CHARLES APPELBY,  
Editor and Proprietor

WOODSTOCK, JULY 15, 1903.

**THE DAY OFF.**

When summer comes with us the question also comes, where shall our young people spend their vacation, where shall they spend the occasional day off that is offered to them.

Our friends in Houlton have solved for themselves the problem of the day off. At Nickerson's Lake they have cleared the land, built many summer cottages, and there they go to refresh themselves from the week's toil. Their energy and patriotism do them credit. All honour to them for finding on the shores of their own waters and in the depths of their own forests the balm for human weariness.

Any man who does his day's work and does it conscientiously, deserves occasionally a change of scene, a change of atmosphere, a day's rest. Some men never take a rest, some never take any thing else, some other men hit the felicitous medium and do their work thoroughly and well, taking a holiday when it is coming to them.

Our Houlton friends have solved the holiday problem for themselves by beautifying the lake a few miles from their town and many of them spend their holidays there.

The people of Woodstock, with a river that might well be the glory of any state in the world, utterly neglects it as a source of pleasure.

If one doesn't care for canoeing and the St. John river has no charms for him and if he must take a drive out of town, there are Lakeville, Hartland, Florenceville, Centreville or Meductic to which one might go.

We have a whole country full of beautiful scenery, calling for the tired people of Woodstock to come and look at rest near.

Let us love our country practically. Let us buy at home, find our recreation on our golf links, on our magnificent river, or in driving through our own delightful country and beside our own refreshing waters.

With a sheet of water like the St. John flowing past us we should have a large canoe club here; we should have many citizens interested in boating and canoeing, and a boat house capable of holding a hundred craft. At present there are about twenty canoes in Woodstock, many of them stored in barns, for the boat houses on the shore will hold only eight or possibly ten.

**Installation of Principal Todd.**

The following account of the installation of the Rev. T. W. Todd as Principal of Cedar Valley Seminary, will be read with interest by his friends in Woodstock. Mr. Todd is the son of the Rev. F. S. Todd and grandson of the late Rev. Thomas Todd. The account is taken from the Baptist Record, of Pella, Iowa:

"Monday night, June 1st, Rev. T. W. Todd, A. M., was duly installed as Principal of Cedar Valley Seminary, Osage, Ia. The exercises were held in the Baptist church and were well attended. Rev. J. A. Earl, D. D., Waterloo, delivered an able address on 'The place of the Christian School in Education.' He spoke first of the relation of the Christian school to state schools and, secondly, of some deductions growing out of his definition of a Christian school. The address was both suggestive and inspiring. Rev. F. W. Parsons, Ph. D., Mason City, followed with an eloquent address. His theme was 'The denominational school.' On behalf of the Board of Trustees C. S. Chase, M. D., an honored alumnus of the seminary, in a neat speech presented to Principal Todd the articles of incorporation of the seminary, and the keys to the buildings, and in accepting the same, Professor Todd spoke with enthusiasm of the seminary's past and of its future, outlining his policy and purpose—viz. to make the institution popular, practical, progressive and permanent. In concluding the exercises, President J. N. Annis, of the Board of Trustees, spoke of his devotion to the interests of the seminary and urged the friends of the institution to stand by the new Principal and co-operate with him in trying to enlarge the school and increase its efficiency. The exercises were interspersed with choice vocal solos, and resolutions expressive of the Board's appreciation of the administration of Col. Abernethy, the former principal, were read. Mr. Todd begins his work under the most favorable auspices. He has already won the hearts of the whole constituency of the school, and his coming to Osage is expected to bring a new era of prosperity to the Seminary which has long been doing excellent work."

**To Prevent Tainted Milk.**

The patrons of a cheese factory have a direct financial interest in supplying only good pure milk, free from taints or bad flavours. Thousands of dollars are lost to the country annually because patrons send to the factories tainted milk, which, if used at all, not only precludes the manufacture of first-class cheese, but diminishes the quantity of cheese per 100 pounds of milk. Some of the chief causes of tainted or gassy milk have been enumerated by the Dairy Division of the Do-

minion Department of Agriculture, in order that patrons may be induced to guard against them. In many cases the source of trouble may be found in

**THE UNDESIRABLE GERMS THAT GET INTO MILK DURING AND AFTER MILKING.**

These germs are always associated with filth in some form or other. Careful investigations show that a very large proportion of the cases of taints or bad flavours in milk and its products are caused by the germs which are always present in the droppings of animals. Such germs are to be found in large numbers wherever such droppings are deposited. The mud of stagnant ponds, where cattle are allowed to drink, and the surfaces of barn-yards or milking yards are always swarming with them. For this reason, the udders and flanks of cows should always be brushed before milking to remove the dried mud, particles of manure, hairs, etc., which might otherwise fall into the milk pail. Straining the milk, while it is necessary to remove to remove the visible dirt, does not get rid of these foul germs, which are the actual cause of the tainted, gassy milk. Improperly cleaned milk pails, strainers and milk cans are constant sources of contamination.

The whey tank is a common source of infection at those factories where the whey is returned to the patrons in the milk cans. This practice is detrimental to successful cheese making, but when it cannot be arranged to have the whey disposed of in some other way, the tank should be kept thoroughly clean in order to lessen the danger of contamination. They should be emptied at least once a week.

