After Tennyson.  
Break! Break! Break!  
On thy cold, cold cup, oh tea!  
And I would that I could utter  
The thoughts that arise in me!  
I think for the four a week  
That I pay for my table board,  
The grub might be more uplifting  
Than this landlady will afford.  
I'm tired of the rhubarb pie,  
And the daily baked beans, too;  
I don't kick for cream for breakfast,  
But why is the milk so blue?  
I'm tired of rubber beefsteak  
And eggs that are on the verge,  
And I'm willing to sign a round robin  
My bitter complainings to urge.  
Why, even the water they give me  
Has not been allowed to run.  
There may be iced drinks in heaven,  
But in this town never a one.  
I think of this melid muck,  
And I curse as I think of the bill,  
And, oh, for the taste of a sirloin steak  
And of coffee without a chill!  
Break! Break! Break!  
On thy cold, cold cup, oh tea!  
And if I had the landlady here  
She'd listen to something from me!

Agriculture and Dairying in Canada.  
We have received from the Department of  
Agriculture and Dairying at Ottawa a state-  
ment briefly setting forth the attractions  
offered by the Dominion to intending British  
settlers, and the practical assistance which  
the Department of Agriculture is prepared to  
afford them. We quote from it the following  
extracts:—"The Department of Agriculture  
and Dairying endeavours by every means in  
its power to make the agriculturist and the  
dairymen succeed. The cool Transatlantic  
transportation problem was solved by it last  
season by the introduction of cooled air  
accommodation on ocean steamers, and now  
cheese of softer and richer body than heretofore  
is being placed on the British markets.  
To further improve the quality of Canadian  
cheese, the Government are now erecting  
consolidated model cheese-curing rooms in  
certain convenient centres. To-day in Canada  
there are some 3,000 cheese factories with an  
annual aggregate output of 180,000,000  
pounds of cheese, or an average of about  
60,000 pounds per factory per annum; the  
new curing-rooms will increase the value of  
the same quantity by \$1,000 per factory  
annually. To encourage improvement in  
farming, for the last six years upwards of  
30,000 Canadian farmers have participated  
annually in a free distribution of grain seed,  
60 tons of seed being yearly distributed for  
the systematic testing of promising varieties  
of agricultural crops. The Government do  
not wait, for instance, for the development  
of 'smut in wheat,' but just before seeding  
time this year sent out to every known  
farmer and newspaper in the Dominion an  
article showing how to prevent the disease  
by treating the seed in a solution and so  
ensuring sound crops. Experts are periodically  
sent to the United Kingdom of Great  
Britain and Ireland to ascertain how readily  
to extend those markets for Canadian pro-  
ducts, and when they return home they give  
the results of their investigations through  
the same media to flour and oatmeal millers  
who have a hand in preparing the products  
of grains for the home and foreign markets,  
to the curers and packers of meats and the  
manufacturers of cheese and butter, to those  
engaged in the transportation and commerce  
of grain, hay, live stock, meats, butter,  
cheese, poultry, and fruit, as well as the  
canners of fruit and vegetables, and the  
raisers of all kinds of poultry and eggs.  
Orchard cultivation, potato culture, how to  
rotate crops so as to secure the utmost grain  
from the soil without depleting its virtue;  
the analyses of soils and advice as to the best  
crops to sow to ensure the most profitable  
yield and to restore to the ground by natural  
means those chemicals of which the soil has  
been despoiled by a former crop; how to de-  
tect and destroy noxious grasses and weeds  
... these and a thousand and one other  
wants of the farmer, the dairyman, the  
orchardist, and every one else concerned are  
the constant care and solicitude of the Cana-  
dian Government, and are supplied freely  
throughout this vast country, without even  
the cost of postage, letters addressed to the  
Department passing through the mails in  
Canada free."—London, Eng. Times.

Good Health for Capital  
Maintaining good health is to the majority of  
people the most vital question in the world and  
nature affords no more efficient strengthener for  
the system and restorative for the nerves than Dr.  
Chase's Nerve Food. Naturally, gradually, and  
certainly it forms new, red corpuscles in the blood,  
creates new, healthy nerve cells and puts into  
the system the snap, energy and vitality that defies  
disease.  
First Aid to the Injured.  
It seems a pity that among the many  
methods offered to the weak of our generation  
for the undoing of bad habits and the  
counteracting of the consequent physical ills,  
the intellectual backsliders of the day should  
be left to shift for themselves. If nicotine  
and alcohol go down before Notobac and the  
Gold Cure, who shall say, for instance, that  
the noval habit would not yield to proper  
treatment? Will no philanthropic alienist  
give us an effective literary antiseptic, a  
yellow-journal antitoxin, or a French novel  
germicide? Meantime New York 'Life'  
suggests a few handy remedies which have  
been found efficacious in emergencies.

