THE SUPERIORITY OF CANADIAN FLOUR.

Makes the Best Loaf.—Trials in England.—Is not Adulterated.—How to Raise Crops. Ten Years Tests.—Time for Sowing.—Invitation to Farmers.

Canadian flour of the best sort contains by actual analysis about one-tenth more of albuminoids than the best quality of Hungarian flour; and the albuminoids or gluten being more tenacious yield a dough which rises better and holds its position in the baked loaf. Let the press proclaim this, and the news will be followed by a demand for Canadian flour in the old country, where people know a good thing when they see it and will have the best that can be procured.

For some time past Canadian flour has been steadily gaining ground in the European markets, and it is becoming better known as flour from which bakers can make not only the best quality of bread but also the largest quantity per barrel. The English bakers make up their sponge from seven or eight brands of flour because this enables them to have a continuity of quality in the event of any single brand failing in the market. Three tests made by first class English bakers in London with Canadian flour gave the following results. Each using 100 pounds of flour, they obtained in the first instance 146 pounds of bread, 152 pounds of bread in the second, and 151 pounds of bread in the third case. Each test was made with strong Canadian flour. It is noteworthy that adulteration of Canadian flour by Indian corn flour or other cheaper and inferior substances is entirely unknown. For sweetness, whiteness and strength Canadian flour is unsurpassed.

To meet the increased demand in England for hard wheats to mix with the home grown and softer wheats, Mr. F. T. Shutt, M. A., of the Central Experimental Farm at Ottawa, made a comparative examination between Canadian best patents and the best grades of Hungarian flours. The foreign samples had been procured by the Hon. the Minister of Agriculture. The result of these experiments proved the superiority of the Canadian flour for bread making purposes. The percentages of albuminoids or protein, the most important part from a nutritive stand point, were, Canadian best patents, 12.59 per cent; Hun-

garian best grade, 11.27 per cent. The determination of gluten, both wet and dry, was, also, in favor of Canadian flour, namely, Canadian best patents, wet gluten, 34.23, dry gluten, 12.33; Hungarian best grade, wet gluten, 26.17, dry gluten, 9.79.

Clover seed can be sown in all the eastern provinces of Canada and in the coast climate of British Columbia to advantage with all cereal crops, without lessening the grain crop for the current year, for after the grain is cut the clover grows luxuriantly, acting as a catch crop during the latter part of the season. Green clover turned under is specially valuable to the land, because while growing it absorbs large quantities of nitrogen from the air, and which is stored up in its tissues. A heavy mat of growth is produced by the autumn which when ploughed under adds considerably to the available nitrogen in the soil as well as to the store of humus. The proportion of nitrogen thus added to the land is equal to that obtained from a dressing of ten tons of barn yard manure to the acre. Considerable supplies of potash, phosphoric acid and lime are also taken up by the clover plant during its growth a part of which is gathered from depths in the soil not reached by some other farm crops. Tests year after year with wheat, oats, barley and potatoes confirm the value of this method of adding to the fertility of the soil.

In preparing the land for crops, in the eastern provinces the advantages arising from fall ploughing have been proved. The exposure of the soil to the influence of frost, sunlight and air is beneficial. Spring work is materially advanced, and crops can be got in earlier by this practice. Summer-fallowing a part of the land each year has been found of great advantage on the north-west plains. This conserves moisture, destroys weeds, and brings the farmer much larger crops. The yield of wheat on land that has been summer-fallowed will average fully one-third more than on land that has been prepared by only fall or spring ploughing.

The tests carried on at the Experimental Farms for ten years have fully demonstrated that increased crops result from early sowing. Sowing at the earliest possible time and then sowing a second series a week later, then four other lots at intervals of a further week each, has shown that the best crops have been had from the second sowings made just one week after it was possible to sow the seed. Beyond this, delay in sowing has resulted in loss which has been more serious as the delay has been greater. The average of the ten years' experience shows that with wheat a delay of one week beyond the period mentioned has entailed a loss of over 30 per cent, two weeks 40 per cent, three weeks nearly 50 per cent, and four weeks 56 per cent of the crop.