**ABSORPTION OF ODOURS.**

It is a well known fact that milk will absorb some odours to which it is exposed. Warm milk will absorb odours quite as freely as that which has been cooled; hence the necessity for removing it from the stable or milking yard as soon as possible after it is drawn.

**AN IMPURE WATER SUPPLY.**

An abundant supply of pure water for the cows is one of the essentials for the production of good milk. When cows are compelled to drink the water of swamps, muddy ponds, or sluggish streams and ditches in which there is decaying animal matter, including their own droppings there is a constant menace to their health, and unless the cows are in good health they cannot give first class milk. Moreover the mud, often full of foul germs, which collects on the legs, flank and udders of the cows, and falls into the milk at the time of milking is a direct source of infection which is often overlooked.

**IMPROPER FEEDING.**

There is in Canada an abundance of good wholesome food available for cattle feeding purposes. The natural pastures are, on the whole, excellent, and it is only in limited districts or at certain seasons of the year that trouble is experienced with weed flavours. Among the cultivated foods, turnips and rape are two prominent exceptions to the rule of suitability which applies in general to Canadian fodder crops. While they are undoubtedly valuable in a ration for growing or dry cattle, if turnips and rape are fed, even in limited quantities, to milking cows, there is a likelihood of imparting to the milk a taint which cannot be eliminated by any process known to the cheesemaker's art. Some first class foods when fed alone, and to excess, will cause indigestion and thus indirectly affect the milk. One example of this kind is found in green clover.

In conclusion it may be said that when cows have free access to salt at all times they will give more milk, which will have a better flavour and keep sweet longer than when they do not get any at all, or receive it only at intervals.

**To Cure a Cold in a Day.**

Take Laxative Bromo Quinine Tablets. All druggists refund the money if it fails to cure. E. W. Grove's signature is on each box. 25c.

**Decay of Confucianism.**

Careful observers in China are noticing the gradual decay of Confucianism. Its sway over the minds of the Chinese literati is by no means what it was even as recently as twenty or thirty years ago. It is true that there is apparently no marked diminution in the number of ancestral halls, the existence of which all over the land serves as an indication of the vitality of the State religion; yet, nevertheless, the more the country is permeated with Western knowledge, the more are the minds of the educated class becoming alienated from the teachings to which before unquestioning obedience was accorded.

The reason for this state of things it is not difficult to comprehend. It is gradually dawning upon the educated young men of China that a knowledge of the Confucian classics is no longer what it was from a commercial point of view. And the comprehension of this fact is sufficient to account for the diminishing interest that is being taken in the acquisition of Confucian learning. It must also be admitted that, as the broader and deeper knowledge introduced and inculcated by Western scholars is becoming assimilated, there is an ever-increasing realization of how inadequate Confucianism is, notwithstanding its merits, to meet the requirements of the present day.—[North China Herald.

**WEAK AND FAINTING.**

**THE SAD PLIGHT OF ANAEMIC PEOPLE.**

They Have Headaches and Backaches—Are Languid and Unable to Stand Exertion.

From the Sun, Orangeville, Ont.

You can always tell anaemic men and women. They are pale, weak and languid. They have headaches and backaches. They can't eat—or they can't digest what little they do eat. And it all comes from poor blood and unstrung nerves. Banish anaemia at once by enriching your blood and toning up your nerves with Dr. Williams' Pink Pills. Thousands of grateful women have said that these pills have restored them after all other means tried had failed. Mrs. Josias McIlroy, of Orangeville, Ont., was a great sufferer for several years and spent much money looking for a cure. To a reporter of the Sun Mrs. McIlroy said: "Several years ago my health gave out completely. I was so weak that I could not do my housework. If I went upstairs my heart would palpitate violently, and sometimes I would faint away through weakness. My nerves were unstrung, and I suffered much from dizziness. I tried many remedies, but they did not help me. Then I was advised to try Dr. Williams' Pink Pills and decided to do so. I am glad I did for the pills soon built me up and made me a well woman. My health remained good until last spring, when I was again taken with weakness. I now know by experience the value of Dr. Williams' Pink Pills and at once got a supply. The result was as beneficial as before and I can conscientiously say the pills have done me untold good. I am grateful for this and hope my experience will benefit some other sufferer."

Dr. Williams' Pink Pills have cured more sickly, pale-faced girls and women than any other medicine ever discovered, for they supply new rich red blood and so strengthen every part of the body. They are equally suitable for men, women and children, and cure not only anaemia, but decline, consumption, indigestion, rheumatism, St. Vitus' dance, and the special ailments which all women dread. These pills can be had through any druggist, or will be sent post paid at 50c. a box or six boxes for \$2.50 by writing direct to the Dr. Williams' Medicine Co., Brockville, Ont. Look for the full name on every box, so that no worthless substitute may be palmed off on you.

Wiggins: "I suppose you've heard poor Goodfellow died suddenly last night?"  
Jiggins: "Good gracious, no! Well, it's too bad of him; why, he promised to lend me a fiver today, faithfully."

"For some time past," said Mr. Pompos Nuritch, "I've been contemplating a visit to the scenes associated with the lives of my ancestors."

"That so?" replied Pepprey; "going slumming, eh?"

**MARRIED.**

BOYLE-MCFARLAND.—At the Manse, Glassville, July 8th, by Rev. J. K. Bearisto, Mr. Robert James Boyle, of Glassville, to Eliza Ann, daughter of the late Mr. Thomas McFarland, of East Glassville.