**The Cause of Woman's Ills**

In almost every case where woman  
suffers from ills peculiarly feminine the  
cause is to be found in a weakened and  
exhausted condition of the system. The  
nerves are depleted and the blood thin  
and watery. If medicines have failed to  
cure, it is because the wrong treatment  
has been used.  
Mrs. Henry Clark, Port Hope, Ont.,  
states:—"I have used seven boxes of Dr.  
Chase's Nerve Food for nervousness and  
a completely run down system, and can  
heartily recommend it as a wonderfully  
effective treatment. Before using this  
remedy I had been in very poor health for  
some months. I seemed to have no  
energy or ambition, felt tired and listless  
most of the time, and could scarcely drag  
myself about the house. I was weak,  
irritable and nervous, could not sleep  
well, and felt discouraged about my  
health. Dr. Chase's Nerve Food has  
taken away these symptoms and given  
back my usual health and vigor, conse-  
quently I endorse it fully."  
50 cents a box, at all dealers, or Edman-  
son, Bates & Co., Toronto.

**Dr. Chase's Nerve Food**

Cases of New York "Journal" Jaundice,  
exhibiting a marked contempt for facts and  
gradual development of a yellow streak, may  
be arrested, if taken very early, by homeo-  
pathic treatment. Dose: Fifteen minutes  
of day-before yesterday's paper immediately  
after breakfast.  
Intellectual dyspepsia, following overin-  
dulgence in spiced French entrees and  
Russian translations, requires careful treat-  
ment. A low diet is often recommended,  
such as the "Ladies' Home Journal" and  
"Once a Week." We prefer a few months  
among the Literary Mountains.  
Historical Romantimania is generally re-  
garded as harmless. It is apt to become  
chronic, however, if neglected. A case will  
seldom resist a few doses of the dramatized  
versions.  
One grain of Kant's "Critique of Pure  
Reason" and one grain of toothache, dissolved  
in a teaspoonful of common sense, make a  
good lotion for mental astigmatism due to  
Mrs. Eddy's "Science and Health."

**DR. A. W. CHASE'S 25c.**  
CATARRH CURE...  
is sent direct to the diseased  
parts by the Improved Blower.  
Heals the ulcers, clears the air  
passages, stops droppings in the  
throat and permanently cures  
Catarrh and Hay Fever. Blower  
free. All dealers, or Dr. A. W. Chase,  
Medicine Co. Toronto and Buffalo.

A man advertises in a Syracuse paper for  
a job as general housework servant. He is a  
widower, familiar with all phases of house-  
keeping, and says that he can pickle, wash,  
and iron, enact the parts of the cook and the  
waitress, mind the baby, dust, and take care  
of the furnace.

**Soft Harness**  
You can make your har-  
ness as soft as a glove  
and as tough as wire by  
using EUREKA Har-  
ness Oil. You can  
lengthen its life—make it  
last twice as long as it  
ordinarily would.  
**EUREKA**  
Harness Oil  
makes a poor looking har-  
ness like new. Made of  
pure, heavy bodied oil, es-  
pecially prepared to with-  
stand the weather.  
Sold everywhere  
in cans—all sizes.  
Made by IMPERIAL OIL COMPANY.

**What Are You Doing?**  
In the way of an exhibit for the  
**GREAT**  
**EXHIBITION.**  
SAINT JOHN, N. B.,  
August 30th to September 6th,  
1902.

NUMEROUS GENEROUS PRIZES.  
Also a number of  
Additional Prizes Offered Exclusively  
For Exhibits From  
Each County in New Brunswick.  
The Prize List is now ready, and can be had  
Free on application to the Manager. Get one and  
see pages 34 to 37, 43 to 49, 84 to 87, and 93 to 95,  
for full particulars of the above special induc-  
ements exclusively offered to New Brunswick Par-  
ticipants.  
Everything in connection with our show booms  
encouragingly. Entries and Exhibits in class and  
variety far exceed original expectations; nothing  
hangs fire, everything progresses; and the show  
opens on LABOR DAY.  
A Cheap Fare from everywhere.  
R. B. EMERSON, W. W. HUBBARD,  
Acting President, Manager & Secretary.  
St. John, N. B.

A British Trade Victory.

