What we make
We Guarantee!
Britain's motto is:
What we have we'll hold!
It is likewise the sentiment of those who patronize our establishment. Many have endeavored to imitate Custom Tailoring, and have filled the market with their goods, but have met the fate of the Boers—
A seeming success for a time, then a struggle, and finally are forced to recognize the Superiority of Custom-Made Clothing. It should not require much argument

to convince a man that a garment made from His Measure, taken by an Experienced Tailor, and fitted on in the course of making should fit better and be more stylish than one taken from a pile made 6 to 36 months ago!
To say nothing of the Superior Workmanship and goods used. We are showing an Excellent Stock of The Newest Shades and Textures, which we make up in Our Usual Good Style. Radical changes in styles this summer

New Fire Alarm System.

The first fire alarm system constructed in this town some fifteen years ago operated only street fire alarm boxes on a ground circuit giving excellent results. A few years later the system was enlarged by an addition of about 24 alarm bells placed in each fireman's house enabling them to locate fires by the number sounded on the bells. These bells have never given satisfaction on account of an error in ordering the proper instruments. The bells which are local instruments are not capable for working on main line circuit as intended for when purchased, and a vast amount of gravity battery has been used in trying to force those bells to do impossible work but without success. The town secured the services of James Mitchell who notified the proper authorities over a year ago that the bells required relays to aid the working of them, and when this was done the system could be run by a great reduction of battery and better results follow. Gong relays have been secured and placed with bell on an ornamental board 8x18 at each fireman's house. The main line circuit works the relay and one cell of Sampson battery works the bell on local circuit. A metallic circuit has also been run, and last week Mr. Mitchell reduced the main battery at the town hall from 80 to 40 cells of battery, representing a saving of at least \$80 a year (if necessary to charge twice a year) in battery material, and giving good line current. It is safe to say that everything is in very good shape and a competent man should constantly be in charge of the fire alarm. Woodstock would have a first class system, if new bells were purchased as these bells are only a cheap make and have been tampered considerably with by parties forcing them to do an impossibility. The poles, wire, etc are in need of repairs as they are falling down in many places and as they are now, they are neither ornamental or serviceable. The names of those who have boxes in their rooms are:—Chief Dibblee, Gus and Frank Gilman, Jas. W. Wilbur, Robt. Kennedy, Fred Hayden, Ed. True, Elden Fisher, A. G. Fields, Jas. Gibson, Jack Lindow, Wm. Bolger, Maurice Ryan, Harper Green, George Green, Leslie Faulkner, Mitchell McKinley, John Tattersall, Jos. Fewer, James Hamilton.

The Jere McAuliffe Co.

The performance of the McAuliffe Co. on Saturday was well attended and was much appreciated by the audience. Jere McAuliffe, himself, is an amusing comedian, and those who are after a good laugh, cannot fail to enjoy him. "The Fire Patrol" is a highly sensational play, melodramatic in the extreme, with a very noble hero and a very terrible villain. The actors took their parts well. The varieties between the acts were very entertaining, and the ventriloquism good. This evening "Suthern Climes" will be presented and a big house may look for a highly exciting show. There will no doubt be a chance to shed tears for those who like that kind of thing, while McAuliffe and Harry Jenkins may be trusted to amuse the less seriously minded.
