

MANY USES FOR SHEEPSKIN.

Extent to Which it is Employed For The Necessaries of Life.

(From the 'Shoe Retailer'.)

'Many people use sheepskin without knowing it,' remarked a Salem manufacturer. The warm, soft, furry rug in which baby is wrapped as winter approaches is of sheepskin, and so are the little pink shoes that are fastened on baby's feet. Very likely the little one's carriage is upholstered with the same stock, too. The boy holds up his first pair of trousers with sheepskin tipped suspenders, and the snake skin for fancy leather belt that encircles the waist of the girl is only humble sheep in disguise.

'The woman who admires a purse from the skin of a "dear little African monk" is only paying tribute to the same old sheep, and the man who fancies that his cigar case is from the skin of the Arctic seal has only a small section of a Chicago slaughtered sheep in his hand.

'The society belle who slips her tired feet into a pair of boudoir slippers, or even Bangor moccasins, doesn't get away from the sheep, and the young dude who selects a moleskin vest for winter wear because King Edward wears one, is only giving an order for more sheepskin.

'The college man enters the world with his sheepskin diploma in his hand. The judge passes down weighty decisions as he sits on sheepskin upholstered chairs, and the lawyer reads opinions from sheepskin volumes. The travelling man hustles about with an alligator travelling bag, under the fond delusion that he is carrying a bit of the skin of the Florida monster, but he has still got that same old sheep.

'The pugilist puts on a bit of "mutton" when he dons his boxing mitts, and the youth who kicks the football about is only giving a boost to the sheepskin trade. Nearly every pair of shoes has a piece of sheepskin about them, and some are made chiefly of sheepskin.

'A number of the modern fashioned leather garments are also of sheepskin or are sheepskinned lined. The sleeping bag in which the traveller in the Arctic or the huntsman in the woods crawls for a night's warm rest once protected the flesh of the same old sheep. The chamois skin with which the society girl brightens up her complexion in the morning is still the same old sheep. In fact, night or day, it is hard to get away from sheepskin.'

Do You Choose

YOUR MEDICINE WITH CARE AND INSIST ON HAVING

DR. CHASE'S SYRUP OF LINSEED

AND

TURPENTINE

FOR AILMENTS OF THE THROAT AND LUNGS.

You cannot be too particular in buying medicine.

It may be a question of life or death. There are so many cough and cold remedies that there is a tendency to be careless in the selection of treatment, and yet what is more dangerous than a cold?

You would not think of taking any medicine that might be offered for heart trouble or kidney disease and yet far more people die from the result of neglected colds than from these ailments.

INSIST ON HAVING A MEDICINE OF RELIABILITY AND REPUTATION SUCH AS DR. CHASE'S SYRUP OF LINSEED AND TURPENTINE.

This great family medicine has stood the test of years, and never disappointed those who put their trust in it as a cure for croup, bronchitis, whooping cough, asthma, coughs, colds and throat troubles.

Do not be satisfied with substitutes and imitations, for they lack the curative powers which have given Dr. Chase's Syrup of Linseed and Turpentine its world-wide reputation.

MRS. GEO. GOOD, Tichborne, Addington Co., Ont., writes:—"It is with pleasure that I certify to the wonderful success of Dr. Chase's Syrup of Linseed and Turpentine as a cure for coughs and colds. It is the best and surest treatment for coughs and colds that we have ever been able to find.—Mrs. Geo. Good, Tichborne, Addington Co., Ont."

MRS. A. A. VAN BUSKIRK, Robinson street, Moncton, N. B., writes:—"For years I have used Dr. Chase's Syrup of Linseed and Turpentine for my children when they have colds in the winter. I first used it with my daughter, who suffered from a severe form of asthma. The least exposure to cold would lay her up and she would nearly suffocate for want of breath. I must say I found it to be a most satisfactory treatment, and it has entirely cured her. It seems to go direct to the diseased parts and bring the desired relief."

Dr. Chase's Syrup of Linseed and Turpentine, 25 cents a bottle, at all dealers, or Edmanston, Bates & Co., Toronto.

Guinea Fowls on The Farm.

Guineas, though not so profitable as hens on a farm, will pay very well when cared for in the right way. When kept confined, they

will not pay for their keeping; being naturally very shy, they dislike to come in contact with people much as is necessary. One can to a certain extent overcome the wild disposition by proper training, but the work must be begun early. The best way is to place part of a setting of guinea eggs under an ordinary hen, when she has been setting place a few hen's eggs among them. As the guineas require four weeks of incubation and the others only three weeks, all will thus hatch together.

