Drugs That

Cure People

All drug stores look alike to many people. This is not strange because the things which may indicate a vital difference in the character of stores are not apparent to those unacquainted with drugs.

If you knew the significance of the names on our original packages of drugs, you would see that we buy the finest goods to be had, the goods that stand for all that is best in pharmacy.

We use such drugs because you ought to have them, and because your physician wants them used in the prescriptions he writes for you.

If we fill your prescription you can feel sure about it.
