

B.B.B. Makes Blood Pure.

If the blood is pure the whole body will be healthy.

If the blood is impure the whole system becomes corrupted with its impurities.

Burdock Blood Bitters transforms impure and watery blood into rich pure blood and builds up the health.

Disease germs cannot lurk in the system when B.B.B. is used.

Miss Effie McDonald, Liscomb Mills, Guy Co., N.S., writes: "I have found B.B.B. an excellent remedy for purifying the blood and curing sick headache. I had tried many remedies, but none of them did me much good. B.B.B. has made me so well that I feel like a new woman and I am constantly recommending it to my friends."

Boys Who Succeed Where Men Fail.

Although there are some uncharitable people who "can't see any good in boys" and would stoutly deny that they fill any useful or even ornamental part in the scheme of life, it is an incontestable fact that a boy has many a time solved difficulties which have baffled all the skill and ingenuity of his cynical elders.

It was a boy, for instance, and a very young specimen of his genus, who first linked two nations together when the wisest heads in Canada and the United States had to own themselves unequal to the problem. It was at the time when a suspension bridge was projected over the Niagara River which was to do away for ever with the primitive and unsatisfactory ferry-boat service across the foot of the Falls.

At the point selected for the proposed bridge 800ft. of foaming, turbulent rapids divided one shore from the other, and this formidable gulf defied all attempts to throw a line across it. The engineers were in despair when a small boy, Homan Walsh, who had a reputation for flying kites better than any other flyer in the district, volunteered to get a line across. His presumption was puch-pooed, but the boy smiled at the derision and appointed a time when he would certainly link the two severed nations.

Curious crowds lined the opposite banks of the chasm when Homan Walsh's kite soared up from the Canadian bank and with a favorable breeze floated over towards the opposite cliffs. For half an hour anxious eyes followed the flight until, by dexterous management, the boy brought his kite safely down on the United States shore, while from both banks rose a mighty volume of cheers. But the boy's triumph was short-lived. The sagging string was caught by an ice floe sweeping down the rapids, a fierce tug followed, and a moment later the string was hanging limply in the boy's hand. Nothing daunted, young Homan tried again, and his second attempt linked the two shores and solved once for all the difficulty of throwing the suspension bridge across the stream.

Edison, the great American "Wizard," had barely entered his teens when he was able to prove that a boy's brains may be more than a match for those of adults. When he was a newspaper-boy on the Grand Trunk Railway the owner of the enormous ranch through which the boy passed daily was at his wits' end to devise some plan of communicating rapidly with his employees in distant parts of his ranch many miles away.

Young Edison, who was then beginning to dabble in the electricity which has since brought him so much fame and gold, heard of the difficulty, and without a moment's hesitation solved it. He had noticed that a wire-fencing ran to every part of the extensive ranch, and it flashed on him at once that here was a ready-made means of communication which could not be improved on. He installed the necessary electrical appliances, made by his own hands, and in a short time the electric current was sending messages and orders through a hundred square miles of land and several hundred miles of wire-fencing.

It was a boy, and a lazy boy too, who introduced one of the greatest improvements in Newcomen's engine. He was employed to turn two cocks which admitted the steam into the engine-cylinder for purposes of condensation—a task which he found so monotonous that he decided to devise some means of making the engine do the work for itself. By noticing the position of the beams at the exact time when the cocks should be opened, he was able by a simple attachment of strings between the cocks and the beams to make the latter open the former, and set him at liberty to amuse himself with his marbles or tops in absolute security that the engine would do his work for him. This improvement was so ingenious that it was permanently adopted, rods taking the place of the boy's primitive string connection.

It was the young son of a Dutch optician who, while playing with spectacle glasses in his father's shop, first discovered the possibilities of the telescope and opened the secrets of the heavens to Galileo.

But perhaps the most revolutionary discovery that can be credited to a boy is the invention of wireless telegraphy for which Mr. Marconi has made himself famous. When young Marconi was a schoolboy at Leghorn the idea of transmitting messages through the air, a conception which had scarcely ever entered the heads of the greatest of the world's electricians, occurred to him, and the idea had already become a feasible one before he left the Leghorn school for Bologna University. Long before he had left his teens behind him the young Italian had solved the greatest mystery that had ever baffled the ingenuity of adult brains.