Guineas being wild, the first impulse of the young chicks is to run away from the hen but by bringing them up with chickens which mind the hen from the start, they quickly learn to do the same, and such a flock can often be cared for almost exactly like other fowls. By feeding them in or near the hen house every night, they can often be induced to come there to roost with the other fowls.

They can seldom be induced to lay in the nest provided for them, but prefer to hide the eggs among weeds or brush, where it is almost impossible to find them. As, however, they are such noisy creatures, one can discover the nest by watching closely. Besides this advantage, the noise of the fowls is a great help in keeping the hawks away from the premises; the latter seldom make trouble where guineas are kept. Their nest is usually small, rather deep hole in the ground, and a nest will sometimes be found full to overflowing with the small brownish eggs.

Guineas, unlike hens, do almost no damage in the garden, their principal food being grains, bugs, and worms. They do not scratch, not being intended by nature for that work, but are more like a bird, being provided with strong wings which will carry them over any chicken fence that can be made.

The eggs are very rich, and are considered by many cooks better than hen's eggs, having a greater proportion of yolk. The flesh of a guinea is also beginning to be better appreciated, many people preferring it to wild game. Where a few years ago no market could be found for guinea fowls, the demand in many cases now far exceeds the supply.—correspondence Country Gentleman.

A GUARANTEED CURE FOR PILES.

Itching, Blind, Bleeding and Protruding Piles Druggists refund money if PAZO OINTMENT fails to cure any case, no matter how long standing, in 6 to 14 days. First application gives ease and rest. 50c. If your druggist hasn't it send 50c. in stamps and it will be forwarded post-paid by Paris Medicine Co., St. Louis, Mo.

The Curse of Flannels.

At the age of six I found myself—infelix!—removed to a town possessing a bleak climate and many woollen manufactories. It was the custom of the house mothers to buy flannel by the piece direct from the factory; red flannel, hot, thick, felled like a Laplander, and the invention of Lucifer. Out of this flannel was cut a garment, a continuous, all-embracing garment, of neuter gender, in which every child in that town might have been observed flaming Mephistophelianlike after the morning bath. A pattern was given to our mother. The hair shirt—I laugh when I read! By definition the hair shirt must have possessed geographical limits of attack, but my flannels left no more unticketed, untortured; they heated the flesh until scarlet fever paled into a mere pleasantry, and they soured the milk of amiability with me for ever. The rotation of the seasons reduced itself to terms of red flannel. In the autumn, when the happy fowls and foliage alike moulted, shed the superfluous, when bracking October set the body in a glow, I alone of living things must be done up in flannel!

And spring, that season of vernal bourgeoning, was the time when I, too, like any other seedling, slipped free of all stuffy incasings, and could sprout and spring in air and sun, clad in blessed, blessed muslin. I shall never forget the corroding bitterness induced by flannels. At times they absolutely reduced me to fisticuffs with my religion, so that filial piety, the ordaining of the seasons, and the very catechism itself, hung in the balance of the conflict. I believe I can hardly overestimate the spiritual detriment done me by my flannels.—[Atlantic Monthly.]

Raising The Variag.

Geo. Kennan thus describes in the New York Outlook the raising by the Japanese of the Russian cruiser Variag, which was sunk in the first naval battle of the war: "Owing to the fact that the launching tubes were all filled with torpedoes when the cruiser sank, the work of dismantling the hull, and getting out the armament was not only difficult, but extremely hazardous. A little carelessness, the breaking of a tackle, or an accidental blow, might explode one of the torpedoes, and that would not only destroy the hull, but probably kill every diver below the surface of the water. I am quite sure that I should rather have a torpedo shot at me in a naval fight than try to get one out of its launching tube by the dim light of an incandescent burner at a depth of thirty or forty feet in the gloomy hull of a sunken vessel. Japanese sailors, however, are not only courageous, but skilful, and they succeeded in removing three torpedoes, ten big six inch guns, and twenty-five smaller pieces of ordnance, without a serious accident of any kind. The work

Underwear a Farmer Needs

Regular weights won't do for the farmer. He must be warmer clad, because his work about the farm and long drives to town keep him out in the cold so much.

