

Take Your Choice!

They are all bargains. I will sell the following valuable properties because my constantly increasing wholesale and retail business prevents me giving them the attention they require.

Two Tenement Houses
situated on Water street, both rented. They will pay good interest on the investment.

One Large House On Main Street South
suitable for a boarding house, or will accommodate three tenants, or is a splendid stand for buying, storing, and shipping country produce.

A Neat, Comfortable Home
for a railway man, or would be a good investment for anyone as it is always rented. Is situated on Broadway near Woodstock yard, is in good repair and is not expensive.

MY DWELLING HOUSE, BROADWAY,
on one of the most desirable lots in town 76x200, high and dry, bounded front and rear by a public street, well built and exceptionally warm in winter. No better location in Woodstock.

A Farm Containing 92 Acres
within two miles of the town so situated as to give a fine local market. Everything raised on this farm can be sold at highest prices to supply the demand while the roads are impassable at a greater distance. For a man in the milk business or market gardening this farm is a winner.

NORTHAMPTON.

The recent thaw has left the roads bare in a great many places to the great detriment of those who have much lumber, wood and bark to haul.
Chas. F. Rogers and bride arrived home on the late train Thursday night. Mr. and Mrs. Rogers were accorded a very cordial reception by the boys on Friday evening who after partaking of his hospitality and expressing their warmest felicitations, departed to their several homes, joining with us in wishing them a prosperous voyage on the sea of matrimony.
Mrs. Robert Rolston who has been poorly for some weeks is gaining strength.
William Olmstead, of Grafton, while at work lumbering on the railway land had a narrow escape from sudden death last week. While rolling up a log into the seventh tier, by means of a par buckle, the rigging gave away and the log came back with tremendous force, a corner of the scarf striking Mr. Olmstead on the breast as it went over him. Mr. Olmstead is unable to work and is consulting a physician.
Gilman Bros., of Pokiok, are doing a great business lumbering on the farm of Oliver Davenport this winter. They have already banked upwards of ten thousand pieces of pine and spruce. Brewer Bros., Cluff Bros.,

Oliver Speer and others are also banking large quantities of lumber.

The fine residence of Alex. Ives was the scene of a very pleasant little gathering one night recently. A large number of young people from Upper Woodstock, in two large four seated busses, took advantage of the moonlight and good roads to call and pay their respects and were very hospitably entertained by Mr. and the Misses Ives. A great many pleasant games were indulged in and the guests on taking their departure about 2 a. m. were unanimous in their expressions of "a jolly good time."

The sidewalk which the Comedy Co. put down a few years ago, comes in play now. What few places the sun didn't melt, the snow of last week was shovelled off; so, you see, our sidewalk is pretty well looked after. It doesn't require rubber boots to walk through or out of town here.
There was a regular car famine among the produce men here last week, and about two hundred tons of hay coming in daily. They have all the barns and sheds around here filled with hay, and at the station hay was piled up most any place. East Florenceville is certainly a coming town. It deserves electric lights right away.
There was a good crowd at the dance in the Hall, Thursday night. Everybody had a good time, as all hands danced. A number of new dances were put on the floor, but none suited so well as the "Cake Walk", which was quite amusing. Another dam was at once begun inside the first one and finished on Saturday night. The rain has raised the river to such an extent that the ice is considered dangerous, and the work is abandoned. Help... Nature

Babies and children need proper food, rarely ever medicine. If they do not thrive on their food something is wrong. They need a little help to get their digestive machinery working properly.

SCOTT'S EMULSION OF COD LIVER OIL WITH HYPOPHOSPHITES OF LIME & SODA

will generally correct this difficulty.

If you will put from one-fourth to half a teaspoonful in baby's bottle three or four times a day you will soon see a marked improvement. For larger children, from half to a teaspoonful, according to age, dissolved in their milk, if you so desire, will very soon show its great nourishing power. If the mother's milk does not nourish the baby, she needs the emulsion. It will show an effect at once both upon mother and child.

Canadians in New York City.

A striking feature of the recent census is found in the population of the city of New

York, which was set down in 1900 as 3,437,202, of which 1,270,069 were foreign-born, all but about 50,000, being natives of Europe. Of the foreigners not natives of Europe, 22,000, or nearly half are Canadians, and about 300 Mexicans. As Mexico has over twice as many people as Canada, its contribution seems exceedingly small. Taking the citizens of New York born in other States, we find that Canada has given nearly one-tenth as many as all the States in the Union combined. According to the deduction from these figures, made by the assistant director of the census, that the poorer class of people do not go great distances to New York to seek their fortunes, unless they go in steamers from across the ocean, the Canadians, as a rule, who have found the conditions of life in New York endurable are probably the best class that this country produces, and which we can least afford to spare. However, the attractions of very large cities which are not very far off are almost irresistible, though as we get bigger cities at home our contributions to Boston, New York and Chicago will become smaller.
