Barrister-at-Law, Woodstock, N. B.

The most expensive underwear that money can buy is not better made—won't fit better—wear better or longer—and be more comfortable and more satisfactory in any way than

Stanfield's Unshrinkable Underwear

Made in Canada—of Nova Scotian wool, and guaranteed unshrinkable. A size for every figure. Get your size and it will fit perfectly until worn out. The best dealers everywhere sell Stanfield's.

The Use of Books.

The following rules should find a place in all your scrap-books, where they may often come under your eyes:

- Never hold a book near the fire.
- Never drop a book upon the floor.
- Never turn leaves with the thumb.
- Never lean or rest upon an open book.
- Never turn down the corners of leaves.
- Never touch a book with a damp cloth or sponge.
- Never pull a book from the shelf by the binding at the top, but by the back.
- Never rub dust from books, but brush it off with a soft, dry cloth.
- Always open a large book from the middle, and never turn from the ends or cover.
- Never open a book farther than to bring both sides of the cover into the same place.
- Always keep any neatly bound borrowed book covered with paper while in your possession.
- Never lend a borrowed book, but return it as soon as you are through with it, so that the owner may not—
- Never write upon paper laid upon the leaves.

The Soil that Breeds Fine Horses.

In describing experiments made for the Department of Agriculture on the effects of lime and magnesia upon animal production, D. W. May of the Kentucky Experiment Station remarks that it is a well known fact that the greatest development in live stock has been attained in limestone regions. He adds that in the blue-grass country of Kentucky, long noted for the beauty and quality of its live stock, and especially of its thoroughbred horses, the soil has been formed largely by the disintegration of a limestone very rich in phosphates. But even in that favored region experiments are under way to determine whether the quality of the animals may not be improved by the addition of certain mineral elements to the food.

Sweet Innocence.

While enjoying the new-found bliss of the honeymoon at a seaside pleasure-resort in the north recently, a doting bridegroom hired a tandem tricycle and took his bonnie bride for an afternoon's roundabout run. The fair lady knew little or nothing about wheeling. The fond husband put his head down and plugged along as hard as a galley slave every inch of the thirty-three miles, and when they got to their journey's end the perspiration was streaming from every pore of his anatomy. But not so his charming wife. She stood by as cool and unconcerned as possible, and when the poor Benedict had recovered his breath a little, judge of his feelings when she gingerly touched one of the pedals and sweetly inquired:—

"Oh, Jack, what are these little twirligigs for?"

DR. A. W. CHASE'S CATARRH CURE ... 25c.

is sent direct to the diseased parts by the Improved Blower. Heals the ulcers, clears the air passages, stops droppings in the throat and permanently cures Catarrh and Hay Fever. Blower free. All dealers, or Dr. A. W. Chase Medicine Co., Toronto and Buffalo.

A London schoolmaster, having requested each of his class of lads to bring in three items of information about the Thames that they could prove to be facts, received from one bright boy the following:—

"I have lived near it. I have sailed over it. I have fallen into it. These are facts about the Thames."

Servia's King A Dead Beat.

The following letters exchanged between King Peter of Servia and a Paris financier explain themselves:

"Paris, June 14, 1903.
To His Majesty King Peter of Servia, Geneva:

"I beg to inform Your Majesty that I am the owner of a note of hand signed by Your Majesty 31 years ago in favor of Madame Richet, who at that time kept a jewelry store in Nice. The note was given in payment of a diamond bracelet.

(Signed) "M. Bouvier,"
Geneva, June 15, 1903.

"His Majesty desires me to say that he recognizes his indebtedness to Madame Richet for a certain diamond studded bracelet. We are going to Belgrade to-morrow and, being to busy to attend to the matter now, His Majesty commands that you address the royal Secretary within 30 days advising him how the note got into your hands.

(Signed) "The Court Marshall"
Bouvier complied with Peter's command and on July 12 received the following note from His Majesty's Secretary, dated "At the Royal Palace, Belgrade":

"His Majesty requests me to advise you to report at the office of his attorney, Geneva, at 10 o'clock on July 21. His Majesty's attorney will look into the matter repeatedly mentioned by you and an immediate settlement will follow.

(Signed) "The Court Marshall."
M. Bouvier reported as requested and, having given his name to the attorney, was promptly kicked over the stairs.

"Paris, Sept. 20, 1903.

"Your Majesty, I understand, is much perplexed on account of your agent's inability to borrow money, even at usurer's rates. I think I can solve the matter. Two months ago I sent a fac simile of your note, dated Nice, Oct. 1, 1873, in favor of Madame Richet, to every financier of Europe, reporting the circumstances under which it was issued, namely, that you fell in love with a demi-mondaine and, to gain her favor, obtained a bracelet from Madame Richet on credit. Furthermore, that your note was dishonored and that the cheated woman, as a consequence, went into bankruptcy.

"Further, I sent to the persons mentioned fac smiles of the several 'come-on' letters received from you after your elevation to kingship and the certificates issued by a Geneva physician attesting to the injuries I received at the hand of your representatives when I presented my bill in accordance with Your Majesty's invitation.