LOCAL OPINION IS STRONG in favor of Pyny-Balsam. It cures coughs and colds with absolute certainty. Pleasant to take and sure to cure. Manufactured by the proprietors of Perry Davis' Pain-Killer.

A Parnell Story.

"Some years ago," writes a correspondent, "when I was a reporter in the House of Commons, I had a strange experience of the peculiar way of the late Mr. Parnell. I was

A LARGE BOTTLE, 25c.

coming up from Brighton by the mid day train to attend my duties. Just as the train was starting Mr. Parnell got into the same compartment, the porter throwing in after him a small portmanteau. We were alone. When Hayward's Heath had been passed, Mr. Parnell, much to my astonishment, proceeded to divest himself of his clothing, even to the extent of changing his shirt, and then to very deliberately dress himself in an outfit which he produced from his portmanteau. From first to last he never took the slightest notice of me, or offered a word of apology for such extraordinary behavior. Had I not known the man I should have been tempted to 'make a few remarks,' but I must confess to being somewhat awed in that singular presence. The object of the metamorphosis was not so obvious then as it afterwards became. When the honorable member got into the train he was attired in a brown lounge suit; when he alighted at Victoria he appeared in the regulation Parliamentary black frock coat and striped trousers."—[Westminster Gazette.

Questions for Women.

Are you weak, nervous, irritable, easily worried and fatigued? Do you dread your daily work and feel like letting your duties go undone? Dr. Chase's Nerve Food will restore your Nervous system and give the thrill of new life and energy through the body. It is above all a woman's medicine, as its invigorating influence on the nerves insures regularity in the functions of the bodily organs.

COLDS.

Why We Have Colds.

Volumes have been written on the wretched condition which, taking one of its causes for the disease itself, we call a 'cold'; but very little progress has been made in the way of prevention or cure. In avoiding it we are warned to beware of draughts, wet feet, sudden changes of temperature, and so forth, and the advice is excellent. The only objection to it is that it is impossible always to follow it. But exposure of this kind is not the sole cause, for if it were, a wetting or a chill would always be followed by a cold, and that, we all know to our joy, is not the case.

A cold in the head is an inflammation of the mucous membrane of the nose produced by certain bacteria. What these bacteria are, and whether it is always the same kind that produces a cold, are questions that have not been settled. Some, at least, of them are probably always present in the air of our houses or the dust of our streets, in our pockets, where, whenever suffering from an acute cold in the head we carelessly put soiled handkerchiefs containing vast numbers of the germs, and on clothes, books, furniture, money and hundreds of other things with which we come in contact daily. So it cannot be the germs alone that cause a cold, otherwise we should never be free from one.

The germ of a disease is the same as a seed; it will grow and multiply if planted in suitable soil, but not otherwise. So the germ, or germs, of a cold will not grow in a healthy nose: the mucous membrane of the nose must be prepared by some local or general cause which weakens its power of resistance. This may be a local disturbance of the blood supply, caused by a chilling of the surface of the body, or irritation by the inhalation of dust or of strong fumes, as of burning sulphur; or it may be some defect in the construction of the nasal cavities, causing a chronic discharge which keeps the mucous membrane constantly irritated; or it may be some influence which depresses the general system, and makes it vulnerable to the attacks of the microbes.

Such influence may be fatigue, mental anxiety, loss of sleep and the like, but perhaps more often self-poisoning by the waste products found in the intestines, and absorbed instead of being promptly eliminated. The absorption of those waste products of the body which should be got rid of through the lungs, but which are not because of faulty habits of breathing, is another form of self-poisoning which leads to colds.—'Youths' Companion.'

Coughs, colds, hoarseness, and other throat ailments are quickly relieved by Vapo-Cresolene tablets, ten cents per box. All druggists.

A MODERN KITCHEN UTENSIL, SARGENT'S Gem Food Chopper.

