THERE is a publicity bureau that sends out sneak advertising from 126 State Street, Boston. Under the guise of news matter it sends to a select list of newspapers advertising matter for the Boston Elevated Railroad. We cheerfully give it this last piece of publicity entirely free, and at the same time warn other papers against being caught by the artful critters.

He also writes for many of the leading scientific papers in the United States, and the recent article written for The Technical Magazine is a nice recognition of his ability in scientific research.—Greenville Daily News.
