

THE WOODSTOCK DISPATCH.

CHARLES APPLEBY, Editor and Proprietor.

WOODSTOCK, N. B., MAY 10, 1905.

THOSE EDUCATIONAL CLAUSES.

Commenting on the note on Mr. Borden's amendment to the Autonomy Bill Toronto Saturday Night sings this doleful song. "That there were but fifty-nine who for any purpose, patriotism, principle or politics, showed themselves opposed to the objectionable features of the Autonomy Act, is the gravest evidence ever provided of the decadence of the Canadian House of Commons. The degeneracy of the times and the cheap quality of our public men were undeniably demonstrated by the votes of 140 alleged representatives, led mainly by social and religious prejudices. . . . What a hopelessly despondent note, what a rancorous spirit seems to pervade this strain. Come, let us be fair; let us be reasonable; let us exercise our common sense. Most of these men were capable citizens and fairly good fellows previous to the last federal elections. Surely all the decency hasn't been worn out of them in less than a year. Lest we despair entirely of a happy future for our fair country let us turn from this sad wail and list to the melodious warble of that sweet singer of the breezy west the Calgary "Eye Opener." That Journal publishes what purports to be a letter from a special travelling correspondent for the Toronto Globe to his Editor. The epistle reads thusly:

CALGARY, April 19, 1905.

Editor, The Globe, Toronto,
Dear Sir,—That revolt in the West over the school question which you sent me out here to investigate turns out to be a fake. No one here seems to give a damn about the school question. I have not heard the subject mentioned either on the street, in hotel parlours or in the bars. Today I buttonholed six citizens of Calgary in succession and asked each of them what he thought of the school question. The first four laughed pleasantly and invited me to come and have a drink—a "jolt." I think they called it, —thereafter turning the conversation into baseball and racing channels. The fifth man, in answer to my query, said "What school question? Oh yes, to be sure, I forgot. It's all right as it is, I reckon. We're not losing any sleep over it anyhow. Ever take anything?" The sixth man replied by saying rather sharply, "You are from Toronto, are you not?" On answering that I represented The Globe he said—(I hate to tell you)—but he said that YOU, the editor, were baghouse. I do not know what this means, but that is what he said.

Observing my discomfiture he proposed that we go and have a drink, after which he loaded me up with all sorts of information about cattle and horses and winter wheat. Hauged if I can locate the revolt over the school question. Please wire its exact location and oblige.

Yours truly,

PETER PARLEY.

Isn't that refreshing. Now let us all sit up and look pleasant. We have all got to live right side by side in this Canada of ours and let us try and live like men and brothers. What with the line fence, and the train service, and the golf fiend and the Lord's Day Alliance ours is a stony path at best. Let us help each other over it.

The Great White Plague.

(Continued from 1st page.)

temperature of the milk should be raised to from 125 to 150 degrees. This would be sufficient to destroy the bacilli and yet it will not injure the ferments in the milk which are such valuable aids to digestion. It is most unsafe to use any flesh that has become infected. If the market inspector does his duty we need have no fear of infected meats."

"It is most essential that our streets be kept clean. Expectoration on the sidewalks and steps should be prohibited. The trains of ladies' gowns come into contact with the sputum and it is that of a consumptive person infection of dwellings is the natural result. A microscopic expert in the city of Buffalo cut a square inch of material from the inside of his wife's gown and on it he found the germs of scarlet fever and other diseases and upwards of one thousand bacilli tuberculosis. This danger can be averted and citizens should see that the disgusting practice is stopped and that their streets and sidewalks are kept clean. It would also be a good thing if women were prevented by law from wearing long trains on the street."

"Consumption can be cured. There are three stages of the disease, viz., the preliminary stage, the second stage when cavities begin to form in the lungs; and the third and last stage when the cavities become numerous and greatly enlarged. Of the first class of cases German doctors say that from eighty to ninety per cent. can be cured; of the second only from forty to forty five can be cured; and of the last about one in three hundred can have anything substantial done for them. As a rule the only thing that can be done for persons in the last stages of consumption is to make everything as easy and comfortable as possible for them."

"The following are the leading symptoms of consumption; a tendency to lose weight; a sense of languor; an indisposition for either mental or bodily labour; a slight reduction of the temperature in the morning with a feverish condition of the body in the afternoon, accompanied by a sense of despondency in the forenoon and a feeling of cheerfulness in the latter part of the day. These signs cannot be said to be unfailing, as other diseases have similar symptoms. Therefore the wisest and safest plan is to consult a medical man if you have the slightest fear that you are in danger from consumption. Do not try patent medicines, do not consult quacks who advertise a sure cure. Then is no secret cure for consumption; no specific has yet been found; but since the investigations and discovery of Dr. Koch there is strong ground for hope for the discovery of a cure; none, however, has yet been found. The doctor will advise you to get lots of sunlight and fresh air; he will tell you the foods to eat that will suit your own particular constitution; he will advise you to take plenty of proper exercise and to get plenty of sleep and rest. He will also give you medicines that will build up your system so that it can be in a position to withstand the attacks of the destroying germs."

"I must sound a warning to the young men and women. Do not marry a consumptive person. Your chances of acquiring the disease are strong enough without doing this. No matter how strong an attachment you may have formed you should avoid taking such a dangerous step. It is simply preparing unspeakable misery for yourself and partner."

Dr. Moore held the attention of his audience throughout the lecture. At the close, on motion of Councillor Henderson, a unanimous vote of thanks was tendered him to which he responded briefly, expressing his pleasure at the interested attention shown by his hearers.

POOR, WATERY BLOOD.

The Cause of Pimples and all Disfiguring Eruption—Dr. Williams' Pink Pills the Only Cure.

Poor, watery blood—pale blood—is the cause of every pale complexion. Bad blood—blood filled with poisonous impurities—is the cause of every bad complexion. Bad blood is responsible for eruptions, and pimples, and torturing, burning itching eczema. These troubles can only be cured through the blood, and the only medicine that actually makes new blood—is Dr. Williams' Pink Pills for Pale People. The new blood which these pills make reaches every organ and part of the body. It clears the complexion, banishes pimples and eruptions, and brings health, strength and happiness. Miss Lizzie Lobinger, Carlsruhe, Ont., says: "Dr. Williams' Pink Pills is the best medicine I know of for cleaning the blood of impurities. My blood was in a bad condition, and as a result I was not only weak and run down, but was troubled with pimples and eruptions. I tried several medicines, but they did not help me. Then I was advised to take Dr. Williams' Pink Pills, and these soon relieved me of all my troubles. I can recommend the pills to anyone suffering from bad blood."

Bad blood is the cause of nearly every disease that afflicts humanity. It is because Dr. Williams' Pink Pills make new, rich red blood that they cure such troubles as anaemia, heart palpitation, headaches and backaches, rheumatism, neuralgia, indigestion, kidney and liver troubles, and ailments of girlhood and womanhood. But you must get the genuine pills with the full name, "Dr. Williams' Pink Pills for Pale People," on the wrapper around each box. Sold by medicine dealers everywhere or sent post paid at 50 cents a box or six boxes for \$2.50 by writing the Dr. Williams' Medicine Co., Brockville, Ont.

Russian Fleets Join Forces.

Word comes at the hour of going to press that the Russian squadrons under Admirals Rojestvensky and Nebogoff have at last joined forces. They have left Koug-Hai Bay, presumably to fight, though their exact destination is unknown. The Japanese warships are reported to be concentrating in the straits of Formosa, the scouting line being much extended. Naval experts are of the opinion that odds as to the result of the impending conflict are about even.
