. Telephone.

CHARLES APPLEBY & T. CARL L. KETCHUM. Editors and Proprietors

WOODSTOCK, N. B., OCT. 11, 1899.

ARE WE STANDING STILL.

A good many people in Woodstock, and outside think the town is at a standstill. We are in the position of a regiment of soldiers, marking time. We go not forward, and are thankful that we are not on the retreat. People who say that we are not progressing, want the papers to keep it quiet. Such people are like the ostrich which hides its head in the sand and thinks, because it can see nothing, no one can see it.

Several visitors, during the exhibition remarked that Woodstock did not seem to be making the same progress it was making years ago. Such opinions have been expressed, too frequently, to please this journal, which has always contended that Woodstock is going ahead. This town did boom until a couple of years ago. We know of a town not many hundreds of miles away, now little better than a village. One of its oldest residents states that, a few years ago, had its citizens been alive to their duties, it might have been one of the leading towns of the province. The closing of the saw mills has been a serious thing for Woodstock. Some factories which have been started, do not give satisfaction in their management to those who have invested money in them. All such things become noised abroad, and the town suffers.

Recently a leading business man of a neighboring town said to THE DISPATCH, "Why don't some of you people start in buying produce on a big scale and thus prevent the little places above, beating you?"

The answer may be, to run such a business needs much capital, and speaking frankly, there is no hankering desire among the people of Woodstock to venture what little means they may have in stock companies and the like.

They judge by experience.

COLD WATER PEOPLE.

The Exhibition was a great success. This is the verdict of ninety-nine out of every one hundred who were present. It must be satisfactory to the Exhibition promoters, that such happy results followed their efforts, for there were not wanting many persons well fortified with cold water to throw on the exhibition.

Woodstock and Carleton County have a great number of cold water advocates. We would not object if they confined their drinks to cold water, although some of those who talk loudest of the advantage of cold water over Scotch whiskey, prefer the whiskey, on the sly. But we speak just now of the use of cold water in dampening enthusiasm over anything calculated to benefit the town and county, for, be it understood, whatever benefits the town benefits the county, and vice versa.

Cold water was on hand by pails full when the exhibition was talked of. It was near by in hogheads when it was finally decided to hold the fair, and by the time the public meeting of town people was called to further the exhibition, there were puncheons of cold water to be thrown on the proposed undertaking. As an offset to the plentiful distribution of the cooling element, some merchants responded liberally towards the sports, etc., and they deserve special mention for public spiritedness, for the cold water advocates were around, pointing out how the exhibition might, could, would and should be a failure.

However, our cold water friends were disappointed. The weather was against them. The heavens smiled on town and county, lots of people came, all had a good time. Still, they are a dauntless race, these cold water people, and their supply of liquid is unlimited. It is cheap, and beyond a little expense in wordy denunciation there is actually no cost in applying.

Therefore, when we say we are opposed to the cold water brigade, let no uncircumcised heathen think we are against the use of this element as a beverage.

It is only when it is used to drown every effort to advance the interests of our town and county, that we rise in revolt against the misuse of this wonderful provision of nature. No doubt the more stomachs saturated with cold water, the better, and the less cold water thrown on undertakings to advertise our home, and bring the advantages of this excellent spot of the province to the notice of the outsider, the better.

The next time we have an exhibition, the cold water thrower must be treated to a dose of his own medicine.

Warranted the most wonderful Blemish Cure ever known. Sold by Garden Bros.

TWENTY MILLION FALSE TEETH.

Use of Precious Metals and Electricity in Modern Dentistry.

"The man or woman who is much troubled with the necessity of having an artificial tooth inserted," said a dentist, "may take consolation from the fact that there are about 20,000,000 of such teeth manufactured and sold annually in the United States, allowing on an average one tooth every four years to each man, woman and child in this country."

