Putting Baby Asleep.

If Baby is restless or sleepless do not give it "soothing" medicines to make it sleep. These medicines always contain opiates, and you are merely drugging the little one into temporary insensibility—in fact you are placing its life in peril. Restlessness and sleeplessness is usually the result of some trouble of the stomach or bowels, and if this is removed the child will sleep naturally, and awake bright and healthy. Baby's Own Tablets cure all stomach and bowel troubles, and the mother has a solemn assurance that the medicine contains no opiate or harmful drug. Mrs. Louis Reville, Gawa, Ont., says:—"My Baby suffered from Colic, cried a great deal and was very sleepless. After giving him Baby's Own Tablets the trouble disappeared and through giving him an occasional Tablets since, he has always been healthy, and is now a strong rugged child. No mother should ever be without the Tablets in the house." You can get Baby's Own Tablets from any dealer in medicine, or if you write to The Dr. Williams Medicine Co., Brockville, Ont. the Tablets will be sent by mail at 25cents a box.

The sequel I heard later.

Toward the end of the week, when the campers were tired of the fishing and probably of each other, they decided that the
