

**Care of Honey.**

The average housekeeper puts honey in the cellar for safe keeping, about the worst place possible. Honey readily attracts moisture. In the cellar extracted honey will become thin, and in time may sour. With comb honey the case is still worse, for the appearance as well as the quality is changed. Instead of keeping honey in a place moist and cool, keep it dry and warm, even hot. It will not hurt to be in a temperature of even 100 degrees. Where salt will keep dry is a good place for honey. Few places are better than the kitchen cupboard. Up in a hot garret next to the roof is a good place, and if it has had enough hot days there through the summer it will stand the freezing winter; for under ordinary circumstances, freezing cracks the combs, and hastens granulation or candying.

If honey be kept for any length of time, especially during cold weather, it has a tendency to change from its original beautiful liquid transparency to a white semi-solid granulated condition, called by beekeepers, granulated or candied. According to a recent bulletin of the Ontario Department of Agriculture, it sometimes becomes candied so solid that when in a barrel the head has to be taken off, and the honey removed by the spade. This candied condition is not to be taken as an evidence against its genuineness or purity, but the contrary; for the adulterated honeys are less likely to candy than those that are pure.

It is an easy matter to restore honey to its former condition. Simply keep it in hot water bath long enough, but not too hot. If heated above 160 degrees, there is danger of spoiling the color and ruining the flavor. Honey contains the most delicate of all flavors, that of the flowers from which it is taken. A good way is to set the vessel containing the honey inside another vessel containing hot water, not allowing the bottom of the one to rest directly on the bottom of the other, but putting a bit of shingle or something of the kind between. Let it stand on the stove, but do not let it boil. It may take half a day or longer to melt the honey. If the honey is set directly on the reservoir of a cook stove it will be all right in a few days. In time it will again granulate.—Bulletin Ontario Department of Agriculture.

**Active Liver,****Good Digestion.**

AND THERE IS NO MORE PROMPT  
AND CERTAIN MEANS OF KEEPING  
THE LIVER RIGHT THAN

## DR. CHASE'S KIDNEY-LIVER PILLS.

In calling your attention to Dr. Chase's Kidney-Liver Pills it is only necessary to point to their success in the past, for they are known in nearly every home.

By means of their direct and specific action on the liver—causing a healthful flow of bile—they regulate and enliven the action of the bowels and ensure good digestion in the intestines. At the same time they stimulate the kidneys in their work of filtering poisons from the blood.

The cleansing process set in action by Dr. Chase's Kidney-Liver Pills means a thorough cure for biliousness, intestinal indigestion, torpid liver, kidney derangements and constipation.

It means a restoration of health, strength and comfort where there has been pain, weakness and suffering. It means a removal of the conditions which lead to backache, rheumatism, lumbago, Bright's disease, appendicitis and diabetes.

MRS. JAMES W. BELYEA, Belyea's Cove, Queens Co., N. B., writes:—"We have kept Dr. Chase's Kidney-Liver Pills in the house as a family medicine for years and find them the most satisfactory of any remedy we can get. I can personally recommend them to anyone suffering from kidney and liver derangements and stomach troubles."

MR. ALEX. M. FINN, Inkerman, N. B., writes:—"I have used Dr. Chase's Kidney-Liver Pills for derangements of the kidneys and liver and stomach troubles and can certify that they did me a great deal of good. I can heartily recommend them to anyone suffering as I did."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25 cents a box, at all dealers, or Edmanson, Bates & Co., Toronto.

**Bible Verse Which Contains The Alphabet.**

There is one verse, and it is said to be only one, in the Bible that contains every letter of the alphabet. It is Ezra vii, 21, and reads: "And I, even I, Artaxerxes, the king, do make a decree to all the treasurers which are beyond the river, that whatsoever Ezra, the priest, the scribe of the law of the God of heaven, shall require of you, it be done speedily."

The per capita wealth of the United States has increased, according to an article by Charles M. Harvey in the World's Work, from a little over \$300 in 1850 to nearly \$1,400 today. This increase has been mainly due to the development of natural resources, which have been lying dormant for centuries. It would be interesting to learn what proportion of the increase has gone to a few individuals and corporations which have been allowed to exploit these resources.

**A Beaver Farm no Idlers' Home.**

On the farm of the Rev. W. E. Christmas, a few miles from the town of Oxbow in the Province of Saskatchewan, exists one of the few beaver farms of Canada. Within the limits of the farm are five large dams, peopled by some two hundred beavers. The banks of the Souris River, which runs through the farm, are fringed with poplar trees, supplying the beaver with the very best of building material and also with his daily bread. According to a law passed in 1896 it is illegal to kill beavers until the fall of 1908, consequently this colony is waxing strong and multiplying rapidly. Having been protected from the trappers for the past ten years, they are becoming very tame, and do not seem to mind a casual onlooker, although they do most of their work by moonlight. One night these beavers cut down fifty-two trees, according to the Rev. Mr. Christmas, who takes a great deal of interest in his little tenants and watches carefully to see no harm comes to them. These beavers are very industrious, and have no use for one of their number who refuses to do his share of the work. When such a member of the flock is noticed the others drive him away to live in solitude, and when such a beaver is found by a trapper they are known as bachelors. It takes the beavers but a short time to fell a large-sized tree, and they are able to throw it in any direction desired. When once felled, the tree is quickly cut up into lengths for houses, dams, or food as may be required. The house of the beaver is built on the bank of the river, with its entrance under water. Once having built the entrance the rest of the house is started, the whole colony working at the house until it is finished, and when completed it is warm, dry, and cosy. Although it is impossible for the beavers to live for long under water, the entrance is built for some distance under the water, and then there is a long tunnel connecting the house with the water. A beaver family usually consists of four or five, and comes into the world with its eyes wide open. The young ones live with their parents for two years and then they are made to shift for themselves. The full-grown beaver measures about two feet in length, with a tail some ten inches long, which he can use as a spade or trowel as well as a paddle. The average age is fifteen years, although some have been known to be as old as twenty, but such cases are said to be rare. When the animal is nine years of age its pelt is at its prime, and will fetch from \$10 to \$12 in Minneapolis.