Farmers should avail themselves of the opportunity of sending any doubtful samples of grain and other seeds to the Experimental Farm to be tested for their vitality. By this means any injury to the vitality of grain from unfavorable weather during harvest may be promptly detected, and the extent of the injury ascertained. Samples weighing about one ounce may be sent to the Central Experimental Farm at Ottawa free through the mail. These samples are tested and reported on free of charge, and their percentage of vitality can usually be determined within a fortnight after they are received.

Questions for Women.

Are you weak, nervous, irritable, easily worried and fatigued? Do you dread your daily work and feel like letting your duties go undone? Dr. Chase's Nerve Food will restore your nervous system and send the thrill of new life and energy through the body. It is above all a woman's medicine, as its invigorating influence on the nerves insures regularity in the functions of the bodily organs.

Seven First Horses Purchased by the Provincial Government.

The St. John Globe says:—Hon. L. P. Farris, Commissioner of Agriculture, and Mr. Ora P. King, M. P. P. for Kings, who have been on a visit to the upper provinces and the United States for the purpose of purchasing horses for the provincial government, were passengers on the Boston train on last Wednesday morning, and went to Fredericton.

They were well pleased with the result of their mission. They purchased one thoroughbred, one hackney, two French coaches and three Clydesdales.

The thoroughbred is named Dracula and was purchased from Messrs. Telfer, Clime & Co., Montreal. He was imported from England by Col. Dent, and is considered the best horse imported in Canada to give a class of heavy hunters or good road horses.

Dracula was shown at the Pan-American exhibition, and although only just off the ship, won third prize. At the Toronto horse show he won the first prize over the animal which captured the premier award at Buffalo, and also over the horse Sleight-of-Hand, for which \$10,000 was refused as a two-year-old.

Dracula is a chestnut, standing sixteen hands and half an inch high, and weighs 1,310 lbs.

Stampede is the name of the hackney. He was imported from the United States by Graham Bros., Claremont, Ont., from whom Messrs. Farris and King made the purchase.

Stampede is a brother in blood to a horse recently sold for \$7,000. He is a chestnut,

A Siege

The matrons of the Edison Orphanage at Lowell, Mass., U.S.A., wrote they had a siege of whooping-cough in their institution. They said that every case was promptly relieved by Vapo-Cresolene. Its value in coughs and colds was so great they always kept it ready for use. You know how it's used, don't you? 'Tis heated by a vaporizer and you inhale it. Write us for a book that tells all about it. a

Vapo-Cresolene is sold by druggists everywhere. The Vaporizer and Lamp, which should last a lifetime, and a bottle of Cresolene complete, \$1.50; extra supplies of Cresolene 25 cents and 50 cents. Illustrated booklet containing physicians' testimonials free upon request. Vapo-Cresolene Co., 180 Fulton St., New York, U.S.A.

weighing 1,245 lbs., and standing fifteen hands and two and a half inches in height.

Of the two French coach horses one is a bay and one a brown. One weighs 1,245 lbs and the other 1,260. One stands sixteen hands high and the other fifteen hands three inches. One was raised after Gemare, an imported horse, and the other after Lothair, also an imported horse. Both were brought from Mr. F. S. Sanborn, Elmdale, Maine.

The Clydesdales weigh from 1660 to over 1900 lbs. Two of them were bought from Mr. Robert Ness, Howick, Que., and one from Graham Bros., Claremont. One of these, Chancellor, stands 17 hands high and weighs over 1,900 lbs. He is six years old and makes a handsome showing.

The other two were sired by the greatest sire in the world, Baron's Pride, and the three were imported from Scotland. The two last mentioned are low set, blocky horses.

All the horses are between four and six years old.

Messrs. Farris and King say the seven selected are splendid specimens of horse flesh, and they anticipate a great improvement in the breeding of horses will result from bringing them to the province.

The original plan was to sell these horses at auction, with the condition that they should be kept in the province, but it may be as the season is rapidly passing that the government will retain possession of them this year and place them in the countries where they are most required. The horses are now at Fredericton.

Lost Hearing Quickly Restored.

