Wednesday evening the young ladies of Andover entertained the gentlemen at a Leap year ball in Beveridge's Hall. The young ladies are to be congratulated for having carried out their parts as escorts so well and the young men had no chance to complain of neglect. The hall was very tastefully decorated with flags, bunting and banners. Dainty refreshments were served during the evening by the young ladies. The night was very disagreeable outside, but one could not but forget it in the midst of merry faces and pretty dresses. All pronounced it a most successful and enjoyable evening and wished that Leap year would come more often. Thanks to the young ladies.

Lakeville.

Election is drawing nigh and we pray the authorities to use their power in keeping this polling booth down to its former level of quietness and freedom from drunken brawls.

Rev. E. C. Turner preached an opportune sermon in the Williamstown church last Sunday morning. The reverend gentleman denounced bribery and every form of political corruption and urged young and old voters to throw a clean ballot with a clear conscience neither tempting others nor accepting a bribe from either party.

Miss Gertrude McDonald of St. John

That Question of Value.

Fit-Reform emphasizes the question of value. It sells to men who know quality. It's worn by men who recognize the value they get in it.

We want you to see Fit-Reform Suits and Overcoats. Study them. They are worthy of critical inspection, even if you are not ready to buy.

Seeking Information.

Chauncey Olcott's appreciation of humor will stand the strain even when the point is against him. He tells of being at a reception and of meeting a particularly bright and even impertinent miss.

'I wanted to say something apropos to her,' he said to a friend, 'she was so pretty. She looked as if she might be athletic, played golf, and all that.'

'Ah, miss,' I inquired, 'do you love outdoor sports?'

'Oh, I don't know,' she replied coyly; 'if they're not too old. Are you one?'

1,800,000 People

Have Asked Us to Buy Them a 50c. Bottle of Liquozone.

We offer to buy the first bottle of Liquozone, and give it free to each sick one who asks it. And we have spent over one million dollars to announce and fulfill this offer. Our object has been to let Liquozone itself show what it can do. A test is better than testimonials, better than argument. In one year, 1,800,000 people have accepted this offer. They have told others what Liquozone does, and the others told others. The result is that millions now use it. It is more widely employed than any medicine ever was—more widely prescribed by the better physicians. And your own neighbors—wherever you are—can tell you of people whom Liquozone has cured.

Not Medicine.

Liquozone is not made by compounding drugs, nor is there alcohol in it. Its virtues are derived solely from gas—largely oxygen gas—by a process requiring immense apparatus and 14 days' time. This process has, for more than 20 years, been the constant subject of scientific and chemical research.

The result is a liquid that does what oxygen does. It is a nerve food and blood food—the most helpful thing in the world to you. Its effects are exhilarating, vitalizing, purifying. Yet it is a germicide so certain that we publish on every bottle an offer of \$1,000 for a disease germ that it cannot kill. The reason is that germs are vegetables; and Liquozone—like an excess of oxygen—is deadly to vegetable matter.

There lies the great value of Liquozone. It is the only way known to kill germs in the body without killing the tissues, too. Any drug that kills germs is a poison, and it cannot be taken internally. Medicine is almost helpless in any germ disease. It is this fact that gives Liquozone its worth to humanity. And that worth is so great that, after testing the product for two years, through physicians and hospitals, we paid \$100,000 for the American rights.

Germ Diseases.

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Liquozone attacks the germs, wherever they are. And when the germs which cause a disease are destroyed, the disease must end, and forever. That is inevitable.