**Indignant Customer.**

The following letter from a very much incensed dairyman who has probably purchased one of the \$39.98 variety of separators, appeared in the New Zealand Dairyman:

Dere Sir,—Yure blasted sperator has gon bung agen, it went Alright for a couple of of days after yure man txt it, then it started wobling agen. When we try to get up spede the kursed bole starts wobling and gumping like a buck rabbit, nocks the plates of what you are going to do about it. I have to kart me milk 2 miles long these roten rodes to Murphys for to seprate. Morover hav lost a hell of milk tryin to seprate with yure kurst infernal machien. i Don't want to be disrespectabel but if you won't fix up the dam ratling frawd quick and lively it will be wurs for you. Ted Donovan.

**Surgical Triumphs.**

Blood poisoning, which has become much less common since Lord Lister's great discovery was given to the world, finds another foe in formalin. In the treatment of hip disease Dr. Lorenzo has shown some marvelous results, although reports differ as to the success of the treatment of the Armour child. Entering thus the domain of surgery we find an art, scarcely 50 years old, already brought to perfection. That future surgeons will be able to do much more than those living today may well be doubted. Into every part of the body the skilled operator now thrusts his healing knife—into the heart, and the brain. There remains but one small portion of the brain that may not be invaded, for here the wall between death and life is thinner and finer than any blade.

**The English Shire Horse.**

A heavy draft animal is the shire horse, bred in England pure, for the last century, with more bone, weight, and substance than any horse known to man, says the Farmer's Voice; his feet like iron and muscles affording unknown strength.

He is the draft horse of England, and is exported to every civilized country on the globe for the sole purpose of improving the breeds of horses in the countries to which they are exported.

It is not uncommon to find them weighing 2,000 to 2,400 pounds, not a mass of fat, but muscle and sinew.

It is in the low black lands of the fens of Cambridgeshire, Lincolnshire, and Huntingdonshire where we find the real old type of the shire horse. Here he has been bred pure for the last 100 years, and grown to perfection and massiveness. While good shires are bred in the northern portion of England, still their bone and weight diminishes more or less and requires the infusion of the old fen blood to keep up their substance.

**Where no Difference of Opinion is Allowable.**

"Honest men may honestly differ," said the Hon. Charles J. Bonaparte, of President Roosevelt's Cabinet, on a recent occasion, "as to protection and free trade, as to federal supremacy and State rights, as to gold currency and silver currency and paper currency, but honest men all think alike as to a free ballot and a fair count. If any man helps in, or winks at, or covers over any kind of cheating at the polls, that man is not a misinformed or misguided fellow-citizen, to be argued with and shown his error. He is a scoundrel, and should be called a scoundrel and dealt with as a scoundrel by every honest man."

**Lots To Do.**

The fashionable girl had accepted him and the young man was wondering how far his \$30 a week would go.

"You must remember that life is not all golf and tennis," murmured he.

"Why, of course it isn't," she responded brightly. "There's boating and coaching and bridge and ever so many things."

## YOU CAN SAVE \$13.15 TO-DAY

\$11.85  
A SUIT

A well made to measure Suit from your tailor costs \$25.00. Thousands of smartly dressed men in Canada save that \$13.15. They deal with us and PAY only \$11.85.

**OUR SPECIAL FREE BONUS OFFER**

We will present every READER of this PAPER who places an order for our \$11.85 Suit during this month, either

One Pair of \$6.00 Trousers (to measure) FREE.

Or a Stylish Fancy Dress Vest, FREE.

TOGETHER with a really elegant PATENT SUIT CASE, entirely FREE with every order for a Suit.

**Agents Wanted.**

YOU ARE UNDER NO OBLIGATION TO BUY, and we will REFUND your money if you find either the Special Suits or the FREE GIFTS are NOT EXACTLY as advertised in this paper.

We will send you, FREE OF ANY CHARGE whatever, a handsome range of patterns, including our wonderful value Blue and Black Serges and Cheviot Tweeds, together with our latest New York Fashion Plates. THEN JUDGE FOR YOURSELF. Our home measurement system is so SIMPLE that we require only 8 measurements (which anyone can take) to enable us to give a PERFECTLY FITTING tailor made garment. You choose your own gift and pattern. Address, to-day,

Pattern Department,  
The Mail-Fit Clothing Co., Montreal, Can.

## Your Carriage Or Waggon

Needs painting. It will tend to preserve it as well as to improve its appearance. Please bring it in early so that I can have plenty of time to do a good job and give the varnish plenty of time to harden before you take it out.

I have plenty of storage room.
