Canada's Pulp Supply.

Mr. George Johnson, Dominion Statistician who has compiled the statistical pamphlets for the Paris Exposition, makes an interesting calculation based on the forestry reports of 1894. It is estimated that from 38 to 40 per cent. of Canadian territory consists of woodland and forests. That gives a forest area of 1,400,000 square miles, and if half of that is spruce we have about 450,000,000 acres of pulpwood in Canada. By the present methods of manufacturing news paper. a cord of spruce wood, or 650 feet board measure, will make half a ton of sulphate, or one ton of ground pulp. News paper stock is made up of 20 per cent. of the former and 80 per cent. of the latter. It is estimated that an acre of spruce contains on an average about 7,000 feet, board measure, which would make about five and a half tons of sulphate, or 11 tons of ground pulp. If the production of ground pulp be estimated at ten tons to the acre there is the incomprehensible amount of four bilion and a half tons of pulp in sight in Canada. This is below the estimate of Dr. Bell of the Geological Survey, who places the area of the northern forests of Canada at 1,-657,600,000 acres. If half of this is spruce it would yield eight and a quarter tons of ground pulp. Great Britain and the United States consume yearly 900,000 tons of wood pulp, which is the product of 90,000 acres of spruce. If the entire amount were taken from Canada it would take 50 years to exhaust the present supply according to the most conservative estimate. But as spruce reproduces itself to the size best adapted for pulp manufacture in 30 years the problem of exhaustion is evidently in the remote future.

CURED OF CONSTIPATION.

Miss Bessie Nason, Clover Hill, N. L., says: "I gladly recommend Laxa-Liver Pills, as they cured me completely of constipation before I had finished the third box.'

A Church Mystery.

The Indianapolis Sentinel says: "There is a church building in Harrison county, near Corydon, the old capital of the state, which has been, by common consent, abandoned and is now never used. Soon after the building was constructed the sexton securely locked the doors at the conclusion of services one Sunday evening, but when he returned found all the doors standing wide open. At first he gave the matter little thought, thinking that some of the trustees or persons privileged to enter had been there during his absence. He locked them securely at the close of services that evening, and returning, found them wide open as usual. Time and again was this experience repeated, and the sexton began to be puzzled. Night after night vigil was kept but no one ventured near the church, yet when the sexton or trustees would approach the buildings the locks would be found turned and the bolts shot back, giving free access. Effort after effort was made to solve the mystery, but without avail, and now the doors are never locked, as such a proceeding would be useless. The story of the mysterious happenings has become so well circulated that there is no necessity of locking the doors, even if they would stay shut, as no one would have the temerity to venture near the edifice with evil designs. Tramps, who would be expected to select the building as a place to sleep, have heard the story and avoid it as they would a pest."

Mr. Arthur Byrns, Rock Hill, Ont., writes: "I was laid up with stiff joints for about four years, and could get no relief until I used three bottles of Hagyard's Yellow Oil which cured me." Price

Bachelors.

The average bachelor becomes more wary, year by year. He was older in 1898 than in 1897, when he fell into the toils of matrimony. The average bachelor was married in 1897, at 26, 30 years of age, -quite .05 less than in 1898. The girl, too, has to wait longer now than she used to. She was .5 of a year younger in 1897, when she became a wife, than in 1898. As for the people who marry as minors, they are rapidly becoming a vanishing number, among men, at least; 84 out of every 1,000 husbands in 1874 were married under the age of 21, and so were 227 out of every 1,000 woman. The boy husband has come down to 51 per 1,000 now; the girl wives have dropped to 170 per 1,060. There have not been so few boy and girl marriages at any time since 185I.

If your child is suffering from worms, give him Dr. Low's Pleasant Worm Syrup. It is perfectly harmless and contains its own cathartic, so that there is no need of giving a purgative. Price 25c.

A Sweet Voice.

We agree with that old poet who said that a low, soft voice is an excellent thing in a woman. Indeed we feel inclined to go much farther than he on the subject, and call it one of her growing charms. How often the spell of beauty is rudely broken by coarse, loud talking. How often you are irresistibly drawn to a plain, unassuming woman, whose soft, silvery tones render her positively attractive. In the social circle how pleasant it is to hear a woman talk in the low key which characterizes the true lady. In the sanctuary of home how such a voice soothes the fretful

Ecezma in Its Norst Form

Iching - No Sleep Possible - Dr. Chase's Cintment Simply Marvailous in

Its Curative Powers.

Mr. John Kelly, 79 Trinity street, Toronto, in an interview, made the fol-lowing verbatim statement:-

"I have been troubled with eczema in almost its worst form for the past three years. At times my back and shoulder blades were literally covered with patches like water blisters, and these, accompanied with terrible itching on my legs, put sleep out of the question. I tried various well-known ointments (names mentioned), and did everything possible to obtain relief, but with little success. I had frequently heard of Dr. Chase's Ointment, but meeting with so many disappointments, I had not tried it. Seeing the advertisement one day I concluded to get a box. Since using Dr. Chase's Ointment, I am like a new being. Its soothing and healing properties are simply marvel-lous, and I am honestly grateful to Dr. Chase's Ointment for the release from long suffering.'