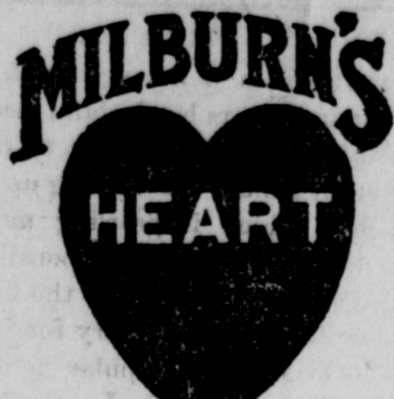

"On the authority of the greatest manufacturer of dental supplies in the country, 40,000 ounces of pure gold are worked up annually for use in filling teeth, in plates and solder, the value of this gold approximating \$1,000,000. In addition there are about 50,000 ounces of platinum used annually by various manufacturers of porcelain teeth, to say nothing of the large amount of silver ver amalgam prepared for inconspicuous fillings, such as those in the back teeth. The number of practitioners has steadily increased until now there are 20,422 dentists in the United States. Even the little towns of Alaska have their dentists, there are being nine engaged in practice in the territory. The majority of these men cannot have very much to do, because 20,000,000 false teeth and \$1,000,000 worth of gold in fillings, etc., divided between 20,422 dentists allowing only about 1000 teeth and a little less than \$40 worth of gold a year to each dentist. As the popular practitioners in large cities use many times these amounts, many of them earning from \$8,000 to \$15,000 a year in the practice of their profession, it will readily be seen that a good many of the smaller ones fall far below the annual average.

The use of electricity has worked wonders in dentistry. Until the discovery of the X rays it was often necessary to remove a tooth in order to learn the nature of some trouble at the root; but now the root and a portion of the jawbone may be photographed by means of the Roentgen rays, the cause of the trouble located, and the tooth generally saved. The average person, however, considers the discovery of what is called dental cataporesis to be of far greater importance to him personally, because of its unprecedented power to deaden pain. Cataporesis is the process of driving anaesthetics into the bone tissue, or dentine, by means of a gentle current of electricity applied to the cavity itself. The method is rather interesting. The cavity if first cleansed as thoroughly as possible without causing discomfort to the patient, and is then closed with a plug of cotton just large enough to fill it without undue pressure at any point. The electrode is placed in the moistened hand of the patient, who is required to grip it just tight enough to secure good connection. The anaesthetics to be used is drawn into the barrel of the syringe and injected into the cotton. The current is then turned on and gradually increased till the proper amount is reached. If complete insulation is secured, the process is not accompanied by sensation of any kind, and the subsequent drilling which is necessary in order to cleanse the cavity prior to filling it can be done without appreciable pain. Without the aid of cataporesis, however, there is no such thing as good workmanship in painless dentistry.

"But the new cataphoric bleaching is even more appreciated by women. The bleaching fluid is driven into the tooth by means of a current of electricity in a way similar to that in which an anaesthetic is driven into sensitive dentine. Even a tooth that has become very much discolored as a result of the improper treatment of a dead nerve may be rendered beautifully white by this means. In fact, electricity is now used by the up-to-date dentist for nearly everything connected with this work. It is used for killing nerves; it propels the treadle for cutting and the mallet for filling; while light is supplied to the mouth lamp and heat to the hot air syringe by the same means.

"The dentist of twenty-five—or even ten—years ago, who had not kept abreast of the times would hardly know what to make of the many improvements in the modern practitioner's operating room. The sterilizer, for instance, into which every instrument is placed after being used, is now considered as necessary a part of the office furniture as the treadle or the hydraulic chair. The certainty that every instrument put into the mouth has been thorough sterilized since being previously used means a great deal to a sensitive patient.

"If dentistry improves proportionately during the last decade, by the middle of the twentieth century women will look upon a visit to the dentist with no greater dread than is now inspired by the prospects of a shopping tour. It is probable, too, that artificial teeth will become more and more natural every year. Even now the bluish white teeth so common a few years ago are seldom seen, and the porcelain fillings which are daily growing in popularity are so indistinguishable in tint and appearance with the teeth of which they form a part that their presence can hardly be detected. Their preparation and insertion, however, require considerable skill. They are generally first shaped to the cavity, then baked, glazed and carefully inserted. The superior beauty of these fillings

AND NERVE PILLS FOR WEAK PEOPLE.

