**Says he buys American Ears.**  
Sergts. Ross I. Barton and Zimmerman,  
of the 47th Volunteer Infantry, who have re-  
cently returned from the Philippines to their  
homes in Whitestone. L. I., report that  
while in an engagement with the Filipinos  
at Albany, Sergt. Flowers, also of White-  
stone, shot and killed a handsome young  
Filipino lieutenant named Marcus, and cap-  
tured his sword. Lieut. Marcus was a son  
of Marcellus Marcus, a wealthy Filipino,  
who is known all over the Island, and who  
before that had been friendly to the Ameri-  
cans, though his son was not.

The death of son aroused the old man to  
a pitch of the greatest fury, and he swore he  
would spend every dollar he owned to avenge  
his death, despite the fact that young Mar-  
cus was killed in a fair fight, Barton Zim-  
merman says that since Marcus has risen a  
troop of 3,000 and has offered a reward of  
\$100 for every left ear of every number of  
the 47th regiment. This offer is said to have  
brought fruit, for every American killed was  
found to have theirs missing also, which  
shows that the Filipinos are not above mak-  
ing money out of the old man's thirst for  
revenge.

It is stated that Marcus is treasuring a  
string of more than 100 ears, not more than  
five of which could have been cut from mem-  
bers of the 47th regiment.  
Sergt. Fowler is a son of Mr. and Mrs.  
George O. Fowler, of Whitestone. He served  
during the Spanish-American war in  
Porto Rico. His fellow-sergeant says he  
will shortly be promoted to a lieutenantcy.

**A Bad Case of Asthma.**  
Mrs. George Budden, Putnamville, Ont., says—  
"I feel it my duty to recommend Dr. Chase's Syrup  
of Linseed and Turpentine, as I had the Asthma  
very bad; could get nothing to do me any good. A  
friend of mine persuaded me to try this remedy,  
as he had tried it, and it proved successful. I tried  
it, and it cured me. I am thankful to-day to say I  
am a well woman through the use of this remedy.  
I kept it in the house all the time, and would not  
be without it."

**Double Purpose Cows.**  
Some have said that there cannot be a  
general purpose or double purpose breed of  
cattle, says a correspondent of The Prairie  
Farmer. Now, a moment's thought will con-  
vince us that to a certain extent every cow is  
a double purpose cow. The dairy cow to be  
kept in milk must produce a calf at stated  
intervals, and no breed has yet been de-  
veloped that will produce only heifer calves  
or ten heifers to one bull, so she is producing  
some beef besides what she puts on her back.  
Again, the beef animal produces milk usually  
in excess of the needs of her young and is  
therefore a dairy cow. On the grass ranges  
it may be most profitable to select a breed of  
cattle that has exhibited a tendency to put  
on flesh rather than to produce an excess of  
milk. The exclusive dairyman would prefer  
an animal that secretes large quantities of  
milk rich in butter fat. The general farmer,  
however, who has land upon which to feed  
will profit most from the breeds and indi-  
viduals that combine these two tendencies in  
the largest degree. If he does not wish to  
feed beef animals, the calves can be fitted  
for the block without loss of cream and with-  
out a short period of feeding. The large,  
blocky calf commands the best price from  
the first day of its life. If then there is a  
breed which while counted a beef has made  
high records at the fair, that breed is most  
profitable for the farmer. We cannot change  
back and forth from dairy to beef, as the  
market changes, and so should be prepared  
to gain an advantage from those changes by  
our regular method or to make a profit in  
spite of fluctuations that might be discourag-  
ing to the specialist. The same reasons which  
make general farming preferable to special  
farming apply to the selection of a herd of  
cattle—viz, the bringing in of returns from  
several sources and the conserving of the  
fertility of the farm.

**Without Sleep**  
The vitality of the body is soon exhausted. Sleep-  
lessness is one of the symptoms of starved nerves.  
It is a warning of the approach of nervous pro-  
stration or paralysis. Don't be tempted to use nar-  
cotics or opiates. Dr. Chase's Nerve Food will  
gradually build up and reconstruct the wasted  
nerve cells and positively cure all nervous diseases.  
It is nature's greatest restorative, recommended by  
your druggist.