No matter whether of long standing or not deafness can be permanently cured by CATARRHOZONE, which never fails even in the worst cases. The pleasant scented vapor of Catarrhozone allays inflammation, prevents and cures the catarrhal condition that causes deafness and relieves right away. Thousands have proved the efficiency of Catarrhozone, and with such a valuable remedy within easy reach there is no longer any reason for people to remain deaf. Catarrhozone is recommended also for Coughs, Colds, Catarrh and Bronchitis. Complete outfit, \$1.00; trial size, 25c. Druggists, or N. C. Polson & Co., Hartford, Conn., U. S., or Kingston, Ont.

HAMILTON'S PILLS CURE CONSTIPATION.

The Destructive Deer.

A farmer in Penobscot county, Maine, says the Kennebec Journal, has written a letter to the agricultural department asking what the farmers in that section will do if the deer this year follow their usual practice of eating up their crops. He says the deer do a large amount of damage to crops in some localities, almost totally destroying peas, beans and grains, and doing considerable damage to clover, turnips and the like. He goes on to say that the deer can't be shot nor injured in any way and he closes his letter to Mr. Gilman by saying: "If you know of any remedy I'd like to see it applied."

The Minneapolis Journal is booming Canada at a tremendous rate. A recent article is published under such head-lines as "Bumper crops of 1901 made western Canada. They have struck the hour of destiny for a country of vast area and of untold agricultural potentialities." Think of that! The article says that Canada has awakened and found herself famous. It declares that three-fourths of the hard wheat area is north of the boundary. The Journal thinks the effect will be to Americanize the west, but The British Columbia Colonist says that Canada will have no difficulty in absorbing the new comers:—"We have never known an American, particularly an American of Teutonic origin, who did not prefer the orderly institutions of Canada to the autonomy degenerated into license of which he has had experience in the western States of the Union, after he knew what Canadian institutions were."

"Yes, I am opposed to American girls marryin' furriners," said old Mrs. Sipes. "I'm just that opposed to it that if my girls can't marry people of their own sex, they needn't marry at all, and that's all there is about it!"

FOR SALE.

That property known as part of the Richard Hand farm, situated in Plymouth, 5 1/2 miles from Woodstock, and one mile from school and post office, containing 110 acres, 60 acres cleared, balance well wooded with some valuable timber and sugar maple. Two barns in first-class repair, with new house well finished. This farm is in good condition, with 20 acres ploughed and chance for a large crop of grain, and will be sold at a bargain. For terms apply to A. W. HAND, Plymouth.

ARE NOW CURABLE**

by our new invention. Only those born deaf are incurable.

HEAD NOISES CEASE IMMEDIATELY.

F. A. WERMAN, OF BALTIMORE, SAYS:

Gentlemen:—Being entirely cured of deafness, thanks to your treatment, I will now give you a full history of my case, to be used at your discretion.

About five years ago my right ear began to ring, and this kept on getting worse, until I lost my hearing in this ear entirely.

I underwent a treatment for catarrh, for three months, without any success, consulted a number of physicians, among others, the most eminent ear specialist of this city, who told me that only an operation could help me, and even that only temporarily, that the head noises would then cease, but the hearing in the affected ear would be lost forever.

I then saw your advertisement, accidentally in a New York paper, and ordered your treatment. After I had used it only a few days according to your directions, the noises ceased, and to-day, after five weeks, my hearing in the diseased ear has been entirely restored. I thank you heartily and beg to remain Very truly yours,

F. A. WERMAN, 730 S. Broadway, Baltimore, Md.

Our treatment does not interfere with your usual occupation.

**Burdock
Blood
Bitters.**

**Turns Bad Blood into
Rich Red Blood.**

This spring you will need something to take away that tired, listless feeling brought on by the system being clogged with impurities which have accumulated during the winter.

Burdock Blood Bitters is the remedy you require.

It has no equal as a spring medicine. It has been used by thousands for a quarter of a century with unequalled success.

HERE IS PROOF.

Mrs. J. T. Skine of Shigawake, Que., writes: "I have used Burdock Blood Bitters as a spring medicine for the past four years and don't think there is its equal. When I feel drowsy, tired and have no desire to eat I get a bottle of B.B.B. It purifies the blood and builds up the constitution better than any other remedy."
