## THE DISPATCH.

Incubator is a very profitable and easily managed occupation. Unless you want to go into it extensively it need take but very little of your time. Government reports show that the demand for chickens in Canada is greatly in excess of the supply and Great Britain is always clamoring for more. That means a steady market and good prices for chickens.

You cannot raise chickens successfully with a setting hen. She is wasting time setting when she should be laying. While she is hatching and brooding a few chickens she could be laying five or six dozen eggs. The percentage of chickens she hatches is much less than that produced by the Chatham Incubator.

It will pay you to own a Chatham Incubator.

Chatham Incubators contain every improvement of importance in Incubator construction that has been produced. They are made of thoroughly seasoned wood, with two walls, case within case. Between these walls mineral wool is packed forming the very best insulation. Each piece of the case is mortised and grooved and screwed, making the whole as solid as a rock. Chatham Incubators are equipped with scientifically perfect regulators which are an infallible means of regulating the temperature.

# No cash to pay until October, 1905.

We will start you raising poultry for profit with a Chatham Incubator without one cent of money from you until next Fall. That means that you can take off seven or eight hatches and make considerable money out of the Incubator before the first payment becomes due.

We couldn't make this offer if we were not certain that if you accept it

### WOODSTUCK, N. B., JAN. 11, 1905.

#### Will it Pay the New Brunswick Farmers to Grow More Stock.

There is perhaps a part of Canada where there is less live stock per acre of cleared land than in the St. John River Valley. Just why this is so is perhaps due to a variety of reasons which we shall not attempt to analyze here.

There are few men who know the district but will acknowledge that it is well adapted to stock raising and nearly all credit that more stock means better farming, larger crops, and ultimately larger returns from the farm.

The markets are calling for good meats and hundreds of thousands of dollars annually go West for beef, mutton, pork, and even dairy products and poultry.

While we have given a great deal of attention to the dairy business and in some sections with good success, it is nevertheless true that for the farmers of the St. John Valley proper the special dairy cow is not and will be for some time to come a popular and desirable animal.

We have at the present time neither the labour supply nor the inclination to go exclusively into dairying, but many of our farmers are trying to raise stock, and produce milk as an incident thereto, and if we had more stock of the right type not only could our meat production be greatly augmented but we would also produce more milk.

I have the testimony of many men that they are willing to raise young cattle and milk a few cows but they will not tie themselves down to dairying. In fact rather than do this they have gone out of stock entirely. To assist these men to restock their farms should be the effort of our Agricultural Societies and the Departments of Agriculture.

The introduction of Shorthorn bulls will do more towards it than anything else. Growthy, thrifty steers can so be had and heifers that if reared right will hold their own with any cows in milk production. We have only to see what cattle the hard headed farmers of England are keeping for milk production to get an insight into the possibilities of production through the use of Shorthorn blood. Fully four fifth of all the milch cows of England are shorthorns or shorthorn grades.

Herewith are the milking records of some of the purebred English herds:-

At Tring Park, Lord Bothschild's herd of 40 pedigreed Shorthorn cows gave from Sept. 27th, 1903, to Sept. 24th, 1904,-254,481 lbs. milk, and average per cow of 6,362 lbs. The Babraham Hall Shorthorn herd, Cambridge, Eng., owned by C. Adeane, during 1903 averaged 8,144 lbs milk per cow. The Underly Shorthorn herd of Lady Henry Bentinok contains one cow with a record last year of 14,500 lbs. milk; several cows with records from 10,000 to 12,000 lbs and many cows from 7,000 to 8,000 lbs. This herd also produced from one of these deep milking cows the Champion Shorthorn beeve at the Leeds Smithfield Show of Fat Stock. The great advantage about the large strong deep milking grade shorthorn is that her calf from the day it is dropped is a valuable asset. Mr. Robert E. Turnball, an English agricultural authority says of the situation in making milk and meat: "There is no more profitable investment in connection with live stock under good management than an herd of well-bred deep milking cows of the dualpurpose type such as may be seen on farm after farm of Cumberland. These cows are chiefly well bred unregistered shorthorns. The calves from these cows make excellent grazing cattle that produce beef of high quality.

# One Million Dollars

# Have Been Spent to Give Liquozone Free to the Sick.

When we purchased the rights to kill. The reason is that germs are Liquozone, we decided to buy the vegetables; and Liquozone-like an Eczema-Erysipelas Fevers-Gall Stones Goitre-Gout Gonorrhea-Gleet first bottle and give it free to each excess of oxygen-is deadly to vegetal sick one we learned of. We published matter.

in America, and 1,800,000 people have zone. It is the only way known to kill accepted it. In one year it has cost germs in the body without killing the us over one million dollars to an- tissues, too. Any drug that kills germs nounce and fulfill the offer.

