Embroidery For Gowns.

Now that a gown, especially a handsome one, is not considered properly finished unless there is some hand embroidery about it, the amateur will be glad to have some help in the matter. Revers, collars and cuffs, edges of short jackets, bands on shirts and waists, panels and trimmings on skirts are some of the ways in which the work is utilized. Silk is used for embroidery on woollens, satin or silk goods and wash silk or linen thread on cottons. A number of pretty stitches are illustrated in the March Delineator, which are well within the reach of the amateur.

Washington, Feb. 23.—An enthusiastic meeting of Boer sympathizers was held today at the Lafayette square theatre, and resolutions were adopted calling on President Roosevelt and congress to use all their power to prevent the further exportation of horses and mules to the English in South Africa. Commandant Krige, formerly with the Boer army, delivered an address reciting events in South Africa, and saying neither he nor any other Boer wanted to create hatred between the American and English nations, but every Boer called to America and the American people to put a stop to the shipment of thousands of horses and mules to South Africa for the British and to maintain strict neutrality. The Boers will never be conquered, he said, while the last man stands.

"It's not faith you want in it," replied the professor; "it's works."