Dr. Chase's Ointment, a positive cure for all itching skin diseases, 60 cents a box, at all dealers, or Edmanson, Bates and Co., Toronto.

Hurry up With the Thunder

An amusing incident occurred lately whilst company of strolling players were performing in a little theater in the South of England The great scene of the evening occurred when the villain of the piece was struck dead by lightning.

This tragic event had been represented for fome nights with immense success, the villain falling simultaneously with a vivid flash thrown across the stage, while two seconds later the thunder pealed away in grand

One evening, however, a new hand superintendent the thunder and lightning. The flash was successfully produced, and down came the the villain, stone dead, but not a sound of thunder; and in a few moments the breathless audience were astonished to hear the prostrate corpse mutter between its firmly-set teeth, "Let go the thunder, you idiot!"

A Family Necessity

Mr. J. Wright, of 126 McPherson avenue, Toronto says:—"I am always glad to say a good word for Dr. Chase's Syrup of Linseed and Turpentine. It has been in use in our familes for two years, and we have never found it fail to cure coughs, colds, and chest trouble. It is our regular stand by." Dr Chase's Syrup of Linseed and Turpentine is a Family necessity in the houses of Canada and the United States. 25 cents a bottle. Family size 60 cents.

32913.

THE fashionably line bred Wilkes Mambrino I Patchen Stallion, Standard Bred, Rule I, American Trotting Register, Vol. 15, with the Double Wilkes cross, three crosses of Mambrino Patchen and double cross of the great brood mare Alma Mater, with 8 in the 2.30 list—5 producing sons and 3 producing daughters; being sired by Baron Alexander 28393 (who was destroyed by fire when young) a full brother to Alfonzo, with 11 in the 2.30 list at 9 years of age, son of Baron Wilkes 2.18, and Alma Mater; dam, Rachell, dam of Blackbird 2.26, at 5 yrs., and a full sister to Raven 2.19 and Edna Cook 2 12, by Alcantara 2.23, son of George Wilkes and Alma Mater; grandam, Rachel B. 2.284, by Allie West 2.25—was the champion 5 year old stallion of his time and considered the best son of Almont. Baron Almater is a young horse, his oldest colts were only 3 years old last season, and in October last one of his colts trialed a mile in 2.18 and sold for \$1500.00, and another trialed a mile in 2.224 and sold for \$750.00, and a pair of his colts took first prize at Long Island horse show last fall and sold for \$750.00, and a pair of his colts took first prize at Long Island horse show last fall and sold for \$1500.00, are gentleman's double hitch.—Baron Almater has got no record, for the reason he never started in a race or started for record, but has gone a mile in his work in 2.23 as a 4-year old. But he is going to be limited to 40 mares this season and started in the fall for a record. Baron Almater gets direct from his dam; so has Coney 2.073, the fastest and most successful of the green pacers out last season, having won 5 races. A combination of blood which in one sea-on has two champions and carries three green pacers and a green trotter below the 2.10 limit is worth having, and you can get this winning combination from Baron Almater.

Baron Almater is a horse of rich breeding, for he has the golden double cross of Wilkes from two of the best sons of that great progenior of extreme speed. Baron Wilkes is admittedly the most popular

these.

It is well known that the great "nick" for the Mambrino Patchen mares was George Wilkes.—
These mares have more speed producing stallions sired by other stallions than by Wilkes. But the sons of George Wilkes from Mambrino Patchen mares have sired more 2.15 speed than the others have in 2.30. The Wilkes-Mambrino Patchen union is more fruitful of 2.10 speed than all other lines of have in 2.30. The Wilkes-Mambrino Patchen union is more fruitful of 2.10 speed than all other lines of blood combined. George Wilkes has 176 descendants in 2.10 and Mambrino Patchen 145. Baron Almater has the three best lines from ambrino Patchen, including a double cross of Alma Mater, his most successful daughter, and one of the most formula of speed paragraphy.

his most successful daughter, and one of the most famous of speed perpetuators.

This magnificent inheritance is further strengthened by the blood of Allie West, through his performing and great speed producing daughter, Rachel B 2.28½ the grandam of Baron Almater, Allie West 2.25 was the champion 5 years old stallion of his time and considered the best son of Almont, but died in his sixth year. The few foals the left were highly prized,—and their speed producing descendents are valued more and more—especially by Kentucky breeders. Baron Almater has the best line from Allie West 2.25.

Back of all this Baron Almater has a cross to William's Mambrino, who sired the dam of that sterling race horse, and sire of game trotters, Santa Claus 2.17½; Eriesson, sire of William's Mambrino, was the champion 4 year old trotter of 1860 and sired the dam of Moquette 2.10 champion 4 years trotter of 1892.

and sired the dam of Moquette 2.10 champion 4 years trotter of 1892,
Alcantara it will be remembered was the fastest 4 year old of 1880; and George Wilkes the champion trotting stallion from 1868 to 1871.