Stanfield's Unshrinkable Underwear

comes in special weights, especially for farmers. Special weights don't mean clumsy, bulky garments. Stanfield's Underwear is so warm because of the peculiar knit of the garments. It's pure Nova Scotia wool, that has been treated to take out the shrink and leave in the softness. We—and your dealer—both guarantee Stanfield's to be unshrinkable.

was greatly facilitated by the accidental discovery in one of the cabins of a complete set of plans and drawings of the Variag, showing all her compartments, and the location of everything on board. Admiral Arai, who was in charge of the work, hoped to get all the weights out of the vessel within a short time. He intended then to put her on an even keel; patch up the shot-holes in her under body; build up her sides, if necessary, so as to bring them above the surface at low tide, and finally, throw the water out of her with powerful centrifugal pumps. It was his ambition, he said, not only to raise her, but to take her to Sasebo with her own engines, which he believed to be practically uninjured. The expense of the salvage operations on the Variag will be about \$300,000 yen, or \$150,000, and as her batteries are in perfect order, she can probably be put in fighting trim again, in one of the Sasebo dry-docks, in less than six months, and at a comparatively small fraction of her original cost. Japan will then have another armored cruiser to replace the Yoshino."

FARM FOR SALE.

I am offering for sale one of the leading farms in Carleton County, centrally located, well watered, well wooded, under a good state of cultivation, buildings first class. Terms easy. For further particulars apply to J. W. ASTLE, Gen. Ins. Agent, Queen St., Woodstock.

Sept. 21, 3 mo.

SALESMEN WANTED.

Salesmen wanted at once to represent "Canada's Greatest Nurseries." Special list of new and Hardy Specialties in Fruits, Ornamentals, Shrubs and Roses. Liberal inducements, pay weekly, exclusive territory, handsome free outfit. Spring season's canvas now starting. Write now for full particulars. STONE & WELLINGTON, Toronto. Oct. 26th, 9ins.

THE PERRIN RIDING PLOW.

This is the only satisfactory Sulky Plow that has ever been introduced on the St. John River.

It does better work and hauls quite as easy as any handle plow. Works equally well on rough or stony land.

The proof that it is a satisfactory plow lies in the fact that we sold upwards of a hundred of them last season and the demand is steadily increasing.

We will nearly double these figures next year.

We supply them in both single and double.

Sold only by us and our agents.

Beware of Imitations.

Nine Nations

Now Use Liquozone. Won't You Try It—Free?

Millions of people, of nine different nations, are constant users of Liquozone. Some are using it to get well; some to keep well. Some to cure germ diseases; some as a tonic. No medicine was ever so widely employed. These users are everywhere; your neighbors and friends are among them. And half the people you meet—wherever you are—know some-one whom Liquozone has cured.

If you need help, please ask some of these users what Liquozone does. Don't blindly take medicine for what medicine cannot do. Drugs never kill germs. For your own sake, ask about Liquozone; then let us buy you a full-size bottle to try.

We Paid \$100,000

For the American rights to Liquozone. We did this after testing the product for two years, through physicians and hospitals, after proving, in thousands of different cases, that Liquozone destroys the cause of any germ disease.

Liquozone has, for more than 20 years, been the constant subject of scientific and chemical research. It is not made by compounding drugs, nor with alcohol. Its virtues are derived solely from gas—largely oxygen gas—by a process requiring immense apparatus and 14 days' time. The result is a liquid that does what oxygen does. It is a nerve food and blood food—the

most helpful thing in the world to you. Its effects are exhilarating, vitalizing, purifying. Yet it is a germicide so certain that we publish on every bottle an offer of \$1,000 for a disease germ that it cannot kill. The reason is that germs are vegetables; and Liquozone—like an excess of oxygen—is deadly to vegetable matter.

There lies the great value of Liquozone. It is the only way known to kill germs in the body without killing the tissue, too. Any drug that kills germs is a poison, and it cannot be taken internally. Every physician knows that medicine is almost helpless in any germ disease.

Germ Diseases.

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Liquozone attacks the germs, wherever they are. And when the germs which cause a disease are destroyed, the disease must end, and forever. That is inevitable.

Hay Fever—Influenza
Kidney Diseases
La Grippe
Leucorrhea
Liver Troubles
Malaria—Neuralgia
Many Heart Troubles
Piles—Pneumonia
Pleurisy—Quintess
Rheumatism
Scrophulous—Scrophulous
Skin Diseases