An example of what can be done in foiling  
the efforts of Americans to capture British  
trade is furnished by the formation of the  
Imperial Tobacco Company of Great Britain  
and Ireland, Limited, with a capital of fifteen  
millions sterling. The thirteen firms which  
this amalgamation comprises united their  
forces last autumn in defence of the great in-  
dustry which the American combine had  
resolved to control. The thirteen firms men-  
tioned control, and will continue to control,  
what may be called the cream of the tobacco  
trade in the United Kingdom. The Imperial  
was formed a short time after the president  
of the American syndicate began operations  
in England last year by adopting the same  
tactics which made him prominent in the  
United States. Having bought out a tobacco  
factory at Liverpool he began to reduce the  
prices of some of the articles produced there,  
and offered, at low prices, certain goods  
which the public were prepared to buy, the  
offer being conditional on orders being given  
for other articles which the public did not  
want. He next cut down the prices of nearly  
all his American manufactures—by as  
much as 40 per cent. in some cases. The  
British shopkeeper and the British smoker  
did not appreciate this generosity. The  
goods met with a poor sale. Those manu-  
factured in the newly-acquired Liverpool  
factory decreased in consumption notwith-  
standing their reduced price. Then he re-  
sorted to advertising on a scale of prodigality  
rarely, if ever, equalled. Still the British  
smoker remained unmoved, except that he  
began to grow suspicious at the lavish adver-  
tising, shrewdly opining that money thus  
disbursed was expected to be recouped by  
him in some shape or other, and believing  
also that the goods so extravagantly "puffed"  
were inferior in quality. With the British  
smoker it is quality that tells, and the aver-  
age Britisher is always ready to pay a fair  
price for a good article. Another point on  
which the American had not reckoned was  
the patriotism of the Briton, which, when  
satisfied as to quality, leads him to prefer  
home-made goods to foreign goods. The  
American tobacco syndicate is, therefore,  
making no headway in the United Kingdom,  
but is losing heavily.  
It is gratifying to note that, since the  
American tobacco syndicate boastfully an-  
nounced its determination to "capture" the  
British tobacco trade, and, in fact, the  
tobacco trade of this world, the business in  
the United Kingdom has immensely in-  
creased, with great profits to the home man-  
ufacturers. At Bristol one firm, employing  
nearly 3,000 people, is now enlarging its  
factories to enable it to employ 1,200 more.  
At Nottingham and Glasgow similar enlarge-  
ments are being made.—Insurance & Finance  
Chronicle, Montreal.

The Evils of Constipation.  
This dangerous condition causes sick head-  
ache, abdominal pains, piles, and in severe  
cases insanity and apoplexy. The most agree-  
able and satisfactory remedy is Ferrozone,  
which makes the bowels so well ordered that  
natural and unassisted action is established.  
It is mild and certain in action and never  
causes distress or inconvenience, and may be  
taken as long as required. Pains in the  
stomach and intestines, piles, biliousness  
and headache disappear at once when Ferro-  
zone is used. Recommended and sold by  
Druggists, price 50c. By mail from N. C.  
Polson & Co., Kingston, Ont.—Sold by Gar-  
den Bros.  
NO PILLS LIKE DR. HAMILTON'S.

The July Lippincott's Magazine.  
Lippincott's Magazine for July is given  
over to fiction, with but one exception in  
favor of a timely subject.  
The complete novel this month is writ-  
ten by Mabel Nelson Thurston, whose fame is  
won as a short-story writer. This most im-  
portant achievement places her among the  
elect as a novelist. The title "On the Road  
to Arcady" is an invitingly cool one, well  
chosen for warm weather. A sub-title sug-  
gests itself: "The Career of Ethelwyn."—  
Ethelwyn being a coquette whose "hair curls,  
eyelashes curl, mouth curls up, even her  
glances curl," the author declares, and in a  
wading episode it is discovered that "her toes  
are the curliest of all." She visits a cousin  
at her Forest-of-Arden home near Wash-  
ington City, who dreads Ethelwyn's advent into  
her Paradise. When the train of "followers"  
also appears, her heart sinks. Of course,  
Ethelwyn marries the man she is not sus-  
pected of caring for, but before this happens  
there is an abundance of adventure and  
flirtation. The tale abounds in whimsical  
humor and is just the right sort to while  
away idle summer hours.  
Following the novel are half a dozen first-  
rate stories varied in length and subject.

Animals and Earthquakes.  
One of the most curious details of the  
Martinique eruption is the prevision of dis-  
aster which almost all the animals in the  
island seem to have had. Cattle became so  
uneasy that they could hardly be managed,  
dogs howled continually and showed every  
symptom of fear, the snakes left the vicinity  
of the volcano, where they abound, and even  
the birds ceased to sing and left the trees on  
the mountain side. All this was in April,  
weeks before the outbreak.  
"Hear about Maalstick? He married a  
woman who won't let him smoke, even in his  
studio."  
"Good gracious! I never knew she had as  
much money as that."

**Twenty Years of Itching Piles**

Mr. Alex. McLaughlin, thirty years  
resident of Bowmanville, Ont., writes:—  
"For twenty long years I suffered from  
itching piles, and only persons who have  
been troubled with that annoying disease  
can imagine what I endured during that  
time. About seven years ago I asked a  
druggist if he had anything to cure me.  
He said that Dr. Chase's Ointment was  
most favorably spoken of, and on his  
recommendation I took a box.  
"After three applications I felt better,  
and by the time I had used one box I was  
on a fair way to recovery. I continued the  
treatment until thoroughly cured, and as  
that was seven years ago, and I have not  
suffered any since, I am firmly convinced  
that the ointment made a perfect cure.  
"I consider Dr. Chase's Ointment an  
invaluable treatment for piles. In my  
case I think the cure was remarkable when  
you consider that I am getting up in years  
and had been so long a sufferer from this  
disease." 60 cents a box at all dealers, or  
Edmanson, Bates & Co., Toronto.

**Dr. Chase's Ointment**

IN A  
**BELL PIANO!**  
or ORGAN

One finds a delightful tone, something  
about it that satisfies.  
The general make up is of the best  
and this is backed by a strong guar-  
antee.  
In selecting a "Bell" you make no  
mistake.

**Watson's Music Rooms.**

C. R. WATSON, Agent,
