CHARLES APPELBY,
Editor and Proprietor.

WOODSTOCK, JULY 8, 1903.

AFTER THE BATTLE.

IN THE vote on the question of giving Mr. A. W. Hay a bonus of \$5000.00, taken last Friday, the result was \$593,400 in favour of granting the bonus and \$167,450 against it, the majority being \$428,100. The total property valuation of Woodstock is \$1,035,000, so it appears that considerably over one half the total property value was voted. The number of citizens who voted for the bonus was 234 and the number who voted against it was only 28, showing a popular majority of 206.

The vast majority of the citizens are deeply gratified with the result, and Mr. Hay should feel highly gratified at the generous and hearty good will shown him by the town. Mr. Hay will be one of our most active and progressive citizens and a distinct acquisition. He is now negotiating for the purchase of a suitable site for the erection of his factories and will at once begin work on them.

The public spirited attitude of the town in connection with the bonus to Mr. Hay will without doubt be exhibited again on another occasion when the vote is taken on the proposition to give a similar bonus, on similar terms, to Mr. A. Henderson, for the erection of a furniture factory here.

Mr. Henderson left on Monday for the Toronto Furniture Exhibition to interest western capital in his design, and there is every reason to believe he will be successful. He took with him a fine array of samples of our native woods suitable for the manufacture of furniture. For example, black and yellow ash, elm, two qualities of birds eye maple, curly birch, black birch, butternut, basswood and poplar. These were all beautifully finished, one side in the natural wood and the other side, in many cases, to imitate other woods not grown here, as oak, mahogany and walnut.

These woods that Mr. Henderson took with him are all found here in large quantities and can be landed in Woodstock about 50% cheaper than such woods are landed at Ontario factories.

Mr. Henderson is a man of the greatest energy and perseverance and if the town will extend the same encouragement to his industry that it did to Mr. Hay he will establish a furniture factory here that will be of immense advantage to us.

The ratepayers who have the interest of the town at heart and who wish to see new industries established here, must not lie back on their oars because of the result of this vote. All citizens must turn out and vote for the Furniture Factory.

Mr. Hay went to Halifax on Monday evening to purchase, if possible, from the People's Bank of Halifax, the Fred Moore mill property on the South side of the Meduxnakeag in town for the erection of his factories.

On Monday afternoon at a special meeting of the Board of Health, permission was given Mr. Hay to slaughter cattle and swine within the town limits.

As Others See Us.

The following article from the Maine Farmer of July 2nd will be very interesting to our readers, showing as it does the inglorious efforts of our friends in the State of Maine to advance their dairy interests. The article contains a generous appreciation of New Brunswick as a farming and dairying country and of Mr. Tilley's work for the advancement of the dairying industry.

OUR COMING DAIRY WORK.

The visit of President Alden of the Maine Dairymen's Association to Aroostook, and the conferences held with Commission Gilman, Dairy Instructor Thompson and other well-known workers has resulted in calling a meeting for conference. The commissioner of agriculture is evidently determined to make this work effective to the individual producer of milk, cream or butter, by helping in every way possible to a better realization of market demands and conditions, inside and out, which in any way can influence quantity or quality of product. Our cream trade, already so large, is to be greatly increased and our butter market, suffering now because of the commercial rating which places name above locality, is to be, through the combined efforts of all interested, set free to go for what it really is. So long as the higher grades of Maine butter sell as Vermont and the lower grades of Vermont sell as Maine, there is work to be done, and wisely that work is to commence with the producer to bring united action for definite results.

Every creamery manager in the state has

been invited to meet the state officers at the State House, Tuesday, July 7, at which time Mr. J. F. Tilley of Woodstock, N. B., who has had official supervision over the work of five counties during the past eight years, is to be present and outline the methods there, the whole thought being to bring all dairymen into closer touch.

The fact that New Brunswick better sells second to Danish, and that holds the standard of the great markets of the world, makes this visit of Mr. Tilley's, and conference with our workers of great importance, and from it will flow an influence to be felt in every locality. More extensive dairy works with more intensive methods of producing and delivering of milk, cream and butter is the watchword and the department is wisely getting into line to meet and co-operate with each and every owner of a dairy herd who feels that such co-operation can be of any benefit to him in his individual work.

THE BUTTER FACTORIES OF NEW BRUNSWICK.

While in Aroostook, the writer drove to Woodstock, N. B., with President Alden, of our Dairy Association and Instructor Thompson, and inspected the butter factory there. Stepping in without warning the normal conditions of the factory were at once apparent, and the satisfaction of the party was genuine as they examined the complete sanitary conditions and found everything in perfect order, clean, sweet, well ventilated every part painted and kept in the best possible manner. Only those familiar with conditions prevailing ten years ago when the government took up the question of encouraging dairying can realize the great stride made.

New Brunswick, shut out of our market by reason of the tariff, is obliged to look to Liverpool and London for the sale of its surplus, and in dairy products the Danish butter leads, and is considered the finest in the world. When this fact is known and with it another of great significance, that today New Brunswick butter sells only one half shilling per hundred pounds less than the choicest of Danish make in foreign markets, the work accomplished by the government and its faithful corps of instructors and inspectors seems beyond credence.

It has been done only by earnest, hearty co-operation with the individual dairymen, just the line of work the State of Maine proposes to take up under the recent act of the legislature. The butter made for foreign trade carrying twelve per cent. moisture was thoroughly tested and its superior quality noted. Daily collections of cream and personal contact with the cream makers backed by skilled methods at the factory, have given this result and the 2,000 lbs. made daily at this factory indicate the growth of the industry and confidence of the farmers. Here the party met Inspector J. F. Tilley, who for eight years has had entire supervision of the five northern counties of the Province and whose faithful services and mastery of all details have given him a deep hold on the heart-strings of the dairymen.

