This Winter's Skirts.

Fashion has decided that the habit-back skirts, so general popular a few season ago, is to be revived, and it is shown in various attractive modifications. Both the slender figure and that inclined to embonpoint will appear to advantage in this style of skirt when the details of adaptability are studied, while the woman whose figure is perfectly proportioned will readily appreciate the long, graceful lines that characterize these modes. Ten different styles of habit-back skirts are shown in the September DELINEATOR.