**How to Feed Invalids.**  
In all cases of sickness, the lighter the  
diet is, the better chance will the patient  
generally have of recovery. The more in-  
flammation which exists, the more fruit and  
cooling drinks should be given, and the less  
nitrogenous and starch matter. Ample nour-  
ishment can be provided by milk, farinaceous  
puddings, custards, nut products, dried  
fresh fruits and vegetable broths. The most  
important of these latter is "haricot tea,"  
which is a perfect substitute for "beef tea,"  
being far more nutritious and also entirely  
free from the toxic poisons which are contain-  
ed in that dangerous and superstitiously over-  
rated compound. Dr. Milner Fothergill has  
stated that probably more invalids have sunk  
into their graves through a misplaced confi-  
dence in the value of beef tea than Napoleon  
killed in all his wars. It is practically a  
strong solution of uric acid, consisting largely  
of excrementitious matter which was in pro-  
cess of elimination from the system of some  
animal through the minute drain pipes which  
form an important cleansing medium or  
"sewage system" in all animal flesh to make

**What You Pay  
For Medicine**

**Is no Test of Its Curative Value—Prescriptions Versus Dr. Chase's Kidney-Liver Pills.**

Dr. Chase's Kidney-Liver Pills are  
just as much a doctor's prescription as  
any formula your family physician can  
give you. The difference is that Dr.  
Chase's Kidney-Liver Pills were per-  
fected after the formula had proven it-  
self of inestimable value in scores of  
hundreds of cases.  
Dr. Chase won almost as much popu-  
larity from his ability to cure kidney  
disease, liver complaint, and backache,  
with this formula, as he did from the  
publication of his great recipe book.  
The idea of one treatment reaching  
the kidneys and liver at the same time  
was original with Dr. Chase. It ac-  
counts for the success of Dr. Chase's  
Kidney-Liver Pills in curing the most  
complicated ailments of the filtering  
organs, and every form of backache.  
As a family medicine Dr. Chase's  
Kidney-Liver Pills are unapproached.  
They keep the kidneys, liver, and bow-  
els healthy, active, and regular, and so  
prevent and cure nine-tenths of the  
ills to which humanity is subject. One  
pill a dose, 25 cents a box, at all deal-  
ers, or Edmanson, Bates & Co., Tor-  
onto.

"beef tea." This poisonous element is stewed  
out to form the filthy decoction, whilst  
the animal fibria, the portion of the meat  
that might possess some nutritive value is  
thrown away. Beef tea consequently acts as  
a strong stimulant, tends to increase inflam-  
mation and fever, and in all such cases less-  
ens the chance of the patient's recovery, as  
the system is already battling against disease  
and impurity of the blood. To add to the  
amount of the latter is palpably unwise and  
dangerous. These remarks apply also to  
"essences and extracts of beef."

THOUSANDS OF CANADIANS can vouch for  
the efficacy of that peerless cough remedy,  
Pny-Balsam. It cures a cold very quickly.  
25c. of all druggists. Manufactured by the  
proprietors of Perry Davis' Pain-Killer.

**Literary Notes.**  
McCLURE'S MAGAZINE for November will  
contain a vivid account of the siege of the  
Foreign Legations in Pekin, written as a  
diary by Katharine Mullikin Lowry, one of  
the besieged. It will relate in full many of  
the soul stirring events that we already  
know, and will make clear many incidents  
upon which we have hitherto had little light.  
It will be illustrated with plans of Pekin,  
of the Legation Quarters, and of the British  
Legation.

In McCLURE'S MAGAZINE for November  
will appear an article entitled "The First  
Flight of Count Zeppelin's Air Ship,"  
written by the experienced aeronaut, Eugen  
Wolf, who was Count Zeppelin's assistant in  
his experiments and companion in the trial  
flight. The article explains the construction  
of the air ship and tells the story of its suc-  
cessful trial on July 2nd. The accompany-  
ing pictures are from photographs by the  
author.

