Two Opinions.

Extract from speech delivered by Mr. D. Drummond, of Myrtle, Ont., before the Farmers' Institute:

Now, therefore, we will direct your attention for awhile to the development of the dairy female, by education and breeding. We take it for granted that we have one bred along straight lines, so as to produce a female with a dairy or milk producing tendency. Here let me say a word against cross breeding. It is the bane of breeding in domestic animals. What does hundreds of years of selection, breeding, education and feeding mean if it does not mean excellency of type or intensified production. They have been refined until their capacity for some special work has been intensified and also their adaptability for doing something else has been practically bred out of them. If any one thinks he can improve by cross breeding let me ask him to continue it until the third or fourth generation and see what he has.

Mr. Duncan Anderson, who is a recognized Shorthorn judge, when speaking at the Amherst Fat Stock Show, having for his subject "The Desirable Points in a Beef Animal," said:

After constitution and feeding qualities we want the right shape. What do I want? I do not want a long thin neck—that is what I want in a dairy cow. When it comes back over the shoulders we want it as broad as my two hands put together. Why? If there is one point in a beef animal that is more important than another it is to see that it is well filled up behind the shoulders. We also want a broad level smooth back, and that is where I say you cannot combine beef with dairy farming.

HEALTH FOR BABY IN WINTER.

Winter is coming on when baby will of necessity be confined to the house a great deal. Unless his constitution is rugged the close confinement will soon tell on his health. An occasional dose of Baby's Own Tablets will act as a safeguard during the winter months. If begun before the winter arrives mothers can be reasonably certain that their little ones will retain good health the months of indoor confinement. Baby's Own Tablets cure indigestion, sweeten the stomach, break up colds, prevent croup, regulate the bowels and keep baby healthy and happy. Concerning the Tablets, Mrs. G. G. Sawyer, Clarenceville, Que., says: "I have used Baby's Own Tablets for my little girl and find that they are the very best medicine that I can give her." Baby's Own Tablets are sold at 25 cents a box by all medicine dealers or may be had direct by addressing The Dr. Williams' Co., Brockville, Ont. Remember they are guaranteed to contain no poisonous drugs—they cannot possibly do harm and always do good.
