BABY CONSTIPATION.

Can Be Cured Without Resorting to Harsh Purgatives.

Constipation is a very common trouble among infants and small children—it is also one of the most distressing. The cause is some derangement of the digestive organs, and if not promptly treated is liable to lead to serious results. The little victim suffers from headache, fever, pain in the stomach and sometimes vomiting. While in this condition neither baby nor baby's mother can obtain restful sleep. If proper care is taken in feeding the child and Baby's Own Tablets are used, there will be no trouble found in curing and keeping baby free from this disorder.

Mrs. T. Guymer, London, Ont., says: "My baby was a great sufferer from constipation. She cried continually, and I was about worn out attending her. I tried several remedies, but none of them helped her till I procured some Baby's Own Tablets. These tablets worked wonders, and now she is in the best of health. I can now go about my work without being disturbed by baby's crying. I consider Baby's Own Tablets a great medicine, and would advise mothers to keep them in the house for they will save baby from much suffering by curing and preventing the minor ailments common to infants and small children."

Baby's Own Tablets are sold under a positive guarantee to contain no opiate or other harmful drug. They are easy to take, mild in action, promote healthful sleep and will be found a never-failing cure for constipation, baby indigestion, simple fever, diarrhoea, sour stomach, colic, etc. They allay the irritation accompanying the cutting of teeth, break up colds and prevent croup. Price 25 cents a box at all druggists or sent by mail, post paid, by addressing the Dr. Williams' Medicine Co., Brockville, Ont.

Let it Alone.

Scott's Emulsion is not a good medicine for fat folks. We have never tried giving it to a real fat person. We don't dare. You see Scott's Emulsion builds new flesh. Fat people don't want it. Strong people don't need it.

But if you are thin Scott's Emulsion is the medicine for you. It doesn't tire you out. There is no strain. The work is all natural and easy. You just take the medicine and that's all there is to it.

The next thing you know you feel better—you eat better—and you weigh more. It is a quiet worker.