In a character sketch of Hanna, in Mc-  
CLURE'S MAGAZINE for November, William  
Allen White will offer a discriminating study  
of the Ohio Senator. He will describe the  
many business successes of the Senator, his  
gradual realization of the connection between  
business and politics, his achievements as a  
party leader, and his relations with Presi-  
dent McKinley. The article will be accom-  
panied by a portrait drawn from life by Jay  
Hambidge.

An article entitled "Making a German  
Soldier," in McCLURE'S MAGAZINE for No-  
vember, will explain the conditions of mili-  
tary service in Germany, will describe vividly  
the life and training of the recruits, and will  
comment upon the effect of universal military  
schooling upon German life and character.  
It will be fully illustrated with drawings by  
George Varian.

The fiction in McCLURE'S MAGAZINE for  
November will be widely representative, both  
in subjects treated and in the localities in  
which the scenes are laid. Life in the Far  
West and on the Eastern Seaboard, in crowd-  
ed cities, in country districts, in turbulent  
mining camps, and in railroad centres, will  
be portrayed; incidents of ward politics, of a  
foot-ball game, of simple, true affection, of  
daring and energy, and of courageous self  
sacrifice, will be related by Frederic Carrol  
Baldy, George Kibbe Turner, Lilian True  
Bryant, Charles Warren, and Alvah Milton  
Kepr. The illustrations are by Frederic  
Remington, Albert T. Reid, W. R. Leigh,  
and others.

THE S. S. McCLURE CO.,  
141-155 East 25th Street, New York.

**B.B.B.  
Cures  
to Stay  
Cured**

The most chronic diseases of  
the Stomach, Liver, bowels and  
Blood.  
Thousands of testimonials from  
those who have been permanent-  
ly cured by the use of Burdock  
Blood Bitters speak of its unfail-  
ing efficacy in Dyspepsia, Bilious-  
ness, Sick Headache, Liver Com-  
plaint, Eczema, Erysipelas, Scro-  
fula, Sores, Ulcers, Boils, Pimples,  
Hives, Ringworms, and all blood  
humors.  
If you want to be cured to stay  
cured, use only B.B.B.

**Queer Uses for Cannon Balls.**

"Cannon balls for blasting!"  
This sign, hung in a conspicuous place be-  
fore the door of a store on Atlantic-avenue,  
led a reporter inside and started a bit of  
questioning upon the subject.

The proprietor said: "Last fall when the  
United States government sold all of the old  
cannon balls and solid shot which for so  
many years was piled in pyramids along the  
main street of the navy yard at Charlestown,  
we purchased a lot of them, with little  
thought of converting them into anything  
beside pig iron. But a few weeks after we  
had stored them here I overheard a quarry  
owner complaining of the slowness and un-  
certainty of the old system of steel wedging  
used in getting out huge blocks of granite  
and after a bit of thought I suggested the  
use of cannon balls in the place of steel  
wedges. We sent about 20 of various sizes  
and weights out to his quarry, and after the  
first trial he hurried a team in here with a  
note that read:

"Tried the cannon balls; they are it. Send  
50 more; have thrown the steel wedges  
away."

"The experience of this man led us to  
send the cannon balls and solid shot to other  
quarry operators, and within the past month  
the orders have been coming in so thickly  
that we can scarcely fill them from the stock  
on hand.

"The method used in getting out great  
cubes or monoliths from the granite and  
marble quarries has been to drive steel  
wedges along the line of the lower portion of  
the split made by a blast until the great  
chunk of stone topples over on its face.

"It required a deal of time and a number  
of men with big iron sledges and steel wedges  
to separate these cubes from the quarry wall  
from which they had been started by the  
blast.

"The method now pursued with the can-  
non balls is to start the block of stone away  
by a light blast, and then between the quarry  
face and the block several of the smaller  
solid shot, usually the 4-inch sort, are drop-  
ped down into the aperture. Two men with  
crowbars give the block a little shake, and  
the instant the block moves in the slightest  
manner forward the shot take up their 'pur-  
chase' on the space made, when the large  
cannon balls, some measuring 14 or 15 inches  
and weighing 200 or 300 pounds, are dropped  
into the top of the gap. Now, the slightest  
outward jar by levers on the big stone send  
these heavy cannon balls dropping downward  
of their own weight, until, with an easy for-  
ward motion, the cube goes over on its face.