AND THOSE TROUBLED WITH

Palpitation, Throbbing or Irregular Beating of the Heart, Dizziness, Shortness of Breath, Distress after Exercise, Smothering Feeling, Spasms or Pain through the Breast and Heart, Morbid Condition of the Mind, Partial Paralysis, Sleeplessness, Nervousness, Anemia, General Debility, After-Effects of Grippe, Loss of Appetite, etc.

Remember Milburn's Heart and Nerve Pills cure the worst cases after other remedies fail.

Laxa-Liver Pills cure Constipation.

over the conspicuous gold ones is apparent to the people most conservative in adopting new ideas."

A CARD.

We, the undersigned, do hereby agree to refund the money on a twenty-five cent bottle of Dr. Wills' English Pills, if, after using three-fourths of contents of bottle, they do not relieve Constipation and Headache. We also warrant that four bottles will permanently cure the most obstinate case of Constipation. Satisfaction or no pay when Wills' English Pills are used.

The Red Cross.

They too, have heard the drumbeat, They follow the bugle's call, These who are swift with pity On the field where brave men fall.

When the battle boom is silent And the echoing thunder dies, They haste to the plain red sodden With the blood of sacrifice.

The flag that floats above them Is marked with a crimson Sign, Pledge of a great commission And the rifted heart divine

That once for man's redemption Knew earth's completest loss— These to the field of valor Bring love's immortal cross.

And so they follow the bugle, And heed the drumbeat's call, But their errand is one of pity— They succor the men who fall.

Cook's Cotton Root Compound

Is successfully used monthly by over 10,000 Ladies. Safe, effective. Ladies ask your druggist for Cook's Cotton Root Compound. Take no other, as all Mixtures, pills and imitations are dangerous. Price, No. 1, \$1 per box; No. 2, 10 degrees stronger, \$3 per box. No. 1 or 2, mailed on receipt of price and two 8-cent stamps. The Cook Company Windsor, Ont. Nos. 1 and 2 sold and recommended by all responsible Druggists in Canada.

No. 1 and No. 2 sold in Woodstock by Garden Bros. Druggists

The Hartford Grist Mill and Carding Mill

Are Running Every Day.

R. E. HOLYOKE, AGENT, Woodstock.

Wool left in his care will receive prompt attention. We have the reputation of making first-class work.

C. E. VAIL,

WATCHMAKER, JEWELLER and OPTICIAN.

CENTREVILLE.

I am a farmer located near Stony Brook, one of the most malarious districts in this State, and was bothered with malaria for years, at times so I could not work, and was always very constipated as well. For years I had malaria so bad in the spring, when engaged in plowing, that I could do nothing but shake. I must have taken about a barrel of quinine pills besides dozens of other remedies, but never obtained any permanent benefit. Last fall, in peach time, I had a most serious attack of chills and then commenced to take Ripans Tabules, upon a friend's advice, and the first box made me all right and I have never been without them since. I take one Tabule each morning and night and sometimes when I feel more than usually exhausted I take three in a day. They have kept my stomach sweet, my bowels regular and I have not had the least touch of malaria nor splitting headache since I commenced using them. I know also that I sleep better and wake up more refreshed than formerly. I don't know how many complaints Ripans Tabules will help, but I do know they will cure any one in the condition I was and I would not be without them at any price. I honestly consider them the cheapest-priced medicine in the world, as they are also the most beneficial and the most convenient to take. I am twenty-seven years of age and have worked hard all my life, the same as most farmers, both early and late and in all kinds of weather, and I have never enjoyed such good health as I have since last fall; in fact, my neighbors have all remarked my improved condition and have said, "Say, John, what are you doing to look so healthy?"

WANTED.—A case of bad health that RIFANS TABLETS will not benefit. They banish pain and prolong life. One gives relief. Note the word RIFANS on the package and accept no substitute. RIFANS are 10 for 5 cents or twelve packets for 48 cents, may be had at any drug store. Ten samples and one thousand testimonials will be mailed to any address for 5 cents, forwarded to the / Evans Chemical Co., 20 Spruce St., New York.
