separating building or skimming station. This concern which is owned by Mr. Manzer, of Andover, is a novelty to most people in this section of the country, and everybody must see it, examine the machinery and interloque the genial manager Mr. Emmick. It is no doubt going to be a great boon to the farmers, who will increase their stock for the purpose of selling the milk, and can make money out of it. It has been established now about a week and every day one or more farmers decide to try their luck and add their small amount to be sent to the factory, and before very long every farmer in the parish will take hold and sell their cream and not be sorry for it either.

Britain's motto is: **What we have we'll hold!**
It is likewise the sentiment of those who patronize our establishment.
Many have endeavored to imitate Custom Tailoring, and have filled the market with their goods, but have met the fate of the Boers—
A seeming success for a time, then a struggle, and finally are forced to recognize the Superiority of Custom-Made Clothing. It should not require much argument