Don't you realize that a product ternally. Medicine is almost helpless you, if you need it.

### **Kills Inside Germs.**

Liquozone is not made by compounding drugs, nor is there alcohol in it. Its virtues are derived solely from gas -largely oxygen gas-by a process requiring immense apparatus and 14 days' time. This process has, for more than 20 years, been the constant subject of scientific and chemical research.

The result is a liquid that does what oxygen does. It is a nerve food and blood food-the most helpful thing in the world to you. Its effects are exhilarating, vitalizing, purifying. Yet it is a germicide so certain that we publish on every bottle an offer of \$1,-000 for a disease germ that it cannot

the offer in nearly every newspaper There lies the great value of Liquois a poiscn, and it cannot be taken in-

must have wonderful merit to make in any germ disease. It is this fact never tried it, please send us this such an offer possible? We have never that gives Liquozone its worth to coupon. We will then mail you an orasked a soul to buy Liquozone. We humanity. And that worth is so great der on a local druggist for a fullhave published no testimonials, no that, after testing the product for two size bottle, and we will pay the drug-physician's endorsement. We have years, through physicians and hos-simply asked the sick to try it—try it pitals, we paid \$100,000 for the Amer-gift, made to convince you; to show

### Germ Diseases.

These are the known germ diseases. All that medicine can do for these troubles is to help Nature overcome the germs, and such results are indirect and uncertain. Liquozone attacks the germs, wherever they are. And when the germs which cause a disease are destroyed, the disease must end, and forever. That is inevitable.

### 50c. Bottle Free.

you what Liquozone is, and what it can do. In justice to yourself, please, accept it to-day, for it places you under no obligation whatever.

Liquozone costs 50c. and \$1. CUT OUT THIS COUPON for this offer may not appear again. Fill out the blanks and mail it to the Liquid Ozone Co., 458-464 Wabash Ave., Chicago. My disease is..... I have never tried Liquozone, but if you will supply me a 50c. bottle free I will take it. anza. .....

2 3 4 B A Give full address-write plainly.

Any physician or hospital not yet using Liquozone will be gladly supplied for a test.

The man who could not successfully conduct the business end of a peanut cart is the man who is free to tell you how the railways are mismanaged.

The woman who finds most faults if she ever does have to stand, is the one who, when the opportunity comes, expects to occupy two or three seats with parcels.

The man who loafs away three quarters of his time, is the one who is the most unreasonably impatient if the train is a few minutes late.

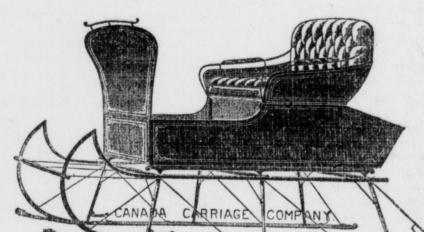

The woman who hates children is the one who thinks it brutal that she isn't permitted to take her dog into the chair car.

The man who "eats around" at the twentyfive cent resturants, is the surest "kicker" in the dining-car.

The woman who was born to serve is generally the one who discovers that the porter is not civil.

# Hear the Jingle of the Merry Sleigh Bells.

What more delightful this lovely weather and splendid roads than a ride in one of our elegant rigs?

I will get complete satisfaction, if we were not positive that the Chatham Incubator will pay you a handsome yearly income.

This is a straightforward offer. We make it to show our supreme confidence in the Chatham Incubator. We want you to accept this offer as we are sure of the satisfaction our Incubator will give. Every machine we have put out so far has made other sales in the same neighborhood

Dur offer is to send you a Chatham Incubator at once, freight prepaid by us without one cent of cash from you. You make your first payment in October, 1905. The balance to be paid in October, 1906, or if a Cash Buyer you get it cheaper. Could any offer be fairer or more generous?

be fairer or more generous f SMITH FALLS, ONT., November 19th, 1904. The Incubator and Brooder that I bought from your agent, on time. I wish now to pay the whole amount this fall, if you will give me a discount. I am very much pleased with both Incubator and Brooder, and would not be without them, because I cleared this senson, more than the Incubator and Brooder cost me. Yours respectfully. MRS. W. HYSLOP.