"You had the audacity to ask for the loan of 10,000 francs after repudiating your note of hand for 4500 francs made 31 years ago. Permit me to point out that not all financiers are as 'easy' as poor Madame Richet.

"Yours very respectfully,
"Bouvier."

How Rafting Improves Wood.—German experts say that wood which has been floated in rafts, or otherwise, gives a more trustworthy material for joinery and building purposes than does that which has been carted, or otherwise carried dry, to the sawmill and workshop. The reason is that while the wood is lying in the water its sap and albuminous and salty materials are dissolved out. If these substances remain in the wood they readily absorb moisture from the atmosphere, after coming out of the drying rooms, and the wood swells. Artificial processes of washing out the hygroscopic substances from wood which has not been floated are practised in Germany.

Enforcing the Fruit Marks Act.

The inspectors of the Dominion Fruit Division are now devoting special attention to the enforcement of the Fruit Mark Act. Several prosecutions have taken place in Ontario, all of which resulted in convictions, and several are now pending in Nova Scotia. These are mainly for marking inferior fruit No. 1; although there is such a large amount of first class fruit in the country packers still persist in trying to palm off inferior fruit as No. 1.

Mr. W. A. MacKinnon, Chief of the Fruit Division, says that retailers are beginning to understand the scope of the act much better than formerly, and appear well aware of the existence of the law and of the fact that it is being enforced by inspectors. They also understand the fact that it is at the disposal of any private citizen. A prosecution is now pending in Toronto by a private citizen against a retailer who is said to have disclaimed responsibility. Only a single basket is involved but it is clear that if single individuals do not protect themselves in the case of single baskets, they are not likely to do so at all, as ninety per cent. of their purchases are of single baskets. It will be the policy of the department to hold the retailers more strictly to account in the future for the packages of fruit which they pass on to the public. If the retailers do not themselves complain when they find dishonest packing it is because they are willing to share in the fraudulent profit. Of course the original packer will always be prosecuted when he can be discovered, but that will not excuse the retailer.

A BLESSING TO CHILDREN.

"From the fulness of my own experience," writes Mrs. Samuel Hamilton, of Rawdon, Que. "I can say that Baby's Own Tablets are an indispensable medicine in every home where there are infants and young children. They speedily relieve and cure all the common ailments incident to childhood. In fact I think the Tablets are a blessing to children."

It is such sincere, honest words as these that has made Baby's Own Tablets the most popular medicine with mothers all over the land. The Tablets can be given to all children from the tiniest, weakest baby to the well grown child, and where they are used you find only healthy, happy children in the home. You can get the Tablets from any dealer in medicine, or they will be sent by mail at 25c. a box by writing The Dr. Williams Medicine Co., Brockville, Ont.

"He was always of an inquiring turn of mind—wanting to get at the inside of things."
"Where is he now?"
"Inside of a prison for getting inside a bank safe."

Butter Paper, printed and unprinted in one and two pound wrappers, at this office.

It's simply immense and immensely simple.

There really isn't any other separator that will begin to do as much work with the same power required to run a

Sharples Tubular Separator

and there isn't any other separator so simple in construction. Just you call and examine a Tubular if you have any doubts about this.

"Tornado" Threshing Machines,
with "Direct Gear" Horse Power.

MESSRS. CONNELL BROS., Woodstock, N. B.
BRISTOL, N. B., January 14th, 1903

Gentlemen,—I suppose that you are anxious to hear from the Threshing Machine. She has been tried and came out with the following results: In 32 minutes, 34 bushels by measure; in 62 minutes, 58½ bushels by measure; by weight 64½ bushels; this is an accurate statement. Threshing capacity 60 bushels per hour; this Mr. Curtis and myself have decided as correct. She was not forced to run beyond the ordinary rate of speed, cleaned the grain very nice, no clogging, none thrown over, none carried out in the straw. Now gentlemen, there is something more that I will tell you; it would be impossible for one crew of men to tend this machine, they could not stand it at that rate of threshing. Give her grain that has been reaped with a Reaper, and put in the barn in good shape, and she will thresh 600 bushels in ten actual hours, and do her work with ease, and clean in good shape.

Yours truly,
EDWIN PHILLIPS.
SPRINGFIELD, KING'S CO., Oct. 11th, 1902.

MESSRS. CONNELL BROS., Woodstock, N. B.
Dear Sirs,—I suppose you are anxious to hear from the machine. To tell you the truth, I think her the most perfect I ever have seen, runs smooth, and does her work complete, will not waste no matter how fast you thresh, can take care of a bushel per minute with all ease. I am running her with a very light team and every day I use her she seems to run faster.

Yours truly,
JAMES H. PICKELE.
Messrs. Cross & Gillis, of Lakeville, N. B., threshed 610 bushels grain in one day.

Are a Heart and Nerve Tonic, Blood and Tissue Builder and Constitution Renower for all troubled with weak heart or nerves. As a food for the blood, the brain and the nerves, they cannot be excelled.

If you are troubled with Nervousness, Sleeplessness, Nervous Prostration, Palpitation of the Heart, Shortness of Breath, Weak or Fainting Spells, Anemia, or any form of Debility, take

MILBURN'S HEART AND NERVE PILLS.
