TEETHING BABIES.

A Trying Time for Mothers When Great Care and Watchfulness is Necessary.

There is scarcely any period in baby's early life requiring greater watchfulness on the part of the mother than when baby is teething. Almost invariably the little one suffers much pain, is cross, restless day and night, requiring so much care that the mother is worn out looking after it. But there are other real dangers frequently accompanying this period that threatens baby's life itself. Among these are diarrhoes, indigestion, colic, conscipation and convulsions. The prudent mother will anticipate and prevent these troubles by keeping baby's stomach and bowels in a natural and healthy condition by the use of Baby's Own Tablets, a medicine readily taken by all children and which, dissolved in water, may be given with perfect safety to even a new-born infant. In every home where these Tablets are used baby is bright and healthy and the mother has real comfort with it, and does not hesitate to tell her neighbors. Mrs. C. J. Dalaney, Brockville, says:—"I have been giving my fifteen-months' old baby Baby's Own Tablets, whenever necessary, for some months past. She was teething and was cross and restless. Her gums were hard and inflamed. After using the Tablets she grew quiet, the inflammation of the gums was reduced, and her teeth did not seem to bother her any more. An improvement in baby's condition was noticeable almost at once, and I think there is no better medicine for teething babies.' Baby's Own Tablets can be procured from druggists or will be sent post paid at 25 cents a box, by addressing the Dr. Williams' Medicine Co., Brockville, Oat.

A GUARANTEE-"I hereby certify that I have made a careful chemical analysis of Baby's Own Tablets, which I personalsy purchased in a drug store in Montreal. My analysis has proved that the Tablets contain absolutely no opiate or narcotic; that they can be given with perfect safety to the youngest infant; that they are a safe and efficient medicine for the troubles they are indicated to relieve and cure.

ALMOST A MIRACLE

WROUGHT IN THE CASE OF A CHARLOT-TETOWN LADY.

Held out No Hope of Recovery-Today She is Well, Strong and Active.

From the Islander, Charlettetown, P. E. I. Statistics published from time to time show the number of deaths occurring throughout this country from consumption to be as great as the number caused by all other preventible diseases combined. It is no wonder, therefore, that the medical fraternity has at last awakened to the fact that the most urgent means must be taken to prevent its fur-ther spread, and to teach the public that while the disease is really communicated from one person to another, it is not necessarily inherited, though she tendency to it may be. It is, therefore, of the utmost importance that people with weak lungs should take the greatest care of themselves to prevent consumption obtaining a hold upon them. Pure out-of-door air, lots of sunshine, wholesome food and a good tonic medicine to keep the blood rich, red and pure, will enable anyone to resist the inroads of the disease. As a blood forming tonic, there is no medicine the equal of Dr. Williams' Pink Pills. These pills where freely and fairly used, will strengthen the weakest constitution, and have cured Mayor Belyea said he had seen the manager of the show as to the ethical quality of their play and had been assured that it was quite case of Mrs. Abram Henry, of Charlottetown, all right.