BARON ALMATER's inheritance is rich as the richest and strong as the strongest both in performing and producing blood. For futher details call and get tabulated pedigree and the speed table in circular.

Cular,
This horse is Wilkes on both sides.
This tashonably bred Stallion will make the season of 1900 at owners' Livery Stable Woodstock, N. B. Service Fee, \$20.00.
H. E. & J. W. GALLAGHER,
Owners.

If God made the country and man made the town, the devil made the little country town. There is nothing equal to the smallness of a small town.—Tennyson.

In addressing the Christian Endeavour convention in London, the Eishop of London, made these apt remarks:- "In surveying the world what struck him most was the evil that was done by the little faults of good men. He had tried to learn something from the records of the past, and he saw that it was not the faults of bad men, but the limitations of good men that had done the most harm. He had often looked back to try and find some one in history whose conduct he could entirely approve. If they read only a short biography they might think they had found such a man, but if they read all the man had written and said, weighed all that he had done and considered his probable motives at every crisis, they would often close the book with a sigh. The world was anxious to follow Christians if they gave the world reason to do so, not by expressing generally good intentions or by taking up causes which were common to all right thinking men, but by giving something that the world could not make, nor get itself-the Christ-like temper. The world could do without ability or zeal, but not without their reflection of Christ's temper. It was not by what they denied or violently asserted, but by their temper in the small things of life, by the grace, humility and self sacrifice, that they would turn the hearts of others to see shining through the Christian the earnest of a power which the world did not contain." Is it not true that the small faults of really good men are dwelt upon, particularly by those disposed to be critical?

A writer in the Boston Herald has this petty paragraph: - "It is an ancient and well known proverb in China that when a Chinese opens his mouth a lie is born. Dr. Smith, who has lived for years in China, and who has given us some of the keenest observations on the characteristics of this ancint people, says that a native cannot understand why an Anglo-Saxon gets into such a rage on being called a liar! Not only are the people natural born liars, but the higher a man reaches in intellectual acquirement, the more complex and recondite becomes his lies. The ministers sent abroad by the Chinese government are, of course, profoundly skilled in the art of making black look white, and of pulling the wool over the eyes of our innocent diplomats, who, though familiar with the customary lies of European diplomacy, are quite ignorant, it would seem, of the exuberant and massive lies a celestial diplomat can utter." Well, well, I thought there was no one to equal the Canadian politician!!!

THE IMP.

A CARD.

We, the undersigned, do hereby agree to refund the money on a twenty-five cent bottle of Dr. Wills' English Pills, if, after using three-fourths of contents of bottle, they do not relieve Constipation and Headache. We also warrant that four bottles will pern anently cure the most obstinate case of Constipation. Satisfaction or no pay when Wills' English Pills are used.

Alaska's Noted Dog.

Clarence J. Berry's mastiff Julian the most widely-known dog in the far-away gold fields of Alaska, is dead, says the San Francisco Call. Exposure to the rigors of the northern climate put an end to the career of a dog which had travelled hundreds of miles over the pathless ica, and hauled thousands of pounds of freight. Mr. Berry first put him to work on a sled in 1892, when the dog hauled provisions for the season over the Chilkoot Pass. In the following year the dog was the mainstay of the team which was used by Mrs. Berry when she went to join her husband. On this perilous trip all the dogs except Jalian gave out, and he had to haul the load, which weighed 1000 pounds. by himself across the frozen surface of Lake Bennett. When the party reached Dawson the dog hauled most of the lumber and material used by Mr. Berry in mis mines and houses. So tamous did Julian become that his owner was offered fabulous sums for hun but declined to consider any proposition which meant parting with his faithful ser-

In 1898 the dog suffered from rheumatism brought on by exposure. This rendered him useless as a draught an mil Mr. Berry sent him to Fresno for treatm m, and as he did not improve there, he was sout to Santa Cruz, where he remained several months. Disease had so strong a hold on him that he could not shake it off. He many succumbed to a complication of canine ailments.

Poor Quality of Blood

A Frequent Cause of Consumption, Heart failure and Other Constitutional Diseases—Dr. Chase's Nerve Food as a Blood Builder.

The heart, the lungs, the stomach, the liver, the kidneys, and bewels cannot perform their functions and repair wasted tissue when supplied with blood that is deficient in nutrifive qualities, and sooner or later the weakest organ succumbs to the attacks of disease.

The indications of thin, watery blood are paleness of the lips, gums, and eyelids, shortness of breath, weakness of heart action, and languid, despondent feelings. These symptoms are usually accompanied by nervousness, sleepless-ness, and general weakness of the body. It is positively useless to doctor the symptoms, and injurious to use opiates or stimulants. Cure can be brought about gradually and certainly by the use of Dr. Chase's Nerve Food, which contains in condensed pill form all the elements required for strengthening and revitalizing the blood. As a blood builder and nerve restorative, Dr. Chase's Nerve Food is of inestimable value. In pill form, 50 cents a box. at all dealers, or Edmanson, Bates &