"These shot do away with any driving; of  
necessity their great weight in proportion to  
their size forces them downward, and their  
form prevents any chance of backward set-  
ting of the block.

"These cannon balls are also used as roll-  
ers, as they take up and go over the in-  
equalities of the quarry surface, and can be  
rolled in any direction without resetting,  
thus doing away with the old style wooden  
rollers.

"They are also used to smother heavy  
clearing-out blasts. Heavy rope mats are  
thrown over the surface where the blast has  
been set, and these cannon balls are thrown  
on the mats."—From The Boston Daily  
Globe.

**How Russia Corners Sugar.**

Each year the minister of finance fixes the  
amount of sugar which shall be produced in  
the empire and sets the price at which it  
shall be sold. The average domestic con-  
sumption is about 1,000,000,000 pounds.  
This is announced as the legal limit of pro-  
duction which shall be put upon the market  
during the year. In addition to this it is  
allowed to manufacture 180,000,000 pounds  
more, which is placed in storage. The 1,-  
000,000,000 pounds, as it is sold, pays an  
excise tax of 2½ cents a pound.

If at any time, through increased demand  
sugar becomes worth more than the price  
fixed by the government the 180,000,000  
pounds is reserve is allowed to reach the  
market free of excise duty. If this does not  
supply the market at the legal price, the  
government itself will buy from foreign  
countries enough sugar to supply the need  
for a bear influence upon the price. This  
has been done by Russia twice during the  
past ten years. This system, of course, pre-  
cludes any export business in sugar, but the  
Russian government does not believe that  
the exporting of sugar from Russia can be  
made profitable or advisable, so it does not  
encourage it.—Fortnightly Review.

**Cuban Coffee.**

In Cuba coffee is usually roasted at home  
and enough browned each morning for the  
day's supply. It is then ground or pounded  
until almost as fine as flour and placed in a  
course flannel bag from which the woolly  
taste has been removed by repeated wash-  
ings. The bag is suspended from a hook  
over a porcelain vessel and a little cold water  
is poured over it at intervals until the entire  
mass is thoroughly saturated. The first  
drippings which fall into the vessels are  
poured again over the bag and more water  
added from time to time until the dripped  
liquid is black and quite thick. A cup is al-  
most filled with freshly-scalded milk and  
about a teaspoonful of the black coffee ex-  
tract added, giving a delightful drink. Ex-  
act proportions of coffee and water are not  
thought of, but the process of pouring the  
cold water into the bag and allowing it to  
drip goes on all day, the first and best ex-  
tract being used by the family and the re-  
mainder by the servants.

**Itching Piles**

**A Fearfully Bad Case—Much Pain and  
Acute Misery From the Terrible Itching  
—Cured by Dr. Chase's Ointment.**

It is doubtful if any remedy ever re-  
ceived so much grateful, unsolicited  
testimony as Dr. Chase's Ointment.  
The reason is not far to seek, for it is  
the only preparation known to man  
which never fails to cure piles.

Mr. F. G. Harding, a retired farm-  
er, living at Nilestown, Middlesex  
county, Ont., writes as follows:—"I  
have been troubled with bleeding and  
itching piles for four or five years, and  
suffered intense agony at times. I had  
tried almost everything, but could get  
nothing that would give relief. On  
hearing of Dr. Chase's Ointment I pro-  
cured a box, and it only required part  
of it to completely cure me. I am re-  
commending it to all afflicted as I  
was."

Such incontrovertible evidence from  
respectable persons cannot, for a mo-  
ment, be doubted. A few applications  
of Dr. Chase's Ointment will convince  
the most skeptical of its wonderful  
healing and soothing influence. A box  
or two will positively cure the most se-  
vere case of piles; 60 cents a box, at  
all dealers, or Edmanson, Bates & Co.,  
Toronto.