What It Chops.

It chops raw meat, cooked meat, all kinds of vegetables and fruit, bread, crackers, cheese, nuts, and many other articles used in making substantial dishes and dainty desserts. Every housekeeper knows the many articles of food which have to be chopped, some before they are cooked and some after. We want every housekeeper to know that Sargent's Gem Food Chopper will be a great help in her daily work. Call at our stores—Woodstock or Centreville, and see the Choppers, or write us for circulars.

W. F. Dibblee & Son.

TAKING BIG CHANCES,

You always do when having your Suit for Dress, Semi-Dress, or for Business Wear, unless you go to a reliable and artistic tailor. Everyone can tell when your suit is made by Nicholson, from the exquisite finish, artistic fit, and swell style of our garments. We also sell the Latest

Novelties in SHIRTS, COLLARS and Cuffs.

SHERIFF'S SALE,

County of Carleton.

There will be sold at Public Auction in front of the Post Office in the Town of Woodstock in the County of Carleton on Wednesday the 30th day of April next at the hour of eleven o'clock in the forenoon:

All the right, title, interest, claim, property and demand, either at law or in equity, of Daniel Bell late of the Parish of Kent in the County of Carleton, deceased, of, into or out of the following lands and premises, situate, lying and being in the Parish of Peel, County of Carleton, Province of New Brunswick, and described as follows:—All that certain piece and parcel of land and premises bounded on the northerly side by the highway roads leading from Bristol to Glassville, easterly by land owned by Mantin Bell, southerly by land owned by William A. Bell known as the Snow lot, and westerly by land occupied by John Briggs and known as the Andrew Bell lot and containing one hundred acres more or less. Together with all houses, outhouses, barns, buildings, edifices, improvements and appurtenances to the same belonging or in any manner appertaining.

The same having been seized and taken by me, under and by virtue of a warrant issued by the Secretary Treasurer of the County of Carleton, on application of the Trustees of Schools for School District Number 14 Kent and Peel under the provisions of Chapter 100 of the Consolidated Statutes and Amending Acts.

Dated at Woodstock in the County of Carleton the twenty-first day of January, A. D. 1902.
WILLIAM A. HAYWARD,
Sheriff of Carleton County.

Probate Court, County of Carleton,
Province of New Brunswick.

To the sheriff of the County of Carleton or any Constable of the said County.—GREENE:

Whereas the Administratrix of the estate of Randolph K. Jones, deceased, has filed in this Court an account of her Administration of the deceased's estate and has prayed that the same may be passed and allowed in due form of law.

You are therefore required to cite the heirs and next of kin of the said deceased, and all of the creditors and other persons interested in the said estate to appear before Frank B. Carvell Esquire Judge of Probate Pro Hac Vice in the matter of the said estate of the said Randolph K. Jones deceased, at a Court of Probate to be held in and for the County of Carleton at the office of the said Frank B. Carvell Judge of Probate Pro Hac Vice in the Town of Woodstock in said County on TUESDAY the FOURTH day of MARCH next, at ten of the clock in the forenoon, then and there to attend the passing and allowing of the said accounts as prayed for and as by law directed.

Given under my hand and the Seal of the L.S.: said Probate Court this Twenty-Fifth day of January, A. D. 1902.

FRANK B. CARVELL,
Judge of Probate Pro Hac Vice in reference to the above estate.
DENIS B. GALLAGHER,
Registrar of Probate, County of Carleton.

ANNOUNCEMENT.

After being in business at Bristol for five years, I have decided that it will be better for my customers and better for me to sell goods only on the Cash System.

By adopting the new plan I will be able to buy for spot cash and thus secure large cash discounts, the benefit of which my customers will receive in lower prices.

In discussing this business change with merchants who have tried both systems, they inform me that under the new system they are able to sell goods remarkably cheaper than under the old.

I therefore desire to announce that commencing with January 1st, 1902, I will sell goods for pay down only.

Farm Produce will be taken in exchange for goods. Yours truly,

FRED. A. PHILLIPS,
Bristol.