Write us to-day for full particulars of our offer and mention this paper. Don't put it aside for another time as this special proposition may be withdrawn at any time.

#### Modest Celebrities.

It is a curious and interesting fact that many of the world's greatest men have been as sparing of words as the have been prodigal of d eds. It is doubtful if there ever lived a more tacturn man than Wallenstein, the famous commander of the Austrian army during the Thirty Years' War. It is said of Wallenstein that he "lived in an atmosphere of silence," and never uttered a word that was not absolutely necessary, nor would he permit others to speak in his presence more than was essential. Napoleon boasted that in his dealings with men he never wasted a word, and that he made monosyllables answer most purposes.

ceiving reports from his generals would promit.u.e." To his staff, the Duke of Welling. ton was always more or less a sphnax. A nod or a shake of the head was often the only received. Had you thought of that? response they could get from him.

Von Moltke almost rivalled Wallenstein in taciturnity. He never opened his mouth if a gesture would suffice, and when the news was brought to him that the French had declared ing them loose. war, he simply said to the aided a-camp,

· S-cond pigeon hole on the right, first tier!" Thomas Carlyle was a "hoarded of the gold of sounce," and would sit for hours. puffing a way at his pipe, without uttering more than b grutt of a gruff monosyllable.

In our own country we have also many ex. amples. Duncan Anderson, of Rugby, Ont., raises calves for beef making and yet his own average him over \$40 per cow for butter made from their milk.

Jas. Leask, of Greenbank, Ont., and dozens of farmers all round the Toronto district of Ontario can show shorthorn and shorthorn grade cows that will produce milk in competition with the dairy herds of any part of the country.

Possibly some of the gifts you made were as inappropriate as some that you

Human nature is a funny mix-up! The average man and woman seem to be made up, for a good part, of complaints-"kickc," and when they travel they especially enjoy turn-

The man who is accustomed to wood bottomed chairs at home is the man who complains most about the hard seats on the train. The woman to whom no one has the slightest inclination to speak, is the one who is most timid about travelling alone.

The man who is in a business that considers 200 per cent profit legitimate is the one who wails loudest about extortionate fares.

The woman who lives in a four- room flat is the one who finds most fault with the close quarters of the sleeping car.

### The Man She Found.

The worried-looking woman with the tangled red hair and the woman with the shrieky voice and curling-pins were having an animated conversation over the back fence. The dazed looking caricature, with a peg in her mouth, was looking on, and listening.

Said the wowan with the falsetto hair, "Oh, you can't be too careful. I always lock up everything, and stick a kerosene tip in front of every door, and put nails in the windows. I feel safe then."

The woman with the voice let it crow triumphantly.

"A fine lot er good that would do yer if there was a burglar in the house! What's th' good of lockin' yerself in t' be murdered? You ought t' do as I do, and have a good look round before yer lock up!"

"So I do-I look everywhere!" sniffed the woman with the emphatic hair. She of the voice fixed her with an un

- believing eye.
- "Uuder th' stairs?" "Of course!"
- "On top of th' wardrobe?"
- "Well, you don't think I'd forget that!" "Under th' bed, then ?"
- "Why, you must think I'm a perfect fool! couldn't sleep if I didn't look there!"

Then the caricature took the peg out of her mouth and raised up a tired voice. "I uster, too," she sighed; "but I don't look anywhere now. I uster worry meself inter fits, thinkin' I seen burglars in every. corner. People uster laugh at me, but I uster tell 'em I might find a man any night-so I kept on lookin' ".

The weary one paused in her narration, heaved a sigh, and clawed feebly at the wisp of grey hair that had floated across her eyes. "Go on-go on!"

The tired atom sighed again heavily, and proceeded. "Well, one night I did find a man. I looked under th' bed, as usual, an' there was me 'usband, that I 'adn't seen for seven years!"

The woman with the revolutionary hair remarked, "Lor!"

She with the wild voice squawked hilari-

ously. "That," concluded the weary one, in a "That," concluded the wears ago, an' even muffled tone, "was ten years ago, an' ever since I've been supportin' 'im That's w'y I don't look now. I couldn't afford to find another."

Then she sank from sight and resumed her work at the washtub, and the other two wrecked the remainder of her character.

We are showing this season a very fine line of these goods, especially a Dexter Pung. The model is up to date, painting and trimming of the finest, iron work of the best. We are selling them, too, like hot cakes. Call early before they are gone."

We have, too, a splendid assortment of Robes. Also, Fur Coats for men and Fur Jackets for the ladies.
