ONE of the best and latest improvements on Cook Stove and Ranges is the oven door thermometer which is a great advantage to the cook or housekeeper. It enables one to tell at a glance the exact condition of the oven. Saves time, fuel, and badly cooked food, and enables all kinds of baking to be done with certainty and exactness. It measures heat just as clock measures time, tells you when the oven has reached the degree of heat required; makes it easy to maintain a uniform temperature and makes good baking easy to the most inexperienced. It avoids having bad luck with baking, which is due to an improper heat of the oven when the food is put in, more than to any other cause and every housekeeper knows how important it is that the oven of her range or cook stove shall be of a right temperature, not too hot or too cold, to suit the article of food she has ready. The Royal Grande Range sold by W. F. Dibblee & Son has this oven door thermometer.