After a complete inspection of the factory Mr. Tilley drove the party to Jacksonville where one of the large cheese factories was inspected, President Alden making thorough work and going into every detail. On this beautiful drive we caught a glimpse of some of the charming farm scenery of the Province and noted what opportunities there are on the St. John for an aggressive agricultural sentiment, growing stronger year by year.

The great orchard of Mr. Sharp we did not have time to inspect, but caught a passing glance of its rich growth as we drove through. The attractiveness of Woodstock with its substantial residences and business places impressed the visitors who found the hour altogether too short, and the desire strong to give more time to an inspection of its industries and visit among its farms. One item of frequent comment was the quality of the horses seen on the streets, in the farm wagons and carts, indicating the presence of good blood and an interest in breeding not seen on this side the line. With a deep feeling of satisfaction the drive back was made, Mr. Tilley being drafted into the party, stolen away from home duties for a day to meet the workers at the institute at Houlton. As we crossed the line, we doffed our hats to the New Brunswick dairymen.

Market for New Brunswick Live Stock.

The demand for eastern bred cattle to put on the ranches of the North West still continues and at the instance of the Agricultural Agent of the Canadian Pacific Railway, one of the largest buyers of stockers in Ontario will come to New Brunswick about the 12th, inst., to get as many car loads of grade Shorthorn Stock or other suitable feeding animals as can be secured. Farmers having cattle of this kind for sale either one or two years old should write location and description of stock to W. W. Hubbard, Agricultural Agent, C. P. R., St. John.

Inseparable Words.

"Say," asked the red faced man in the hotel writing room. "How do you spell 'unmitigated?'"
"Why," replied the stranger next to him, "It's u-n-m-i-t-a-t-e-d, my friend, I wouldn't advise you to call a man a liar of any sort in a letter. You'll get yourself in trouble."

COULD NOT SLEEP.

ON ACCOUNT OF HEADACHE AND PAINS IN THE SIDE.

The Sad Condition of a Bright Little Girl Until Dr. Williams' Pink Pills Came to Her Rescue.

Many young girls, seemingly in the best of health, suddenly grow listless and lose strength. The color leaves their cheeks; they become thin, have little or no appetite, and suffer from headaches and other bodily pain. Such was the case of Bessie, youngest daughter of Mr. Chas. Cobleigh, Eaton Corner, Que. Speaking of his daughter's illness and subsequent cure, Mr. Cobleigh says:—"Up to the age of eleven, Bessie had always enjoyed the best of health and took great pleasure in out-of-door play. Suddenly, however, she seemed to lose her energy; her appetite failed her; she grew thin and pale; slept badly at night, and complained of distressing headaches in the morning. We thought that rest would be beneficial to her, and so kept her from school, but instead of regaining her strength, she grew weaker and weaker. To make matters worse, she began to suffer from pains in the side, which were almost past endurance. At this stage we decided to try Dr. Williams' Pink Pills. After a couple of weeks, the good effect of this medicine was decidedly apparent. Bessie became more cheerful, her step quicker, her eyes were brighter and she seemed more like her former self. We continued giving her the pills for several weeks longer, until we felt that she had fully recovered her health and strength. I honestly believe had it not been for Dr. Williams' Pink Pills, our daughter would not have recovered her health and strength, and I shall always have a good word to say for this medicine."

Dr. Williams' Pink Pills will cure all troubles that arise from poverty of the blood or weak nerves. Among such troubles may be classed anaemia, headache, neuralgia, erysipelas, rheumatism, heart ailments, dyspepsia, partial paralysis, St. Vitus dance, and the ailments that render miserable the lives of so many women. Be sure you get the genuine with the full name "Dr. Williams' Pink Pills for Pale People," on the wrapper around every box. Sold by all medicine dealers, or sent by mail, post paid at 50c a box, or six boxes for \$2.50, by writing direct to the Dr. Williams Medicine Company, Brockville, Ont.

"They say young Folley has been wondering in his mind lately," said one man to another.

"Well," was the heartless reply, "from what I've seen and heard of him he's safe enough; he can't wander very far."

MARRIED.

SCOTT-WETMORE.—At the manse, Glassville, July 1st, by Rev. J. K. Beairto, Mr. Charles W. Scott, of Glassville, to Bessie, daughter of the late Mr. Charles Wetmore, of Kirkland.

MANUEL-IRELAND.—At Woodstock, on the 1st inst., by the Rev. F. Allison Currier, A.M., Chas. R. Manuel, of Presque Isle, Me., to Miss Abbie Edna Ireland, of same place.

SMITH-McCAIN.—At the Baptist church Florenceville, N. B., June 24th, by Rev. A. H. Hayward, Rev. Wylie H. Smith, B. A., pastor of the Florenceville and Bristol Baptist churches to Bertie Archibald McCain, of Florenceville.

Fabrics made into Stylish Garments. When you are in need of a Suit, Trousers or Overcoat, it will be to you interest to consult us.

W. B. NICHOLSON, Merchant Tailor, Woodstock, N. B.

No More Loose Artificial Teeth!

At a large price we have just purchased the secret right to use the famous **Poulson Atmospheric and Adhesive Suction Attachment**, by which it is claimed that a set of teeth will cling so firmly in the mouth that it is even possible to eat the old fashioned Molasses or Maple Candy without the plate moving. This will be good news for many who have suffered from the discomfort of loose plates.
